# Access to Only Grainger.

# 560,000+ brand name products.

## with

***Thousands Of New Products.***

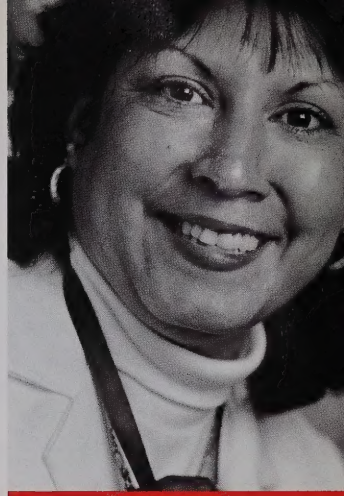
You'll find great new stuff in every category—plus new brands like Bell & Gossett® pumps and Westward® hand tools. You'll also find new lower prices on thousands of the products you use most.

***Thousands More Beyond The Book.***

Look in this Catalog for our most popular products or go online to **grainger.com** to find more. Your branch can also access many additional products from some of our best known brands.

***Trusted Brands.***

You can take quality for granted when you buy from Grainger. We carry close to 1,000 manufacturers – the names you know and trust.



***Genuine OEM Parts.***

Call 1-800-323-0620 day or night for OEM parts for your Grainger products and more. Grainger Parts can directly supply you with parts from over 550 manufacturers. See pages 3827–3830 for details.

***We started wi motors more than 70 years ago, and we haven't stopp adding new product categories since. Today, we're not onl America's leading industrial supplier, we lead the way in lighting.***

**"If we need to replace or add something, I call my Grainger branch. When repair is an option, Grainger Parts is my source. I can count on them for just about anything."**

*– Maria Angela Rodarte*
*Maintenance Buyer*

# Only Grainger.

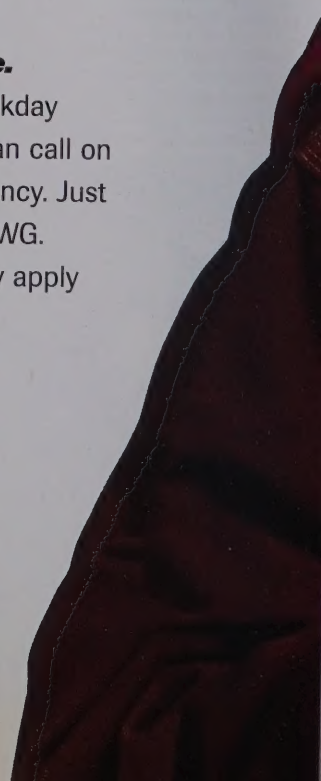
## plus

***350+ locations.***

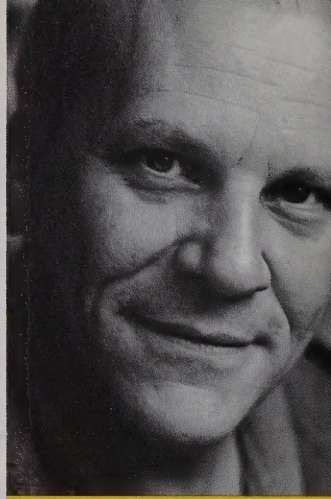
Phone or fax ahead with your order—or just walk in. Your local branch has many products on display and stocks thousands of the most used items in your area.

***Person to person service.***



Whether you're talking to a customer service associate at your branch—or a dedicated Grainger sales rep at your site—you can expect help with everything from product selection to product services.

***24 hour online ordering.***



It's fast and easy to order on **grainger.com** and easy to check on availability of products at your branch plus access your own contract or volume prices – right from your desktop – 24 hours a day, 7 days a week.

***Emergency service.***

Even after regular weekday business hours, you can call on Grainger in an emergency. Just phone 1-800-CALL-WWG. A nominal $50 fee may apply to open your branch.

*Did you know we're* ***America's*** *leading safety supplier? Head to toe, floor to ceiling, our complete brand name safety line protects your people and property.*

**"Grainger works for me on any shift, any time. During the day, I use the phone to place my orders. After regular hours, I'm on their Web site."**

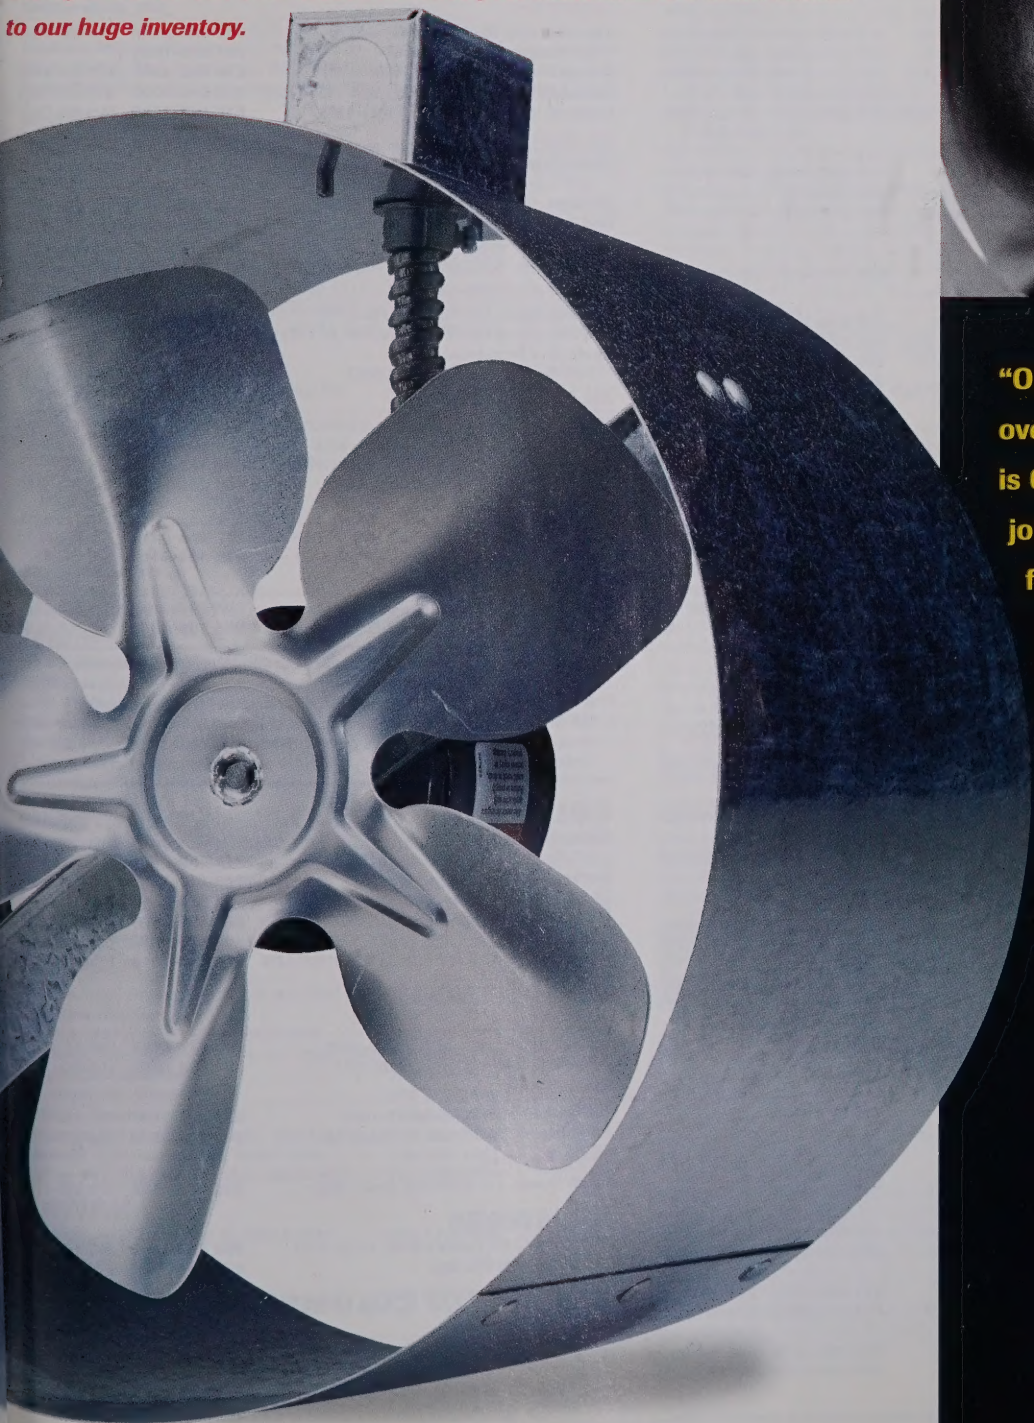
*– Mike Doyle*
*Facility Manager*

# Only Grainger.

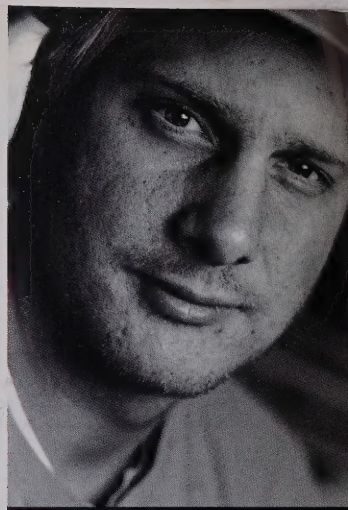
# More ways to make running your business plus easier.

***$1,000 instant credit.***
We make it easy to do business with Grainger from the start. A new Grainger account and credit line can be opened instantly subject to our policies.

***Easy ordering by phone, fax, in person or online.***
You can place your Grainger order 24 hours a day. Contact your local branch during regular weekday hours or visit us at **grainger.com** anytime.



***One year limited warranty.***
Our warranty is one of the best in the business. At our option, we'll repair or replace any defective product for a full year after purchase. See page 4010 for details.



***No minimum orders.***
Your business is always welcome at Grainger whether you need an entire heating system or a pack of AAA batteries. Expect maximum service at your branch and no minimums.

***Hassle-free returns.***
Without a restocking charge, your branch will credit or refund any item or help you select a replacement.

*You can get more from* ***America's leading HVAC distributor.*** *Your Grainger branch can even cross-reference your manufacturer's stock number to our huge inventory.*

**"Our jobs are all over town…and so is Grainger. They're johnny-on-the-spot for troubleshooting. I get 90% of our electrical stuff from them and 100% satisfaction."**

*– Arnie Arntzen*
*Supervisor/Electrician*

GRAINGER Racing™

## Leather Racing Jacket

Checkered flag pattern on upper back and arms sets you apart from the crowd. Two outside slash pockets, inside breast pocket and warm polyester fiberfill lining.

| Size | Model No. | Stock No. | Each |
|---|---|---|---|
| **M** | GR810502 | **4MK91** | **$295.00** |
| **L** | GR810503 | **4MK92** | **295.00** |
| **XL** | GR810504 | **4MK93** | **295.00** |
| **XXL** | GR810505 | **4MK94** | **295.00** |

## Race Truck Decal

Full color image of the No. 50 Grainger truck. Measures 6" x 4". Adheres to clean, smooth surfaces. No adhesive necessary.

**No. 4MK88** . . . . . **$0.96**

## Replica Truck

**1:64 scale** die-cast metal body truck. Fully-detailed collectible replica includes Greg Biffle trading card.

**No. 4MM42** . . . . . **$3.95**

**1:24 scale** die cast metal-bodied truck is a fully-detailed replica of the No. 50 Grainger Racing Truck. Manufactured by Racing Champions. Recommended for ages 6 and up.

**No. 4MM43** . . . . . **$19.95**

GRAINGER Racing

## Racing Lapel Pin

Collectible pin measures 1" x 1-1/4". Military clutch back stays firmly in place.

**No. 4MK89** . . . . . **$2.95**

## Wraparound Sunglasses

Black nylon lenses offer 100% UV400 protection. Matte black acrylic frame is lightweight, yet impact resistant.

**No. 4MK87** . . . . . **$7.95**

## White Polo Shirt

100% cotton short sleeve pique polo keeps you cool and comfortable at trackside. Banded sleeves feature Dayton, Speedaire and Teel logos. Grainger Racing logo is embroidered on left chest.

| Size | Stock No. | Each |
|---|---|---|
| M | 4MM33 | $34.50 |
| L | 4MM32 | 34.50 |
| XL | 4MM34 | 34.50 |
| XXL | 4MM35 | 35.50 |

## Pit Crew Hat

Perfect for work or play and fully adjustable with plastic snap back closure. Black and red bill; black, white and red crown.

**No. 4MM24 . . . . . $7.50**

## White Pocket Tee Shirt

Comfortable 100% cotton short sleeve "Tee" sports Grainger racing logo on breast pocket, Greg Biffle signature and colorful catalog/race truck graphics on back of shirt.

| Size | Stock No | Each |
|---|---|---|
| L | 4MM26 | $14.95 |
| XL | 4MM27 | 14.95 |
| XXL | 4MM28 | 15.95 |

## Insulated Commuter Mug

In your car or at the track, this spill-proof mug keeps drinks hot or cold. Hearty 16 oz. size features 2-color Grainger Racing logo on both sides.

**No. 4MK90 . . . $6.50**

## Grainger Racing Cap

Velcro back closure on this heavy, brushed twill material. Black bill with white crown featuring Grainger Racing logo. Also includes Dayton, Speedaire and Teel racing sponsor logos.

**No. 4MM23 .... $12.00**

## Black Lightweight Jacket

Nylon jacket has zip-up front, elastic cuffs and bottom, and slash pockets with red piping. Features embroidered Grainger Racing logo on left hand chest.

| Size | Stock No. | Each |
|---|---|---|
| M | 4MM40 | $79.95 |
| L | 4MM39 | 79.95 |
| XL | 4MM41 | 79.95 |

## Grainger Signature Cap

Split red and black bill with #50 emblazoned in white. Black, red and white crown highlights Greg Biffle signature and Grainger corporate logo with Racing insignia.

**No. 4MM25 .... $14.50**

## Denim Oxford Shirt

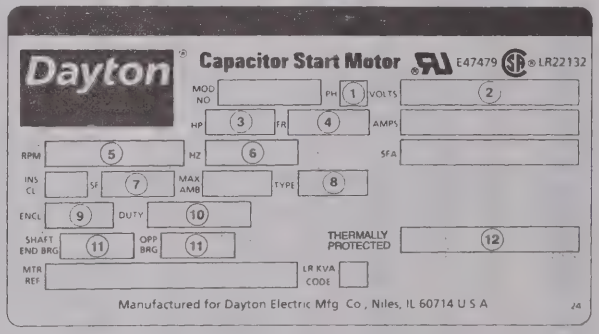
Heavy denim long-sleeved shirt is cream-colored with button down collar. Has Grainger Racing logo embroidered over left breast pocket.

| Size | Stock No. | Each |
|---|---|---|
| M | 4MM37 | $41.95 |
| L | 4MM36 | 41.95 |
| XL | 4MM38 | 41.95 |

# MOTOR SELECTION INFORMATION

## SELECTING AC (ALTERNATING CURRENT) INDUCTION MOTORS

**See Electric Motor Terminology Section on pages 3520, 3521, and 3514 for detailed information.**



Motors are used in a wide variety of applications. In some applications more than one motor design would work well. In others, an exact replacement cannot be found but a similar motor with slight differences in mechanical and electrical characteristics will provide reliable operation. The following selection guide is designed to help you choose the correct motor for your application.

**Follow these 4 Easy Steps to Choose Your Motor:**

## STEP 1: GATHER MOTOR INFORMATION

You will need the following information to properly select a motor. If you are replacing a motor, much of the information can be found on the existing motor nameplate. See the sample nameplate below.

① **Phase—Either single (1) or three (3).** Match exactly.
② **Voltage.** Match exactly.
③ **Horsepower (HP)—Very small motors are often rated in watts.** Choose an equal or next higher HP.
④ **Physical Size/Frame.** Match exactly.
⑤ **Speed (RPM).** Match within 5%.
⑥ **Frequency (Hz).** Match exactly.
⑦ **Service Factor.** Choose motor of equal or greater number.
⑧ **Type:** See below.
⑨ **Enclosure.** See below.
⑩ **Duty Cycle.** If current motor is intermittent duty, you may upgrade to continuous. Air-over must be installed in the airstream.
⑪ **Bearing Type—Sleeve or Ball.** Match exactly.
⑫ **Thermal Protection.** See Thermal Protection Information on page 6.

## STEP 2: DETERMINE THE RIGHT CATALOG SECTION

**By your application:** Many of our motors are listed by application such as fan, pump, blower, compressor, etc. You will find these applications under "Motors" in the Product Index in the back of the Catalog. Turn to the specific page or section to find your motor. If your application is not listed in the index, choose your motor by its characteristics.

**By the characteristics:** Motor type, horsepower, speed, and enclosure. Grainger carries general purpose motors designed for reliable use on a wide variety of applications. They are grouped in two categories: Industrial and Commercial. There is considerable overlap in applications which can use either motor. In general, Industrial motors are more rugged than Commercial motors, but cost more.

**Industrial Motors** are designed for mechanical loads (also effective for air moving) and for hard-to-start applications such as conveyors, belt-driven equipment, machine tools, and reciprocating pumps. These motors feature ball bearings to handle heavier radial and axial loads and heavier construction for industrial applications.

**Commercial Motors** are designed mostly for air moving and other light to medium duty applications, such as fans and centrifugal pumps, small tools, and office equipment.

### MOTOR TYPES

| Type | Starting Torque as Percent of Full-Load Torque | Comparative Efficiency | Comparative Cost | Typical Uses |
|---|---|---|---|---|
| **Shaded Pole** | Very Low 50-100% | Low | Low | Small direct-drive fans and blowers |
| **Permanent Split Capacitor (PSC)** | Low 75-150% | Moderate | Low to Moderate | Direct-drive fans and blowers |
| **Split-Phase** | Low to Moderate 130-170% | Moderate | Moderate | Belt-drive and direct-drive fans and blowers, small tools, centrifugal pumps, and appliances |
| **Capacitor Start** | Moderate to High 200-400% | Moderate to High | Moderate to High | Pumps, compressors, tools conveyors, farm equipment, and industrial ventilators |
| **Three-Phase** | Moderate to High 200-300% | High | Moderate | Applications where 3-phase power is available |

### ENCLOSURE TYPES

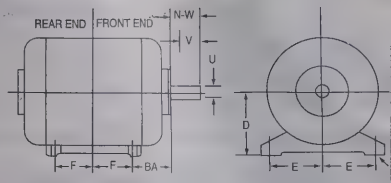
| Enclosure Type | How Can I Tell? | Where Do I Use This Enclosure? |
|---|---|---|
| **Open/Dripproof** | Ventilation holes in shell and/or endshield. | Clean, dry, non-hazardous environments. |
| **Enclosed** | No ventilation holes in shell or endshield. | Dirty, moist, non-hazardous environments. |
| **Hazardous Location** | Enclosed. Must have a UL Hazardous location nameplate on motor frame. | Designed for use in hazardous environments as defined by National Electrical Code (NEC) classifications. NEC Class and Group are designated on UL Hazardous Location nameplate mounted on motor. |

## STEP 3: FIND THE RIGHT PAGE

Motors are arranged in each section as follows: 1st by type/application; 2nd by enclosure or special features within that type. Example: When looking for an Industrial 3-Phase TEFC motor, first turn to the Industrial section, then find 3-phase motor pages, then turn to TEFC pages.

## STEP 4: SELECT SPECIFIC MOTOR

Match all of the information you have gathered in Step 1.



**See Electric Motor Terminology Section on pages 3520, 3521, and 3514 for detailed information.**

# MOTOR DIMENSIONS FOR NEMA FRAMES

Standardized motor dimensions as established by the National Electrical Manufacturers Association (NEMA) are tabulated below and apply to all base-mounted motors listed herein which carry a NEMA frame designation.

| NEMA Frame | All Dimensions in Inches | | | | | | | | Key | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | D* | 2E | 2F | BA | H | N-W | U | V§ Min. | Wide | Thick | Long |
| 42 | 2⅝ | 3½ | 1¹¹⁄₁₆ | 2¼ | 9/32 slot | 1⅛ | 3/8 | — | — | 3/64 flat | — |
| 48 | 3 | 4¼ | 2¾ | 2½ | 11/32 slot | 1½ | 1/2 | — | — | 3/64 flat | — |

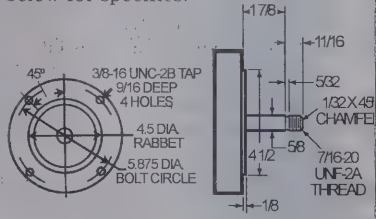
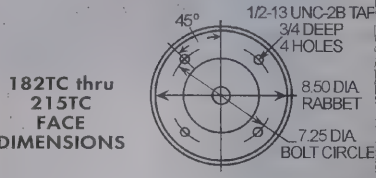
| 324T | 8 | 12½ | 10½ | 5¼ | 21/32 dia. | 5¼ | 2⅛ | 5 | 1/2 | 1/2 | 3⅞ |
| 326T | 8 | 12½ | 12 | 5¼ | | 5¼ | 2⅛ | 5 | 1/2 | 1/2 | 3⅞ |
| 324TS | 8 | 12½ | 10½ | 5¼ | | 3¾◇ | 1⅞◇ | 3½◇ | 1/2 | 1/2 | 2◇ |
| 326TS | 8 | 12½ | 12 | 5¼ | | 3¾◇ | 1⅞◇ | 3½◇ | 1/2 | 1/2 | 2◇ |
| 364# | 9 | 14 | 11¼ | 5⅞ | 21/32 dia. | 5⅝ | 1⅞ | 5⅜ | 1/2 | 1/2 | 4¼ |
| 364S# | 9 | 14 | 11¼ | 5⅞ | | 3¼ | 1⅝ | 3 | 3/8 | 3/8 | 1⅞ |
| 365# | 9 | 14 | 12½ | 5⅞ | | 5⅝ | 1⅞ | 5⅜ | 1/2 | 1/2 | 4¼ |
| 364U | 9 | 14 | 11¼ | 5⅞ | 21/32 dia. | 6⅛ | 2⅛ | 6⅛ | 1/2 | 1/2 | 5 |
| 365U | 9 | 14 | 12¼ | 5⅞ | | 6⅛ | 2⅛ | 6⅛ | 1/2 | 1/2 | 5 |



(*) Dimension D will never be greater than the above values on rigid mount motors, but it may be less so that shims up to 1/32" thick (1/16" on 364U and 365U frames) may be required for certain machines. (‡) Dayton motors designated 56H have two sets of 2F mounting holes—3 and 5". (◇) Standard short shaft for direct-drive applications. (#) Discontinued NEMA frame. (**) Base of Dayton 56HZ frame motors has holes and slots to match NEMA 56, 56H, 143T and 145T mounting dimensions. (†) Certain NEMA 56Z frame motors have 1/2" dia. x 11/2" long shaft with 3/64" flat. These exceptions are noted in this catalog. (§) Dimension "V" is shaft length available for coupling, pinion or pulley hub—this is a minimum value.

## NEMA C and J-FACE MOUNT DIMENSIONS



Mounting dimensions of the 56J face are exactly the same as the NEMA 56C, 143TC and 145TC faces.

56J face has a threaded shaft of stainless steel while all others have a keyed steel shaft. See illustrations and table below for specifics.

**56C, 56J, 143TC and 145TC FACE DIMENSIONS**

**56J SHAFT**

**182TC thru 215TC FACE DIMENSIONS**

| NEMA Face | Shaft Dia. (U) | Shaft Long (N-W) | Rabbet Dia. | Bolt Circle Dia. |
|---|---|---|---|---|
| 42C | 3/8" | 1⅛ | 3" | 3¾ |
| 48C | 1/2 | 1⅛ | 3 | 3¾ |
| 56C | 5/8 | 1⅞ | 4½ | 5⅞ |
| 56J | 5/8 | 2⁹⁄₁₆ | 4½ | 5⅞ |
| 143TC & 145TC | 7/8 | 2¼ | 4½ | 5⅞ |
| 146ATC & 1412ATC | 7/8 | 2¼ | 4½ | 5⅞ |
| 182TC & 184TC | 1⅛ | 2¾ | 8½ | 7¼ |
| 186ATC & 189ATC | 1⅛ | 2¼ | 8½ | 7¼ |
| 213TC & 215TC | 1⅜ | 3⅜ | 8½ | 7¼ |
| 219ATC & 2110ATC | 1⅜ | 2¾ | 8½ | 7¼ |

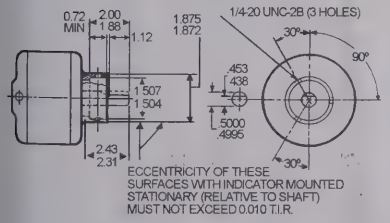
| 449TS | 11 | 18 | 25 | 7½ | | 4¾ᴬ | 2⅜ᴬ | 4½ᴬ | 5/8 | 5/8 | 3ᴬ |

(*) Dimension "D" will never be greater than the above values on rigid mount motors, but it may be less so that shims up to 1/32" thick (1/16" on 364U and 365U frames) may be required for certain machines.
(‡) Dayton motors designated 56H have two sets of 2F mounting holes—3" and 5".
(ᴬ) Standard short shaft for direct-drive applications.
(#) Discontinued NEMA frame.
(**) Base of Dayton 56HZ frame motors has holes and slots to match NEMA 56, 56H, 143T and 145T mounting dimensions.
(†) Certain NEMA 56Z frame motors have 1/2" dia. x 1½" long shaft with 3/64" flat. These exceptions are noted in this catalog.
(§) Dimension "V" is shaft length available for coupling, pinion or pulley hub—this is a minimum value.
(§§) The 2F dimension is 20.

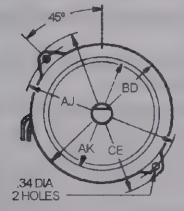


## QUALITY MOTORS

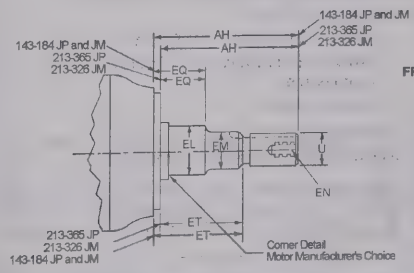
Electric motors listed in this catalog are engineered for maximum performance and are manufactured to the dimensional and performance standards established by National Electrical Manufacturers Association (NEMA). Fact labels on cartons give full specifications.

### UL LISTING AND CSA CERTIFICATION

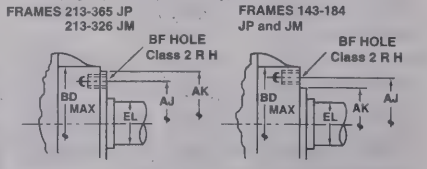
When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.



## NEMA 48K & 56K HUB DIMENSIONS SUMP PUMP MOTORS



## NEMA 48M, 48N and 56N FLANGE MOUNT DIMENSIONS



### OIL BURNER MOTORS

| | 48M | 48N 56N |
|---|---|---|
| AJ | 6¾" | 7¼" |
| BD | 6¼ max. | 7 max. |
| AK | 5½ | 6⅜ |
| CE | 7¾ max. | 8¼ max. |

### NEMA LETTER DESIGNATIONS FOLLOWING FRAME NUMBER

**C** Face mount; see previous page.
**H** Has 2F dimension larger than same frame without H suffix.
**J** Face mount for jet pumps; see above.
**K** Has hub for sump pump mounting; see at right for dimensions.
**M, N** Flange mount for oil burner; see column at left.
**T, U** Integral HP motor dimension standards set by NEMA in 1964 and 1953.
**Y** Non-standard mounting; see manufacturer's drawing for mounting dimensions.
**Z** Non-standard shaft (NW, U dimensions).

# MOTOR REGULATORY INFORMATION

## THERMAL PROTECTION INFORMATION

Motors that start automatically (e.g. thermostat controlled) and are located out of operator sight, must be protected against dangerous overheating due to failure-to-start or overloading. This protection may be a separate overcurrent device (e.g. motor starter) complying with Article 430 of the National Electrical Code (NEC), a thermally protected motor (internal motor protection), or an impedance protected motor.

Motors with automatic reset thermal protection MUST NOT b used where automatic or otherwise unexpected starting of th motor could be hazardous. Applications where automatic restart ing could be hazardous include compressors, conveyors, powe tools, farm equipment, and some fans and blowers. Where such hazard exists, always use a manual reset thermally protecte motor.

## UL 507 STANDARD

Any motor used in fan product, such as bathroom exhaust fans, wall-insert fans, ceiling insert fans, attic exhaust fans, whole house fans, and duct fans, etc., which are built into or within the building structure and which are likely to operate unattended or in situations in which the operator may not detect a locked rotor (stalled motor) condition must have either a manual reset thermal protector or a thermal cut-off (one-shot) device.

Range hoods, circulating fans, pedestal fans, and ceiling sus pended fans are not included. Agricultural fans are included i they are built into the building structure and are likely to operat unattended or in situations in which the person operating the fa may not detect a locked rotor (stalled motor) condition.

## ENERGY POLICY ACT of 1992 (EPACT 92) AND NATURAL RESOURCES OF CANADA

### What is the Energy Policy Act (EPACT) of 1992?

The Energy Policy Act of 1992 took effect in October of 1997 and requires most general purpose, three-phase induction motors manufactured for sale in the United States rated 1 through 200 horsepower meet minimum efficiency standards. EPACT was written into law to increase the availability of energy efficient motors for many end-use applications. In addition to efficiency standards, EPACT requires specific testing and labeling procedures be administered by all motor manufacturers.

EPACT applies to each motor manufactured alone or as a component of another piece of equipment after October 24, 1997. Existing motors and those manufactured prior to the October date are not governed by EPACT. Motors installed or in stock at end-use facilities are unaffected.

### Which Electric Motor Designs Are Required to Meet EPACT 92?

- Three Phase
- 1-200 HP
- General Purpose
- 56Hz-440T frames
- Operating on 230 or 460 volts
- 60 Hz power
- Open Dripproof (OPDP) Enclosures
- Totally Enclosed Fan Cooled (TEFC) enclosure
- Severe duty

**See Following Pages For Motors that Meet EPACT 92 Requirements**

**Op Dripproof14, 15, 26, 28, 144 & 152**
**TEFC . . . . 18, 19, 29, 30, 32, 37 & 38**
**Severe Duty . . . 33, 34, 35 & 36, & 39**

### Electric Motor Efficiency Levels Prescribed in EPACT '92

| Motor HP | Nominal Full-Load Efficiency | | | | | |
|---|---|---|---|---|---|---|
| | Open Motors RPM | | | Enclosed Motors RPM | | |
| | 1200 | 1800 | 3600 | 1200 | 1800 | 3600 |
| 1 | 80.0 | 82.5 | — | 80.0 | 82.5 | 75.5 |
| 1.5 | 84.0 | 84.0 | 82.5 | 85.5 | 84.0 | 82.5 |
| 2 | 85.5 | 84.0 | 84.0 | 86.5 | 84.0 | 84.0 |
| 3 | 86.5 | 86.5 | 84.0 | 87.5 | 87.5 | 85.5 |
| 5 | 87.5 | 87.5 | 85.5 | 87.5 | 87.5 | 87.5 |

| 40 | 93.0 | 93.0 | 91.7 | 93.0 | 93.0 | 91.7 |
| 50 | 93.0 | 93.0 | 92.4 | 93.0 | 93.0 | 92.4 |
| 60 | 93.6 | 93.6 | 93.0 | 93.6 | 93.6 | 93.0 |
| 75 | 93.6 | 94.1 | 93.0 | 93.6 | 94.1 | 93.0 |
| 100 | 94.1 | 94.1 | 93.0 | 94.1 | 94.5 | 93.6 |
| 125 | 94.1 | 94.5 | 93.6 | 94.1 | 94.5 | 94.5 |
| 150 | 94.5 | 95.0 | 93.6 | 95.0 | 95.0 | 94.5 |
| 200 | 94.5 | 95.0 | 94.5 | 95.0 | 95.0 | 95.0 |

## PREMIUM EFFICIENCY vs. STANDARD EFFICIENCY

$$\text{Annual Savings} = 0.746 \times HP \times L \times C \times N \left(\frac{100}{E_1} - \frac{100}{E_2}\right)$$

HP = Motor Horsepower
L = Percent Load Divided by 100
C = Energy Cost, Dollars per Kilowatt Hour
N = Running Time, Hours per Year
$E_1$ = Efficiency (%) of Standard Efficiency Motor
$E_2$ = Efficiency (%) of Standard Efficiency Motor

### Lower Operating Cost:

If you operate a 25 HP premium efficiency motor at full load f 24 hours a day (8760 hours per year) and your cost per kilowa hour is 9 cents, you can save $532.00 annually. This comparison based on a premium efficiency motor with a 94.1 efficiency ra ing vs. a high efficiency motor with a 91.0 efficiency rating.

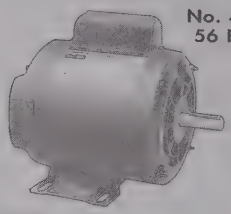
**Increased efficiency leads to lower operating temperatures, resulting in longer life.**

**Cooler Operation:** The life of an insulation system doubles for ea 10°C reduction in operating temperature.

**Longer Bearing Life:** The lower the temperature, the longer t bearing grease will last.

# CAPACITOR-START OPEN DRIPPROOF MOTORS

- **Rigid welded base**
- **Copper windings**
- **1.15 to 1.35 service factor**
- **NEMA 56HZ frame motors have 7/8 x 2¼" shaft and mounting base holes/slots to match Nema 56, 56H, 143T, and 145T frame motors**



**Typical Uses:** Air compressors, machinery, pumps, blowers, and other industrial equipment.
**Type:** Capacitor-start
**Bearings:** Ball
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

**Replacement Parts Available**
**1-800-323-0620**

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

- **Rigid welded base and copper windings**
- **NEMA 56HZ frame motors have 7/8 x 2¼" shaft and mounting base holes/slots to match NEMA 56, 56H, 143T, and 145T frame motors**

**Typical Uses:** Dependable operation in **noncombustible** dusty, dirty areas on pumps, air compressors, machinery, fans, blowers, tools, and conveyors.

**Type:** Capacitor-start
**Bearings:** Ball
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

# CAPACITOR-START TEFC MOTORS

- **Cast-iron construction on 182T, 184T, and 215T frames**

**Typical Uses:** Dependable operation in **non-combustible** dusty, dirty areas on air compressors, pumps, machinery, fans, blowers, tools, and conveyors.

**Type:** Capacitor-start

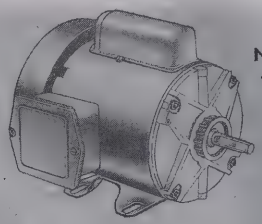
**Bearings:** Prelubricated ball

**Mounting:** Rigid welded base

**Enclosure:** TEFC

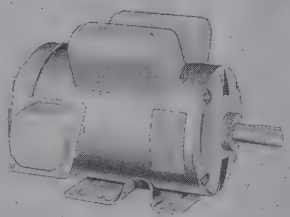
**Ambient:** 40°C

**Duty:** Continuous



**Rotation:** CW/CCW

**Finish:** Gray



**Brand:** GE

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

**CAUTION: Not for fans in unattended areas.**

**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

## PREMIUM EFFICIENCY vs. STANDARD EFFICIENCY

$$\text{Annual Savings} = 0.746 \times HP \times L \times C \times N \left(\frac{100}{E_1} - \frac{100}{E_2}\right)$$

HP = Motor Horsepower
L = Percent Load Divided by 100
C = Eneergy Cost, Dollars per Kilowatt Hour
N = Running Time, Hours per Year
$E_1$ = Efficiency (%) of Standard Efficiency Motor
$E_2$ = Efficiency (%) of Standard Efficiency Motor

### Lower Operating Cost:

If you operate a 25 HP premium efficiency motor at full load for 24 hours a day (8760 hours per year) and your cost per kilowatt hour is 9 cents, you can save $532.00 annually. This comparison is based on a premium efficiency motor with a 94.1 efficiency rating vs. a standard efficiency motor with a 91.0 efficiency rating.

### Increased efficiency leads to lower operating temperatures, resulting in longer life.

**Cooler Operation:** The life of an insulation system doubles for each 10°C reduction in operating temperature.

**Longer Bearing Life:** The lower the temperature, the longer the bearing grease will last.

GENERAL PURPOSE INDUSTRIAL MOTORS

# 3-PHASE HIGH EFFICIENCY MOTORS

- NEMA 56HZ frame motors have 7/8 x 2¼" shaft and mounting base holes/slots to match NEMA 56, 56H, 143T, and 145T frame motors
- NEMA Design B
- Two year warranty
- Open dripproof and TEFC models
- 56HZ, 143T and 145T frames meet efficiency for Energy Policy Act of 1992

**Typical Uses:** Pumps, blowers, machine tools, air compressors, and other industrial applications where 3-phase power is available.

**Bearings:** Double-shielded ball

**Mounting:** Rigid welded

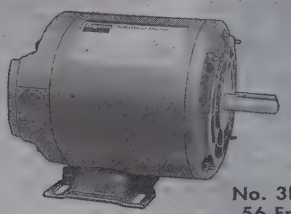
**Thermal Protection:** None

**Windings:** Copper

**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CW/CCW



**Finish:** Gray

**Check your frequently-ordered product categories for line extensions and new product offerings. Look for the "New Products" header at the top of the page and the "New" designation next to the stock number.**

# 3-PHASE FEDERAL EFFICIENCY OPEN DRIPPROOF MOTORS

- Meets NEMA MG1 Part 30 inverter duty use at 10:1 variable torque and 2:1 constant torque speed range
- Increased efficiency leads to lower operating cost
- 100% copper windings
- Motors run cool for increased life
- 12 leads, WYE Start-Delta Run capable on 254T frame and larger
- Usable on 50Hz 190/380V at rated HP and 1.0 service factor
- Class F insulation system, Class B rise at service factor
- Two-year warranty

**Typical Uses:** Premium efficiency performance on pumps, fans, blowers, and other industrial equipment.

**Bearings:** Double-shielded ball

**Mounting:** Rigid welded base

**Thermal Protection:** None

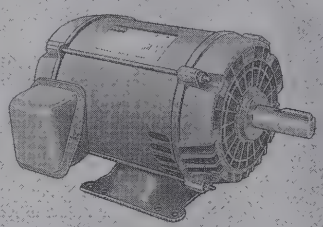
**Windings:** Copper

**Ambient:** 40°C

**Duty:** Continuous

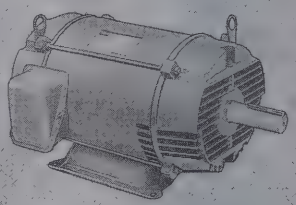
**Rotation:** CW/CCW

**Finish:** Gray



**Brand:** Dayton

**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.



Dayton® Wattrimmer

**The Energy Policy Act of 1992**
The motor products in this offering, frame sizes 143T through 449T, meet/exceed the EPACT 92 legislative efficiency levels.
For details of EPACT legislation, see page 6.

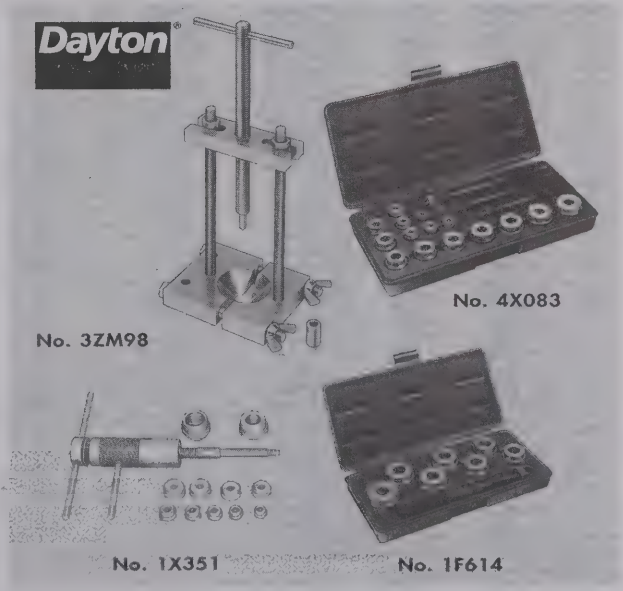
## BUSHING AND BEARING TOOLS



- **All parts plated**
- **Durable molded plastic carrying case included**

**Bushing Driver Sets** removes or inserts internal bushings and bearings in various equipment. Sizes marked on each adapter. No. 4X083 has 3 drivers and 16 adapters for 3/8 to 1¼" I.D. and 7/16 to 1⅜" O.D. No. 1F614 has 1 driver and 7 adapters for 1⁵⁄₁₆" I.D. and 1¾" I.D. and 1⁷⁄₁₆ to 1⅞" O.D.

**Bearing Tool Set No. 1X351** removes or inserts any sleeve motor bearing or bushing. Exerts even pressure to eliminate broken bearings or end bells. Removes frozen bushings without peening the bushing end, scratching, or marring. Has 9 adapters for 1/2 to 1" I.D. (in 1/16" increments) x 1⅛" maximum O.D.

**Portable Arbor Press No. 3ZM98** removes or inserts various press-fit components from shafting such as bushings, bearings, commutators, fan blades, and seals. Adjustable base has circular pocket that provides complete 360° surface contact for even distribution of pressure which eliminates damage to shafts and parts. Tool can be held-in-hand, bolted or clamped to workbench, or mounted in vise. Size range: 1/2 to 2⅜" O.D.

| Description | Stock No. | List | Each | Shpg. Wt. |

# GENERAL PURPOSE INDUSTRIAL MOTORS

# 3-PHASE HIGH EFFICIENCY OPEN DRIPPROOF MOTORS

**Typical Uses:** Pumps, fans, blowers, air compressors, conveyors, machinery, and other industrial equipment. Designed for general purpose applications with moderate to high starting torques in dry, clean, well-ventilated areas.

- **143T through 449T frame meet or exceed legislated energy standards (EPACT)**
- **EPACT Motors have improved cooling that results in longer life and lower operating costs**
- **All-copper windings**

**Bearings:** Ball, regreasable on 320-440 frames
**Mounting:** Rigid
**Thermal Protection:** None
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous **Rotation:** CW/CCW
**Finish:** Gray or black **Brand:** GE

# 3-PHASE FEDERAL EFFICIENCY TEFC MOTORS

- Meets NEMA MGI Part 30 inveter duty use at 10:1 variable torque and 2:1 constant torque speed range
- Increased efficiency leads to lower operating cost
- Motors run cooler, resulting in increased life
- 100% copper windings
- 12 leads, WYE Start-Delta Run capable on 254T frame and larger
- Usable on 50Hz 190/380V at rated HP at 1.0 service factor
- Class F insulation system, Class B rise at full load (60 Hz)
- Two-year warranty

**Typical Uses:** Premium efficiency performance on air compressors, conveyors, fans, blowers, machine tools, pumps, and other industrial equipment. For use in **non-combustible**, dusty, dirty environments where 3-phase power is available.

**Bearings:** Double-shielded ball on 56 thru 360 frame. Open ball with filler caps on 400 thru 440 frame. Regreasable 250 thru 440 frame.

**Mounting:** Rigid welded or solid base

**Thermal Protection:** None

**Windings:** Copper **Ambient:** 40°C

**Duty:** Continuous **Rotation:** CW/CCW

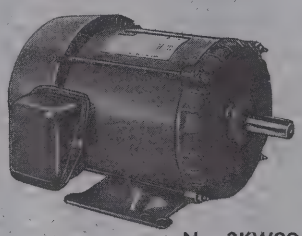
**Finish:** Gray **Brand:** Dayton

Dayton® Wattrimmer

ENERGY RIGHT®

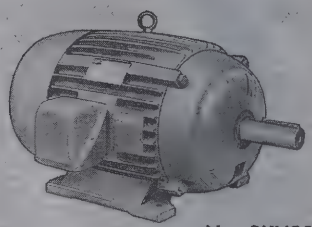
**CAUTION:** **Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

E47479



LR6153

CE



**The Energy Policy Act of 1992**

**The motor products in this offering, frame sizes 143T through 449T, meet/exceed the EPACT 92 legislative efficiency levels.**

**For details of EPACT legislation, see page 6.**

No. 3KW99
182T Frame

No. 3KV93
286T Frame

**Kits for cast-iron motors are available on page 19.**

**Replacement Parts Available**
**1-800-323-0620**

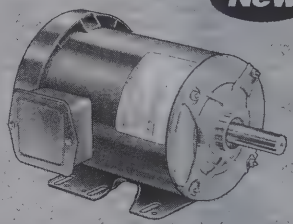
# GENERAL PURPOSE INDUSTRIAL MOTORS

# 3-PHASE HIGH EFFICIENCY TEFC MOTORS

- **140 frames and larger meet or exceed legislated energy standards (EPACT)**
- **Higher efficiency results in lower operating costs**
- **EPACT Motors have improved cooling that results in longer life**
- **Copper windings**



**Typical Uses:** Pumps, fans, blowers, air compressors, conveyors, and other industrial equipment. Designed for general purpose applications in dirty or dusty areas with moderate to high starting torques.
**Bearings:** Ball regreasable on 320-440 frame
**Enclosure:** TEFC
**Mounting:** Rigid
**Ambient:** 40°C
**Protection:** None
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** GE

E47088

No. 4N849
48 Frame

New

No. 4RZ41
143T Frame

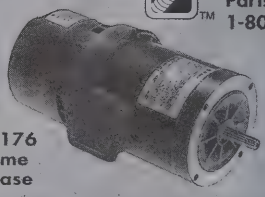
## GE BRAND, 3-PHASE BRAKE MOTORS

**Typical Uses:** For applications requiring braking and holding action at standstill such as conveyors, index mechanisms, machine tools, and commercial and industrial overhead doors.



**Service Factor:** 1.0
**Bearings:** Ball
**Thermal Protection:** None
**Frame:** Rolled Steel
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Brake Voltage:** 230/460
**Finish:** Gray
**Brand:** GE

# 3-PHASE HIGH EFFICIENCY TEFC MOTORS

GENERAL PURPOSE INDUSTRIAL MOTORS

- Meets Nema MG1 Part 30 inverter duty use at 10:1 variable torque and 2:1 constant torque speed range
- Meets NEMA MGI Part 30 inverter duty use at 10:1 variable torque and 2:1 constant torque speed range
- Fully complies with EPACT 92 efficiency standards
- NEMA service factor of 1.25 provides a reserve margin for intermittent overloading or fluctuating (high/low) voltage conditions
- Dual voltage ratings suitable for Part Wind Start on lower voltage
- Usable on 50Hz 190/380V at rated HP and 1.0 service factor
- "CE" mark on nameplate
- 143T/145T frame motors include C-face at no additional cost
- C-face, canopy cap, and brake kits, available below, increase mechanical flexibility

**Typical Uses:** Cooler, more efficient performance on pumps, blowers, air compressors, and farm equipment operating in **non-combustible** dusty, dirty areas.

**Bearings:** Double-shielded, prelubricated ball

**Mounting:** Rigid removable base on 180 frame and above; rigid welded base on 140 frame

**Insulation Class:** F

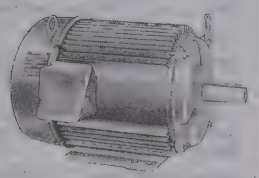
**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CW/CCW

**Finish:** Gray enamel

**Brand:** USEM



**Construction:** 140 frames are rolled steel, 180 frames & up are aluminum

| 6 | 2Z871 | 325.00 | **246.25** | 8.0 |

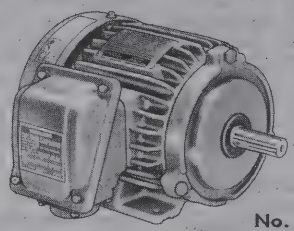
**CAUTION: Not for fans in unattended areas.**

Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.

# GENERAL PURPOSE INDUSTRIAL MOTORS

# 3-PHASE HIGH EFFICIENCY SEVERE DUTY MOTORS

- Energy efficient motors meet or exceed legislated energy standard for the United States and Canada (EPACT)
- Higher efficiency results in lower operating costs
- EPACT motors have improved cooling that results in longer life
- All copper windings
- Oversized gasketed conduit box for ease of installation and connection
- Rigid cast iron frame, conduit box, and fan cover are resistant to harsh environments
- Suitable for 65°C Ambient at 1.0 service factor



**Typical Uses:** Designed for general purpose applications in the most severe (non-explosive) areas with moderate to high starting torques.

**Bearings:** Ball bearings, double shielded on 140-280 frame, regreasable on 320-440 frame motors
**Mounting:** Rigid
**Enclosure:** TEFC—Severe Duty
**Thermal Protection:** None
**Insulation:** Class F
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** GE

(✓) Denotes energy efficient product.

**CAUTION: Not for fans in unattended areas.**

**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

**SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE**

**Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.**

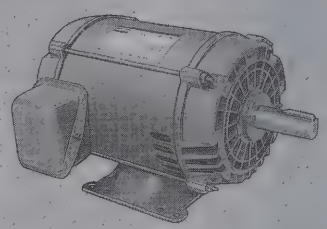
# 3-PHASE PREMIUM EFFICIENCY OPEN DRIPPROOF MOTORS

- 143T frames and larger meet NEMA MG1 Part 31 inverter duty use at 10:1 variable torque and 4:1 constant torque speed range
- Qualify for utility rebate programs
- Increased efficiency leads to lower operating cost and longer life
- 143T frame and larger motors feature Class F insulation system, Class B rise at service factor
- Two-year warranty
- 1.15 to 1.35 service factors provide a reserve margin for intermittent overloading or fluctuating (high/low) voltage conditions

**Typical Uses:** Premium efficiency performance on pumps, fans, blowers, and other industrial equipment.

**Bearings:** Double-shielded ball; open ball with filler caps on 400 frames. Regreasable on frames 250 and larger.

**Mounting:** Rigid welded base
**Thermal Protection:** None
**Windings:** Copper
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton



Dayton® Wattrimmer®

ENERGY RIGHT®

E47479

**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

**The Energy Policy Act of 1992**
**The motor products in this offering, frame sizes 143T through 449T, meet/exceed the EPACT 92 legislative efficiency levels.**
For details of EPACT legislation, see page 6.

**CAUTION: Not for fans in unattended areas.**

**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

## GE BRAND, PREMIUM EFFICIENCY ODP MOTORS

- **Qualify for efficiency rebates**
- **Two-year warranty**

**Typical Uses:** Premium efficiency performance on pumps, fans, blowers, and other industrial equipment in dry, clean, well-ventilated areas.

**Bearings:** Ball

**Thermal Protection:** None

**Insulation Class:** F

**Ambient:** 40°C

**Duty:** Continuous

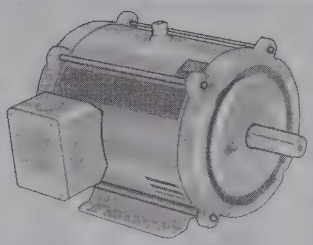
**Rotation:** CW/CCW

**Finish:** Beige

**Brand:** GE Energy $aver

ENERGY SAVER MOTOR

E47479



**Replacement Parts Available**
**1-800-323-0620**

**Repair Service Available**
**Contact Your Local Branch**

**The Energy Policy Act of 1992**

**The motor products in this offering, frame sizes 143T through 449T, meet/exceed the EPACT 92 legislative efficiency levels.**

For details of EPACT legislation, see page 6.

# 3-PHASE PREMIUM EFFICIENCY TEFC MOTORS

- 143T frames and larger meet NEMA MG1 Part 31 inverter duty use at 10:1 variable torque and 4:1 constant torque speed range
- 143T frames and larger feature Class F insulation system, Class B rise at full load
- Premium efficiency motors qualify for utility rebate programs
- Increased efficiency leads to lower operating cost
- Motors run cooler resulting in increased life
- 100% copper windings
- Two-year warranty

**Typical Uses:** Premium efficiency performance on air compressors, conveyors, fans, blowers, machine tools, pumps, and other industrial equipment. For use in **non-combustible**, dusty, dirty environments where 3-phase power is available.

**Bearings:** Double-shielded ball on 56 thru 360 frame. Open ball with filler caps on 400 thru 440 frame. Regreasable 250 thru 440 frame.

**Mounting:** Rigid welded or solid base

**Thermal Protection:** None

**Windings:** Copper

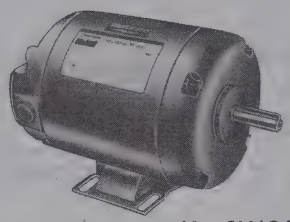
**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CW/CCW (except Nos. 5N282, 5N285, 5N291, and 5N292 are CCW facing shaft end)

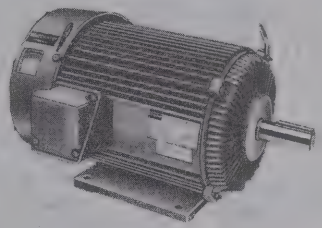
**Finish:** Gray

**Brand:** Dayton



**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

Dayton® Wattrimmer



ENERGY RIGHT®

**The Energy Policy Act of 1992**
The motor products in this offering, frame sizes 143T through 449T, meet/exceed the EPACT 92 legislative efficiency levels.
For details of EPACT legislation, see page 6.

(*) Usable on 200V at 1.0 service factor. (††) NEMA design A; all others are NEMA design B. (#) AL = Aluminum; CI = Cast-Iron.
(‡) Not regreaseable. (**) CCW facing shaft. (✓) Denotes energy efficient product.

**CAUTION: Not for fans in unattended areas.**

Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.

**YOUR PRODUCT SOLUTION RESOURCE...CALL GRAINGER TODAY!**

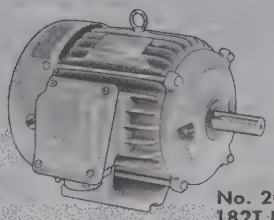
Grainger will supply you with the dependable, brand name products you need to keep your operation running smoothly-plus the solutions you need to keep your operation running more profitably.

# 3-PHASE PREMIUM EFFICIENCY TEFC MOTORS

- **Qualify for efficiency rebates**
- **Two-year warranty**

**Typical Uses:** Premium efficiency performance on air compressors, conveyors, fans, blowers, machine tools, pumps, and other moderate to hard-starting equipment in **noncombustible** dusty, dirty environments where 3-phase power is available.

**Bearings:** Ball
**Mounting:** Rigid
**Thermal Protection:** None
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW (except Nos. 5N999 and 6N034 are CCW facing shaft)
**Finish:** Beige
**Brand:** GE



**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

ENERGY SAVER MOTOR

**The Energy Policy Act of 1992**
**The motor products in this offering, frame sizes 143T through 449T, meet/exceed the EPACT 92 legislative efficiency levels.**
For details of EPACT legislation, see page 6.

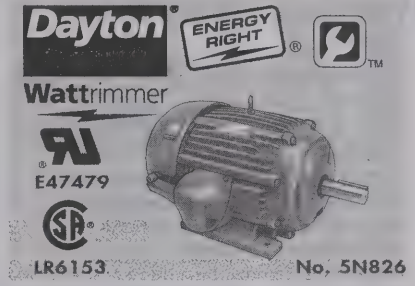
(†) Usable on 200V at 1.0 service factor. (**) CI = Cast-Iron construction. (#) CCW rotation (facing shaft) only. (✓) Denotes energy efficient product.

## UL LISTING AND CSA CERTIFICATION



When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.

# 3-PHASE PREMIUM EFFICIENCY SEVERE DUTY MOTORS

- These motors meet or exceed the EPACT 92 legislated efficiency levels, see page 6 for details
- Class F insulation system, Class B rise at full load
- Meets NEMA MG1 Part 31 inverter duty use at 10:1 variable torque and 4:1 constant torque speed range
- Complete cast-iron construction on 180 frame and above; rolled steel on 140 frames
- 100% copper windings
- Bearing caps supplied on 180 frame and above
- Three-year warranty

**Typical Uses:** Pumps, fans, blowers, compressors, conveyors, and in chemical and processing industries with high humidity, acidic, alkali, or dirty conditions.
**Bearings:** Regreasable double-shielded ball thru 360 frame, open ball on 400 thru 440 frame.
**Mounting:** Rigid
**Enclosure:** TEFC
**Thermal Protection:** None
**Ambient:** 40°C at 1.15 SF; 65°C at 1.0 SF
**Duty:** Continuous
**Finish:** Gray
**Brand:** Dayton

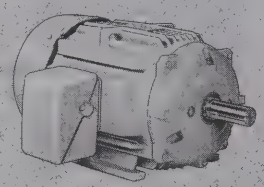
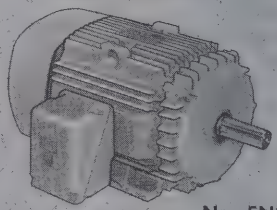
**CAUTION: Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

# 3-PHASE PREMIUM EFFICIENCY SEVERE DUTY MOTORS



- Energy $aver premium efficiency designs
- Suitable for 40°C ambient at 1.15 service factor and 65°C at 1.0 service factor
- Designed for high humidity, acidic, alkali, or dirty (nonexplosive) conditions
- Cast-iron frames and endshields
- Qualify for efficiency rebates
- Supplied with grease fittings
- Three-year warranty

**Typical Uses:** Pumps, fans, blowers, air compressors, conveyors, machinery, and other industrial equipment.
**Bearings:** Ball
**Mounting:** Rigid base
**Enclosure:** TEFC
**Thermal Protection:** None
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Beige
**Brand:** GE



ENERGY $AVER MOTOR

E47088

**The Energy Policy Act of 1992**
The motor products in this offering, frame sizes 143T through 449T, meet/exceed the EPACT 92 legislative efficiency levels.
For details of EPACT legislation, see page 6.

**CAUTION: Not for fans in unattended areas.**

Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.

# 3-PHASE PREMIUM EFFICIENCY IEEE 841 MOTORS

- "Inverter Grade" insulation fully complies with NEMA MG1 Part 31 specifications
- 10:1 variable torque; 5:1 constant torque speed range
- Meet all IEEE-841-1994 specifications
- Cast-iron construction
- Precision balanced rotors—<.08 in./sec. vibration
- "VBX" INPRO/SEAL on the drive end provides superior protection against contaminants
- All bearings are re-greasable
- Five-year warranty
- These motors meet or exceed the EPACT 92 legislated efficiency levels, see page 6 for details

**Typical Uses:** Designed for applications in petro-chemical, pulp and paper, mining, processing, and waste treatment industries.
**Mounting:** Bolted base on 140 frame; cast feet on 180 frame and above
**Enclosure:** TEFC
**Ambient:** 40°C at 1.15 SF; 65°C at 1.0 SF
**Thermal Protection:** None
**Duty:** Continuous
**Finish:** Gray
**Brand:** Dayton

(✓) Denotes energy efficient product.

**CAUTION: Not for fans in unattended areas.**

Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.

# 3-PHASE INVERTER-DUTY OPEN DRIPPROOF AND TEFC MOTORS

- Inverter-grade insulation systems provide dielectric strength to withstand waveform stress
- High performance matches speed/torque requirements for increased system flexibility
- Incorporates premium efficiency designs
- Meets NEMA MG1 Part 31 inverter-duty use at 10:1 variable torque and 5:1 constant torque speed range
- 100% copper windings
- Two-year warranty

**Typical Uses:** Used in adjustable speed applications found in pumps and other air moving devices.

**Bearings:** Double-shielded ball, regreasable on 250 frame and larger

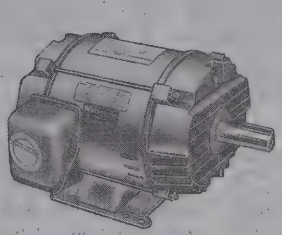
**Mounting:** Rolled steel frames have rigid welded mounting; cast-iron frames have cast feet

**Thermal Protection:** Thermostat

**Ambient:** 40°C

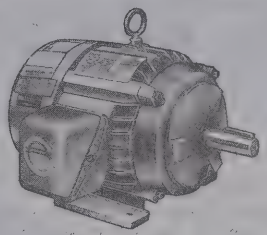
**Duty:** Continuous

**Rotation:** CW/CCW



**Finish:** Gray

**Brand:** Dayton



Dayton®

E47479

**The Energy Policy Act of 1992**
The motor products in this offering, frame sizes 143T through 449T, meet/exceed the EPACT 92 legislative efficiency levels.
For details of EPACT legislation, see page 6.

(*) RS = Rolled Steel construction; CI = Cast-Iron construction.

**CAUTION: Not for fans in unattended areas.**

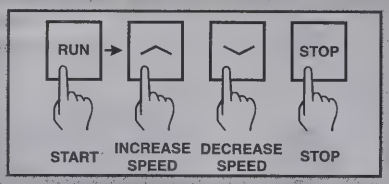
**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

## A NATIONWIDE NETWORK OF BRANCH LOCATIONS

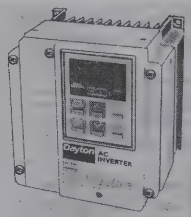
**Across the street or across the country, finding the Grainger branch location nearest you is a snap when you reference our Branch Locations listed in the front of this catalog. We have more than 350 locations, ready to serve you in all 50 states.**

AC DRIVES

# AC ADJUSTABLE FREQUENCY DRIVES



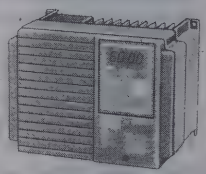
- High starting torque (up to 200%)
- UL Listed electronic motor overload
- Compact size
- Digital keypad (remote mountable)
- LED display
- Up to 16 preset speeds
- "S" curve accel/decel
- Torque limiting
- Easy return to factory settings
- 3-Wire START/STOP control
- Program protection (lock out)



Dayton®

UL® E84642

CSA® 80755

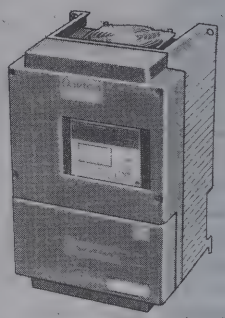


**SIMPLE OPERATION**

No. 4RF82

New

No. 3HX74



**Typical Uses:** Variable speed operation of three-phase motors on pumps, fans, blowers, conveyors, machine tools, and other industrial equipment. **NEMA 1 and NEMA 4 units are not for use in combustible areas. NEMA 1 units should not be used in dusty or wet environments.**

Advanced IGBT "torque vector" PWM control method optimizes motor torque at any frequency. This high performance feature is selectable via the motor auto tuning torque vector functions (except 2M530 thru 2M535).

LED digital display provides indication for running or reference frequency, output current, output voltage, motor synchronous or machine speed

Additional liquid crystal display on Nos. 2M530 thru 2M535 aids in programming, diagnostics, and monitoring.

**Output Volts:** Three-phase, output volts are same as voltage input; Hz adjustable with 60 Hz factory preset limit.

No. 2M530

**Enclosure:** NEMA 1 and NEMA 4

**Protection:**
Ground Fault Protection (inverter only)
Overcurrent
Overvoltage
Undervoltage
Instantaneous Power Failure
Inverter Heatsink Overheating
External Alarm
Short-circuit for Output Terminal
Motor Overload (electronic thermal or relay trip)

**Advanced Programming:**
Output Frequency
Volts/Hz
Torque Boost
Accel/Decel Time
Volt Limit
DC Braking
Auto Restart
Frequency Bias and Gain

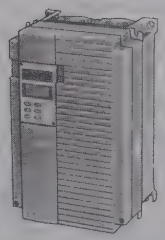
We're the driving force in the motor business.



# AC ADJUSTABLE FREQUENCY DRIVES

**FUJI ELECTRIC** **New**

- **Simple, easy-to-use programming for application flexibility**
- **Self-diagnostics provide shut-off protection and fault failure message**
- **Quick response time provides reliable operation against load fluctuations**

No. 4RG30

No. 5U192

No. 5U201

**Typical Uses:** Designed to provide variable speed operation on AC three-phase motors used to power pumps, fans, blowers, conveyors, and other industrial equipment. **Not for use in combustible, dusty, or wet environments.**

Both single-phase and three-phase designs feature IGBT transistors, electronic automatic reset thermal pretection, and DC and dynamic braking capabilities.

**Nos. 4RG30 thru 4RG39 FVR-C9S AC drives™**, manufactured by Fuji Electric and marketed by GE Fuji Electric, are fully equipped with over 30 configurable motor control functions in a lightweight, compact housing. Designed for use in fans and conveyors, as well as other applications. Units require only power and motor connections to the built-in terminal block for use. Easy-to-follow programming and output frequency settings can be adjusted using the LED keypad panel. Each unit also has a standard frequency setting POT mounted on the face of the drive for quick adjustments. Use these drives even in areas where there are noise-level restrictions. UL and CSA rated.

**Nos. 5U192 thru 5U201 and 4RG15 thru 4RG29 AF-300E$™** offer 95 functions for more advanced applications in higher horsepowers while still offering simple programmability.

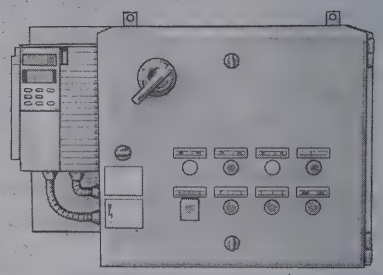
# AC ADJUSTABLE FREQUENCY INTELLIGENT BYPASS PANELS

- **Isolation contactor**
- **Built-in AC line reactor**
- **Line-side circuit breaker**
- **150% starting torque**

**GE Fuji Electric intelligent bypass panels** create a seamless integrated, adjustable frequency drive system. These panels include all the essential hardware in a single, easy-to-use package. Engineered for long-lasting performance and ease of operation, panels feature field-tested General Electric products with a reputation for efficiency and versatility. All AF-300E$ panels include C-2000™ switches, relays, and contactors. Panels also have Spectra RMS™ solid state circuit breakers from General Electric and feature a factory programmed GE Fanuc Series 90™ Micro PLC. UL and UL-C Listed.

**Typical Uses:** Designed to serve manned or unmanned conveyor, pump, HVAC, and other applications. Easily configure the panel for energy efficient motor operation and manual or automatic transfer of the applied motor from the drive power supply to the AC line in the event of a drive fault. Not for use in combustible, wet, or dusty environments.

**Enclosure:** NEMA 1.



**Protection:** Over current, under voltage, over voltage, thermal overload.

**Selectable Functions:** Frequency setting, Torque boost, Jump frequencies, Motor sound adjustment, Base and top frequencies, Slip compensation, Sensorless torque vector control, 2-wire/3-wire control, Automatic deceleration time.

**Mounting:** Wall-mount, except 4RG14 is floor-mount.

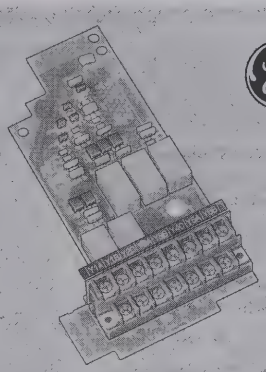
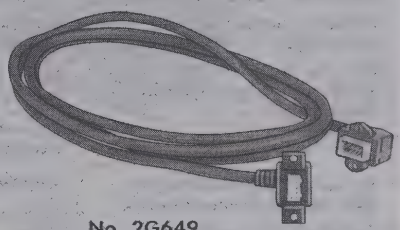
# AC ADJUSTABLE FREQUENCY DRIVES



## INVERTER ACCESSORIES

**Relay unit** for Stock Nos. 5U192 thru 5U201, and 4RG15 thru 4RG29 convert open collector outputs to relay outputs for interface to existing plant equipment.



| No. of Relay Outputs | GE Stock No. | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 5 | A3270 | 2G647 | $496.50 | $451.25 | 1.0 |

**Keypad extension cables** for Stock Nos. 5U181 thru 5U201, and 4RG15 thru 4RG29 for remote mounting provide full operation functionality for removable inverter keypads.

| Cable Lengths | GE Stock No. | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 2 Meter | A3240 | 2G649 | $100.80 | $91.60 | 1.0 |
| 5 Meter | A3241 | 2G651 | 217.65 | 198.00 | 1.0 |
| 10 Meter | A3242 | 2G653 | 260.00 | 236.25 | 1.0 |

No. 2G647

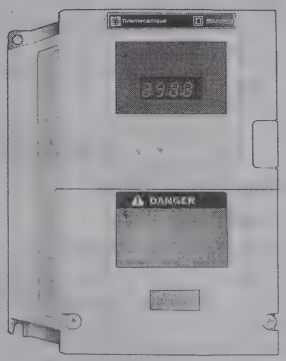
No. 2G649

## AC INVERTERS

- **Sensorless flux vector control**
- **100% torque at 1Hz (1.5% rated speed)**
- **Compact size for added space savings**
- **Meet UL and CSA approval**
- **"CE" marked to meet European directives**
- **Output frequency: 0.5 to 320Hz**
- **Motor protection offered by dynamic calculation of connected motor I2t**
- **Auto tune and self-testing built in**

TYPICAL USES: Variable speed operation of three-phase motors with single phase and three phase input. Sensorless flux vector control automatically calculates optimum motor performance for low-speed, high-starting torque applications. Designed to increase energy savings in material handling, packaging, HVAC, and pump applications. Eliminates the need for mechanical controllers.

**Protection:**



Overbreaking
Overvoltage
Motor thermal overload
Drive thermal overload
Undervoltage

**Selectable Functions:**

Sensorless flux vector
Constant torque
Variable torque
Motor thermal protection
Switching frequency
Ramp up/ramp down
Controlled stop
Preset speeds
Fast stop
Catch on the fly
Built-in PI control
Automatic DC injection braking
Auto restart
PC connection
Loss of follower reference
Input/output assignment
Keypad lockout

# AC ADJUSTABLE FREQUENCY DRIVES AND CAPACITOR-START U-FRAME MOTORS

## AC INVERTERS

Boston Gear ACX and BCX controllers provide a wide range of adjustable speed control of conventional AC motors. Utilizing state of the art microprocessors, surface mount technology, and IGBT power devices, these controllers combine the proper balance of drive features, performance, and economy.

**ACX—Full Featured Model**

- Small, compact NEMA 1 enclosure
- Easy to program and operate from integral digital keypad
- 90 programming parameters
- Password protected with user defined security code
- External isolated analog reference (0-10VDC, 4-20 mA)
- Economical
- 3 digit LED display
- Two-year warranty

**BCX—Basic Model**

- Compact, low profile NEMA 1 enclosure
- Drive set up via pot adjustments
- Adjustable acceleration/deceleration
- Capable of line starting
- Two status LED's indicate power on and fault codes
- Speed pot included
- Low cost
- Two-year warranty

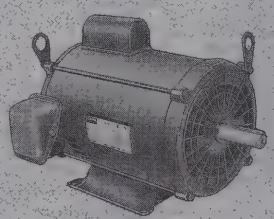
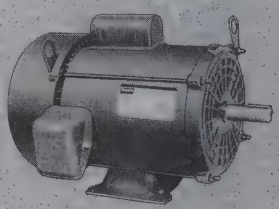
## CAPACITOR-START OPEN DRIPPROOF AND TEFC U-FRAME MOTORS

- Rigid welded base
- Copper windings



**Typical Uses:** Air compressors, machinery, pumps, blowers, and other industrial equipment. TEFC models provide dependable operation in **non-combustible** dusty, dirty areas.



**Type:** Capacitor-start
**Bearings:** Ball
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

# 3-PHASE PREMIUM EFFICIENCY U-FRAME AUTOMOTIVE DUTY MOTORS

- **Super U-frame designs offer the highest efficiencies available today**
- **Meets General Motors 7EQ, 7EHQ, Ford EMI, and Chrysler NPEM 100 automotive duty specifications**
- **Motors are designed to operate well below insulation system limits, resulting in increased life expectancy**
- **Low noise and vibration levels**
- **Meet "special" balance limits for automotive industry levels**
- **Cast-iron construction on 180 frame and above**
- **Two-year warranty**
- **Meets NEMA MG1 Part 31 inverter duty use at 10:1 variable torque and 4:1 constant torque speed range**

**CAUTION:** Refer to page 6 for proper thermal protection and other motor selection information.

**Typical Uses:** For a wide variety of applications where change-out to T-frame motors is cumbersome and difficult. Efficiency ratings will qualify for many rebate programs while not requiring added conversion costs.

Designed to meet automotive manufacturers' specifications, these motors feature rugged construction and advanced electrical design. Ideal for use in industrial, commercial, and institutional applications that need U-frame dimensions.

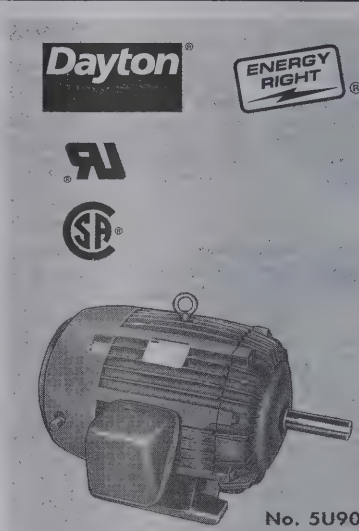
**Bearings:** Double-shielded ball

**Mounting:** Rigid base

**Enclosure:** TENV and TEFC

**Thermal Protection:** None

**Ambient:** 65°C



**Duty:** Continuous

**Finish:** Gray

**Brand:** Dayton

## GRAINGER STOCKS A BROAD LINE OF DAYTON AND GE MOTORS

**Top Performance.** Dayton motors are built to exceed industry standards such as NEMA (National Electrical Manufacturers Association). Used as a replacement motor in a wide variety of applications, each Dayton motor must outperform the best motor it may be called upon to replace, hence "best of the best" performance. You can be confident that the Dayton motor will work as well as, or better than, the motor you are replacing.

**Clearly Identified.** Dayton motors are clearly identified by full fact carton labels and nameplates with wiring diagrams. Maintenance and installation instructions appear in every motor carton.

**Broad Line Offering.** Dayton offers one of the broadest lines of motors in the industry. One brand can be used for nearly all your motor replacement needs.

**Time Proven Performance.** Established in 1937, Dayton has grown to be one of the most dependable names in the motor industry.

**National Recognition.** GE is considered the leading national brand motor with the largest installed customer base. The GE brand is widely known for quality and reliability.

**Clearly Identified.** GE motors are clearly identified by full fact carton labels and nameplates. Easy-to-read wiring diagrams are included.

**Premium Efficiency Leader.** GE has long been recognized as an industry leader in premium efficiency motors with a wide variety of ratings and types to suit many applications.

**Heritage of Excellence.** General Electric is one of the pioneers in the electrical industry with a proud 100 year history dating back to the time of founder Thomas Edison.

**Broad Line Offering.** Grainger now offers over 2400 stock GE brand motors including AC and DC motors from 1/370 HP to 450 HP in Energy $aver™ and standard efficiency designs including severe duty, explosion proof, farm duty, HVAC, and many others.

## THE RIGHT STUFF. RIGHT HERE. RIGHT NOW.

Our branches are conveniently located and stocked with commonly used items from this catalog. If you need it now, call Grainger. To find the branch nearest you, check the Branch Locations listing in the front of this catalog.

# CAPACITOR-START OPEN DRIPPROOF MOTORS

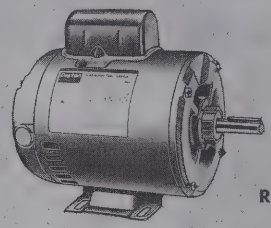
**Typical Uses:** Fans, blowers, pumps, and commercial machinery

**Type:** Capacitor-start

**Bearings:** All-angle sleeve or double-shielded ball

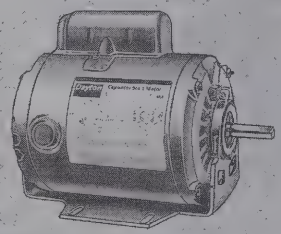
**Ambient:** 40°C

**Duty:** Continuous



**Rotation:** CW/CCW

**Finish:** Gray



**Brand:** Dayton

Dayton®

E47479

No. 5K456

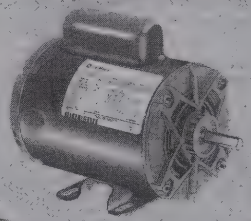
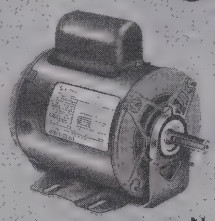
# CAPACITOR-START OPEN DRIPPROOF MOTORS



**Typical Uses:** Fans, blowers, pumps, and commercial machinery.
**Type:** Capacitor-start
**Bearings:** Sleeve or ball
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** GE

Replacement Parts Available
1-800-323-0620



**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

# CAPACITOR-START OPEN DRIPPROOF AND TEFC MOTORS

## A.O. SMITH BRAND, OPEN DRIPPROOF

**Typical Uses:** Fans, blowers, pumps, and commercial machinery
**Type:** Capacitor-start
**Bearings:** Double-shielded ball
**Mounting:** Cradle
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** A.O. Smith

# SPLIT-PHASE OPEN DRIPPROOF MOTORS

- **NEMA 42 frame is supplied with a relay instead of centrifugal switch (relay mounting clip also included)**

**Typical Uses:** Fans, blowers, conveyors, tools, pumps, reducers, and similar moderate-starting torque applications. NEMA 42 frame is more frequently used on business machines, vending machines, printing equipment, door openers, and other applications where a small, compact motor is required.

**Type:** Split-phase
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

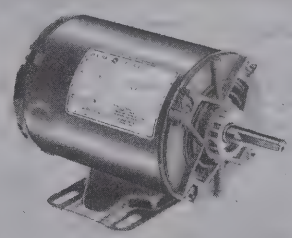
(*) Have nonstandard 1/2" diameter shaft with flat. (#) Two-speed switch No. 2X605 available, see page 3622.
(**) NEMA 48Y frame cradles are notched for mounting in place of 48 or 56 frame cradle.
(†) Supplied with 5/8" diameter shaft bushing . (‡) Ridgid cradle base; similar to cradle base except does not have rubber rings on endshield

We're the driving force in the motor business.

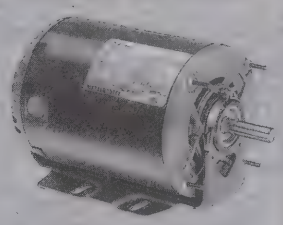
# SPLIT-PHASE OPEN DRIPPROOF MOTORS

**GENERAL PURPOSE COMMERCIAL MOTORS**



**Typical Uses:** Commercial fans, ventilation fans, blowers, and other belt-driven air-moving applications.

**Type:** Split-phase
**Thermal Protection:** None
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** GE



E47479

**CAUTION:**
**Not for fans in unattended areas.**

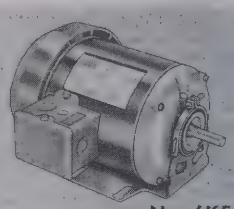
# SPLIT-PHASE TEFC MOTORS

## DAYTON BRAND, SPLIT-PHASE TEFC MOTORS

- **Large conduit box for easy wiring**



**Typical Uses:** Dependable operation in **non-combustible** dusty, dirty areas on pumps, machinery, fans, blowers, conveyors, and other moderate-starting torque applications.

**Type:** Split-phase

**Bearings:** All-angle sleeve or double-shielded ball
**Service Factor:** 1.0
**Thermal Protection:** None
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

# 3-PHASE AND PSC COMMERCIAL CONDENSER FAN AND BLOWER MOTORS

## 3-PHASE COMMERCIAL CONDENSER FAN MOTORS

**Typical Uses:** New and replacement use in 5 to 10 ton and larger commercial outdoor condensers.
**Special Features:** Shaft end is enclosed for shaft-up mounting. Dual voltage. Shaft has flat and keyway 90° apart to fit all commonly used fan blades. Water slinger on shaft.
**Type:** 3-phase
**Bearings:** Ball
**Mounting:** Fit into most existing OEM belly bands. Enclosed shaft endshield for shaft-up mounting.
**Enclosure:** Open air-over
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** B
**Ambient:** Dayton 60°C; GE 65°C
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton and GE

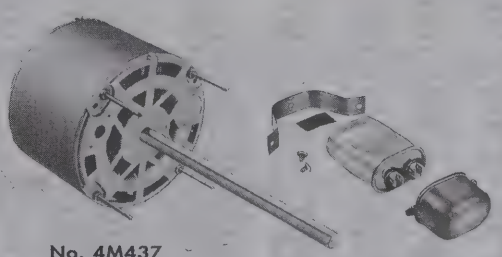
## SINGLE-PHASE 460 VOLT PSC COMMERCIAL BLOWER MOTORS



**Typical Uses:** High efficiency performance in furnace blowers and other shaft-mounted air-over fan and blower equipment.
**Special Features:** 370V capacitor kit included. 60/50 Hz operational.
**Type:** Permanent split capacitor
**Bearings:** Ball
**Mounting:** 3/4" studs
**Enclosure:** Open air-over
**Service Factor:** 1.0
**Thermal Protection:** Auto
**NEMA Frame:** 48YZ (GE 39 frame)
**Insulation Class:** A
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Gray

# SINGLE-PHASE COMMERCIAL PSC CONDENSER FAN MOTORS

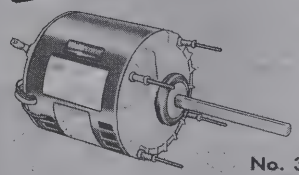
**Typical Uses:** New and replacement use in 5 ton or larger commercial outdoor condensers. Also used in commercial and industrial coolers, furnaces, and other shaft-mounted fan and blower equipment.

**Special Features:** Dual voltage on most ratings. Water slinger on shaft. Drive end is enclosed for shaft-up mounting. Shaft designed to fit all commonly used fan blades.

**Type:** Permanent split capacitor
**Bearings:** Double-shielded ball
**Shaft:** 1/2" dia. shafts have flat; 5/8" dia. shafts have flat and keyway 90° apart
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** B
**Ambient:** 40°C
**Rotation:** CW/CCW
**Brand:** Dayton and GE

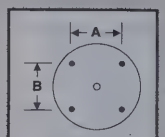
### DAYTON FEATURES

**High Efficiency:** Includes resilient rings for mounting in existing base and with studs for mounting from shaft endshield. Capacitor available separately.



**Standard Efficiency:** Internal conduit box for enclosed wiring connections.

**Cradle Units** feature capacitor mounting hardware and internal conduit box.



### GE FEATURES

Includes resilient rings for mounting in existing base and with studs for mounting from shaft endshield. Shaft flat and keyway 90° apart. Capacitor available separately.

(*) 48YZ NEMA frames have 2¼" resilient ring diameters. (✓) Denotes energy efficient product.

*Bring us your application, we'll deliver the motor.*

# COMMERCIAL AND RESIDENTIAL PSC CONDENSER/HEAT PUMP FAN MOTORS

- Quick reversing leads
- Water slinger on shaft
- Sleeve or double-shielded ball bearings
- 60°C ambient on some standard efficiency models for high temperature environments
- Standard or high efficiency

**Commercial Duty Motors:** Feature higher starting torque than residential duty motors and offer universal replacement. Cooler running temperature ensures longer life performance. Motors include two flats on shaft, 90° apart.

**Typical Uses:** Outdoor air conditioner condensers, refrigeration condensers, and 2-speed models used on heat pumps.

**Shaft Position:**

**Shaft Up**—Shaft endshield and shell are totally enclosed. 3/4" studs on shaft endshield. Opposite endshield open.

**Shaft Up/Down**—Both endshields are totally enclosed with removable drain plugs on each endshield for maximum protection. Can be mounted vertically or horizontally.

**Type:** Permanent split capacitor

**Bearings:** All-angle sleeve or double-shielded ball

**Service Factor:** 1.0

**Thermal Protection:** Auto

**NEMA Frame:** 48YZ (No. 3M295 is 56Z)

**Body Dia.:** 5⅝" (No. 3M295 is 6¾")

**Shaft Dia.:** 1/2 x 6" (No. 3M995 is 1/2 x 5")

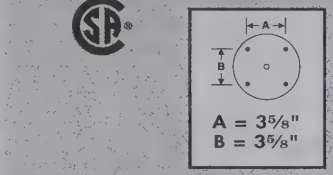
**Ambient:** 40°C or 60°C

**Duty:** Continuous air-over

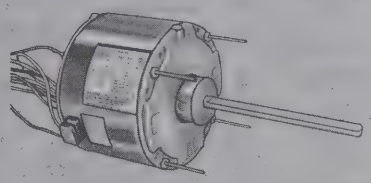
**Rotation:** CW/CCW

**Capacitor:** Required

**Finish:** Gray



**Brand:** Dayton



**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

## SHADED POLE CONDENSER FAN MOTORS

**Typical Uses:** Refrigeration condensers and central air conditioning outdoor condensers; also suited for a wide variety of other air-moving applications such as unit heaters, ventilators, and blowers.

**Special Features:** Includes BX connector

**Type:** Shaded pole

**Bearings:** All-angle sleeve

**Mounting:** Cradle base

**Service Factor:** 1.0

**Enclosure:** Open air-over

**Thermal Protection:** Auto

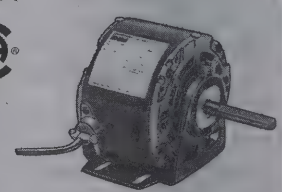
**Insulation Class:** B

**NEMA Frame:** 42

**Body Diameter:** 5"

**Shaft Dimensions:** 1/2 x 2 1/2"

**Ambient:** 40°C



**Duty:** Continuous air-over

**Rotation:** CCW facing shaft

**Finish:** Gray

**Brand:** Dayton

**ENERGY SAVING PRODUCTS FOR HOME, FARM, AND INDUSTRY**

Including blowers, fans, furnaces, heaters, lighting, motors, controls, thermostats, water heaters, and other items. See Index under Energy Saving Products.

*Bring us your application, we'll deliver the motor.*

# COMMERCIAL AND RESIDENTIAL PSC CONDENSER/HEAT PUMP FAN MOTORS

**Commercial Duty Motors:** Feature higher starting torque than residential duty motors and offer universal replacement. Cooler running temperature ensures longer life performance. Motors include two flats on shaft, 90° apart.

**Typical Uses:** Outdoor air conditioner condensers, refrigeration condensers. Two-speed models used on heat pumps.

**Type:** Permanent split capacitor

**Bearings:** All-angle sleeve or prelubricated ball

**Service Factor:** 1.0

**Thermal Protection:** Auto

**NEMA Frame:** 48YZ (or GE 39)

**Body Diameter:** 5⅝"

**Shaft Dimensions:** 1/2 x 6"

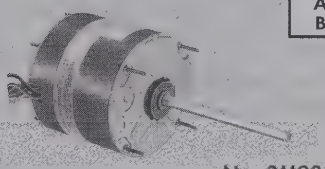
**Duty:** Continuous air-over

**Rotation:** CW/CCW (except No. 4M342 is CW)

**Capacitor:** Required

**Finish:** Gray

**Brand:** GE



**Shaft Up**—Shaft endshield is enclosed and shell is totally enclosed. Minimum 1/2" studs on shaft endshield. Opposite endshield open.

**Shaft Down**—Endshield opposite shaft is enclosed. Drain hole in shaft end for drain condensation.

**Shaft Up/Down**—Both endshields are totally enclosed with removable drain plugs on each for maximum protection. Minimum 1/2" studs on both endshields. Mount vertically or horizontally.

(*) 60/50 Hz. (†) Features rainshield, 5/8 x 4" shaft, open enclosure, 6¾" body diameter, and band mount. (✓) Denotes energy efficient product.

HELPFUL GUIDES TO TERMINOLOGY AND TECHNICAL DATA ARE PROVIDED FOR MANY OF OUR PRODUCTS.
SEE PAGES AT BACK OF CATALOG

# ROOM AIR CONDITIONER MOTORS

**Typical Uses:** Room air conditioners and through-the-wall units. Also adaptable to other shaft-mounted fan and blower applications.

**Special Features:** All models have capacitor mounting holes in shell except No. 4M320.

**Type:** Permanent split capacitor

**Bearings:** All-angle sleeve (except No. 4M320 is ball)

**Mounting:**

A Stud mount has four studs on lead end

B Cradle with four studs

C Resilient ring opposite lead end with four studs on lead end. Includes length adapter kit.

**Enclosure:** Open air-over (except No. 4M320 is open dripproof)

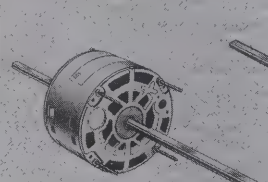
**Service Factor:** 1.0

**Thermal Protection:** Auto

**NEMA Frame:** 42YZ, 5" dia. (GE 29 frame); 48YZ, 5⅝" dia. (GE 39 frame); 56YZ, 6⅜" dia.

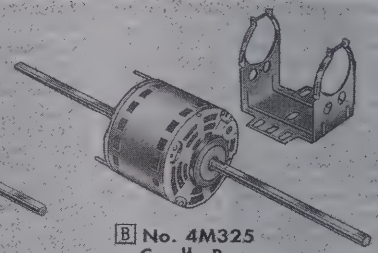
**Ambient:** 40°C

**Duty:** Continuous air-over

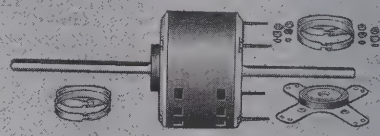


**Finish:** Gray

**Brand:** GE



ENERGY SAVER MOTOR



See Chart Below for Dimensions

A No. 4M321 Stud Mount

B No. 4M325 Cradle Base

C No. 3M782 Resilient Rings and Studs Includes Adapter Kit

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

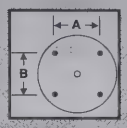
# ROOM AIR CONDITIONER MOTORS

**Typical Uses:** Room air conditioners, evaporative coolers, remote fan coil units, and other shaft-mounted fan and blower applications.
**Type:** Shaded pole
**Bearings:** All-angle sleeve
**Mounting:**
[A] Resilient ring mount with four 10-32 tapped holes
[B] Resilient rings with four extended studs and length adapter kit
[C] Cradle base with four studs
**Enclosure:** Open air-over
**Service Factor:** 1.0
**Thermal Protection:** Auto
**NEMA Frame:** 42YZ, 5" dia (GE 29 frame); 48YZ, 5⅝" dia (GE 39 frame)
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CCW facing lead end
**Finish:** Gray enamel
**Brand:** GE



E46035

[A] Resilient Ring

[B] Resilient Ring with Length Adapter Kit

[C] Resilient Cradle

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

# ROOM AIR CONDITIONER MOTORS

## DAYTON BRAND, PSC, HIGH EFFICIENCY

**Typical Uses:** High efficiency performance in room air conditioners and fan coils. Also adaptable to other shaft-mounted fan and blower applications.
**Special Features:** Capacitor mounting holes in shell. Double shaft.
**Type:** Permanent split capacitor
**Bearings:** All-angle sleeve
**Mounting:** Resilient ring on lead-end endshield; four studs out opposite endshield
**Service Factor:** 1.0
**Enclosure:** Open air-over
**Thermal Protection:** Auto
**NEMA Frame:** 48YZ
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CCW facing lead end
**Finish:** Gray
**Brand:** Dayton

## DAYTON BRAND, PSC, HIGH EFFICIENCY

**Typical Uses:** High efficiency performance in fan coil heating/air conditioning, furnace blowers, unit heaters, and other shaft-mounted fan/blower applications.
**Special Features:** Mounted capacitor with protective boot. Double shaft.
**Type:** Permanent split capacitor
**Bearings:** All-angle sleeve
**Mounting:** Cradle base
**Enclosure:** Open air-over
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** B
**NEMA Frame:** 42YZ
**Body Diameter:** 5"
**Shaft Dimensions:** 1/2 x 9¼" each with full flat
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CCW facing lead end
**Finish:** Gray enamel
**Brand:** Dayton

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

## PSC, HIGH EFFICIENCY, TEAO, UNIVERSAL OEM REPLACEMENT

**Typical Uses:** High efficiency performance as universal replacements for original motors used in specific brands of air conditioners, fan coil units, and unit heaters. Also used for resilient ring, base, or band-mounted fan and blower applications.
**Special Features:** Contractor friendly. Studs are 1½" at both ends. Each shaft is 1/2 x 6" long. Capacitor mounting holes in shell, 26" color-coded leads.
**Type:** Permanent split capacitor
**Bearings:** All-angle sleeve
**Service Factor:** 1.0
**Enclosure:** Totally enclosed air-over
**Thermal Protection:** Auto
**Insulation Class:** A (except No. 4M022 is B)
**NEMA Frame:** 48YZ
**Body Diameter:** 5⅝"
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CCW facing lead end
**Finish:** Gray
**Brand:** Dayton

## PSC, OPEN AIR-OVER, 2 AND 3 SPEED

**Typical Uses:** Room air conditioners, fan coil console units, packaged heat pumps, and other double shaft and shaft-mounted fan and blower applications.
**Special Features:** Supplied with capacitor and resilient mounting base.
**Type:** Permanent split capacitor
**Bearings:** All-angle sleeve
**Mounting:** Cradle base
**Enclosure:** Open air-over
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** A
**Ambient:** 40°C
**Duty:** Continuous air-over
**Finish:** Gray
**Brand:** Dayton

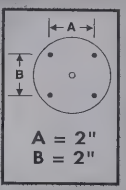
# ROOM AIR CONDITIONER MOTORS

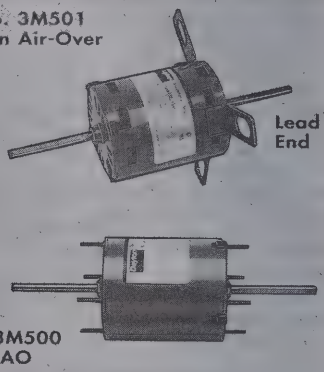
## PSC, OPEN AND TEAO, 2 AND 3 SPEED

**Typical Uses:** Open motor is replacement for Frigidaire, Carrier, and Keeprite room air conditioners and is supplied with three mounting brackets welded to body. TEAO motor is replacement for Whirlpool, Sears, and Quiet Kool room air conditioners and is supplied with studs for mounting from either endshield.



**Special Features:** Capacitor and mounting hardware available separately. Double shaft.

**Type:** Permanent split capacitor



**Bearings:** All-angle sleeve
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** B
**Body Diameter:** 3.3"
**Ambient:** 40°C

## A.O. SMITH BRAND, HALO MOUNT, PSC, DIRECT OEM REPLACEMENT MOTORS

**Typical Uses:** Original equipment replacement motor for many Halo mount room air conditioner designs (See Original Equipment Motor Replacement Guide).

**Type:** Permanent split capacitor

**Bearing:** All-angle sleeve

**Enclosure:** TEAO

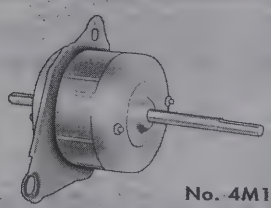
**Service Factor:** 1.0

**Thermal Protection:** Auto

**NEMA Frame:** 42

**Ambient:** 40°C

**Duty:** Continuous air-over



**Rotation:** CCW at lead end

**Finish:** Black epoxy

**Brand:** A.O. Smith

A.O.SMITH

E47479 LR22132

No. 4M148

(*) Motors designed to operate on 208V. (†) No. 4M148 requires a 7.5 MFD capacitor on 208V.

*Bring us your application, we'll deliver the motor.*

# HIGH EFFICIENCY PSC DIRECT-DRIVE FURNACE BLOWER MOTORS

**Typical Uses:** High efficiency performance on furnace blowers and other air-over shaft-mounted fan and blower equipment.

**Type:** Permanent split capacitor

**Bearings:** All-angle sleeve (except No. 3M881 has ball)

**Mounting:** 2½" diameter resilient rings

[A] Includes flexible mounting bracket and capacitor mounting hardware. Capacitor mounting holes in shell.

[B] Includes 4 mounting studs and capacitor with mounting hardware. Capacitor mounting holes in shell.

[C] Resilient ring.

[D] Resilient ring with studs.

**Enclosure:** Open air-over

**Service Factor:** 1.0

**Thermal Protection:** Auto

**Insulation Class:** A (except Nos. 3M857 and 3M881 are B)

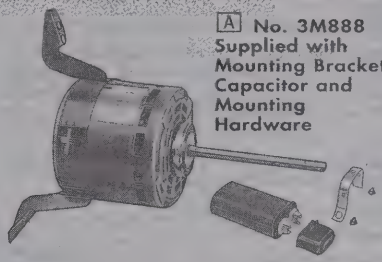
**NEMA Frame:** 48YZ

**Body Diameter:** 5⅝"

**Ambient:** 40°C

**Duty:** Continuous air-over

**Finish:** Gray enamel



**Brand:** Dayton

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

# HIGH EFFICIENCY PSC DIRECT-DRIVE FURNACE BLOWER MOTORS

**Typical Uses:** High efficiency performance in furnace blowers. Also for other air-over shaft-mounted fans and blowers.

**Special Features:** Capacitor and mounting hardware available separately. Capacitor mounting holes in shell. Quick reversing leads on CW/CCW models.

**Type:** Permanent split capacitor

**Bearings:** All-angle sleeve (except Nos. 4M356 and 4M357 are ball)

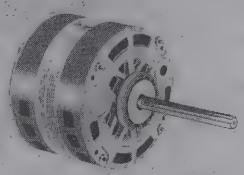
**Enclosure:** Open air-over

**Service Factor:** 1.0

**Thermal Protection:** Auto

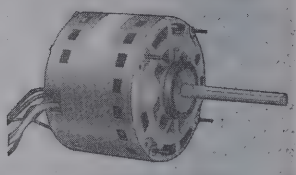
**NEMA Frame:** 42YZ, 5" dia. (GE 29 frame); 48YZ, 5⅝" dia. (GE 39 frame); 56YZ, 6¾" dia.

**Ambient:** 40°C



**Duty:** Continuous air-over

**Finish:** Gray



**Brand:** GE

# COMMERCIAL AND RESIDENTIAL DUTY DIRECT-DRIVE BLOWER MOTORS

- **Quick reversing leads on CW/CCW models**
- **Capacitor and mounting hardware available separately**
- **Capacitor mounting holes in shell**

**Commercial Duty Motors:** Feature higher starting torque than residential duty motors and offer universal replacement. Cooler running temperature ensures longer life-performance.

**Typical Uses:** Direct-drive furnace blowers, unit heaters, air conditioners, and many other shaft-mounted fan and blower applications.

**Type:** Permanent split capacitor

**Bearings:** All-angle sleeve

**Mounting:** Resilient ring

**Enclosure:** Open air-over

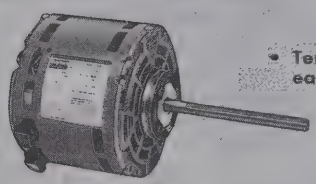
**Service Factor:** 1.0

**Thermal Protection:** Auto

**NEMA Frame:** 48YZ

**Body Diameter:** 5⅝"

**Ambient:** 40°C



**Duty:** Continuous air-over

**Finish:** Gray enamel

**Brand:** Dayton

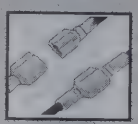
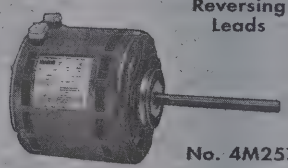
## PSC, OPEN AIR-OVER, 4 SPEED

**Contractor Friendly Features**



- **Versatile, strong, easy to install and adjust**
- **Four speeds with external speed selection**
- **Resilient mounting rings**
- **Quick reversing leads**
- **Fine-tune air delivery and rotation without major reconnection**
- **Four ratings replace 85% of all motors found in residential furnaces; no need for expensive one-on-one replacements**

**Typical Uses:** Wide variety of air-moving uses such as direct-drive furnace blowers, unit heaters, air conditioners, air handlers, and many other shaft-mounted fan and blower applications.



**Special Features:** Unique method of quick and easy speed selection. Quick reversing leads. Capacitor sold separately.
**Type:** Permanent split capacitor
**Bearings:** All-angle sleeve
**Mounting:** Resilient rings or belly band
**Enclosure:** Open air-over
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** B
**NEMA Frame:** 48YZ
**Body Diameter:** 5⅝"
**Shaft Dimensions:** 1/2 x 5"
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

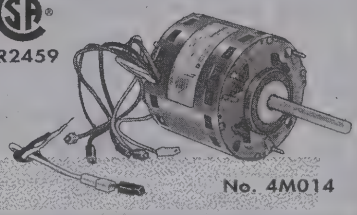
# HIGH EFFICIENCY PSC AND SHADED POLE DIRECT-DRIVE FURNACE BLOWER MOTORS



## GE BRAND, SHADED POLE, OPEN AIR-OVER, 4 SPEED

**Typical Uses:** Furnace blowers. Also used for other air-over shaft-mounted fan and blower equipment.
**Special Features:** Capacitor and mounting hardware for PSC models available separately. Capacitor mpounting holes in shell.
**Type:** Permanent split ccapacitor or shaded pole
**Bearings:** All-angle sleeve
**Mounting:** Resilient rings and studs (except No. 3M862 has resilient rings only)
**Service Factor:** 1.0
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** PSC models are CW/CCW; shaded pole models are CW facing shaft
**Finish:** Gray

# DIRECT-DRIVE FURNACE BLOWER MOTORS

- **Welded bracket**
- **Quiet operation**
- **Quick reversing leads on PSC models**

**Typical Uses:** Exceptionally quiet operation on shaft-mounted blowers with 9 or 10" diameter wheels.

**Special Features:** Torsion-flex mounting effectively isolates and prevents torsional vibrations from reaching the blower housing and causing noise. Capacitor and mounting hardware available separately for PSC motors.

**Type:** Permanent split capacitor or shaded pole

**Bearings:** All-angle sleeve

**Mounting:** Three torsion-flex mounting brackets welded to motor shell

**Enclosure:** Open air-over

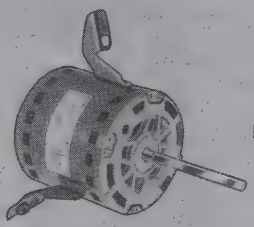
**Service Factor:** 1.0

**Thermal Protection:** Auto

**Insulation Class:** PSC models are B; shaded pole models are A

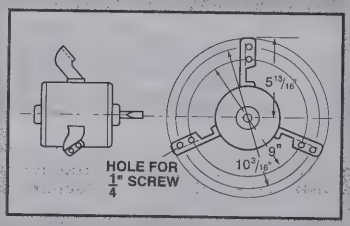
**NEMA Frame:** 42YZ, 5" dia. (GE 29 frame); 48YZ, 5⅝" dia. (GE 39 frame)

**Ambient:** 40°C



**Duty:** Continuous air-over

**Rotation:** PSC models are CW/CCW with quick reversing leads; shaded pole models are CW facing shaft



**Finish:** Gray

# DIRECT-DRIVE FAN AND BLOWER MOTORS

## DAYTON BRAND, PSC, HIGH EFFICIENCY

**Typical Uses:** High efficiency performance in furnace blower, unit heater, ventilators, and other shaft-mounted fan and blower applications.
**Special Features:** Sturdy steel case with open lamination design.
**Type:** Permanent split capacitor
**Bearings:** All-angle, self-aligning sleeve
**Mounting:** Resilient rings with studs
**Enclosure:** Open air-over
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** B
**NEMA Frame:** 42YZ
**Body Diameter:** 5"
**Shaft Dimensions:** 1/2 x 5¼" with full flat
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Gray enamel

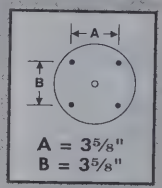
## GE BRAND, PSC, HIGH EFFICIENCY & 3-PHASE TRANSFORMER COOLING FAN MOTORS



**Typical Uses:** Specifically designed for use on outdoor transformer cooling fans.
**Special Features:** Stainless steel shaft and 60/50 Hz operation.
**Type:** Permanent split capacitor
**Bearings:** Double-sealed ball bearings
**Mounting:** Rigid welded base on Nos. 5U267 and 5M600; rigid welded base with studs on No. 5U268
**Enclosure:** TEAO
**Thermal Protection:** Auto
**Insulation Class:** B
**Ambient:** 65°C
**Duty:** Continuous air-over
**Rotation:** CCW facing shaft
**Finish:** Gray
**Brand:** GE

# DIRECT-DRIVE FAN AND BLOWER MOTORS

**Typical Uses:** Room air conditioners, unit heaters, condensers, furnace blowers, and a wide range of other shaft-mounted fan and blower equipment.
**Special Features:** Operable on 60/50 Hz.
**Type:** Shaded pole
**Bearings:** All-angle sleeve
**Mounting:**
[A] Resilient rings and four No. 10-32 holes
[B] Resilient rings and 3/4" studs
[C] Resilient rings
**Enclosure:** Open air-over
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** A (except Nos. 4M288, 4M430, 4M434, 4M467, and 4M469 are B)
**NEMA Frame:** 42YZ, 5" dia. (GE 21/29 frame); 48YZ, 5⅝" dia. (GE 39 frame)
**Ambient:** 40°C
**Duty:** Continuous air-over
**Finish:** Gray
**Brand:** GE

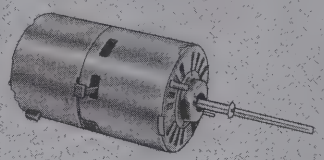
# DRAFT BOOSTERS AND MOBILE HOME BLOWER MOTORS

## DRAFT BOOSTER SWITCH MOTORS, SINGLE SPEED

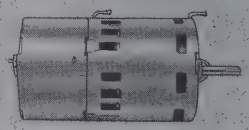
- **Single Pole, Single Throw switch configuration**
- **120VA at 120VAC-pilot duty**
- **16" Auxiliary leads on all but No. 1D090**

Typical Uses: Replacements for draft booster and flue exhaust switch motors in specific brands of furnaces, such as Adams, Roberts Gordon, Wayne Home, J. Zink, Coleman, and Carrier.



Also used on other shaft-mounted blower applications where auxiliary equipment needs to be turned on/off when motor develops full operating speed or when motor is deenergized and speed drops (switch not available on No. 1D090).

**Special Features:** Includes centrifugal safety switch on all but No. 1D090



**Type:** Shaded pole or permanent split capacitor

**Service Factor:** 1.0
**Body Diameter:** 3.3"
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray enamel
**Brand:** Dayton

## MOBILE HOME FURNACE BLOWER MOTORS

**Typical Uses:** Replacements for original equipment motor in mobile home furnaces.
**Special Features:** Nos. 3M663 and 3M665 are used in Coleman furnaces; resilient rings not supplied since motors are generally mounted in original belly band. No. 3M664 is for Lear-Siegler furnaces; resilient rings supplied for mounting in existing base.
**Type:** Shaded pole
**Bearings:** All-angle, self-aligning sleeve
**Enclosure:** Open air-over

**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** A
**NEMA Frame:** 42YZ
**Body Diameter:** 5"
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW facing shaft
**Finish:** Gray enamel
**Brand:** Dayton

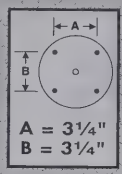
# UNIT HEATER BLOWER MOTORS AND HOT WATER CIRCULATOR PUMP MOTORS

## GE BRAND, PSC UNIT HEATER BLOWER MOTORS

**Typical Uses:** Unit heaters and other shaft-mounted fan and blower equipment in dusty, dirty, **noncombustible** environments.
**Special Features:** Operable on 60/50 Hz.
**Type:** Permanent split capacitor
**Bearings:** Prelubricated ball or sleeve
**Mounting:**
A Resilient ring with holes
B Resilient ring with studs, capacitor and length adapter kit included
C Cradle base with studs. Capacitor, and mounting kit included. Mounting base holes are 1⅞ x 4¹³⁄₁₆"
**Enclosure:** TEAO
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** A
**Body Diameter:** 42YZ, 5" dia. (GE 29 frame); 48YZ, 5⅝" dia. (GE 39 frame)
**Shaft Dimensions:** 42YZ, 3/8 x 1½"; 48YZ, 1/2 x 5"
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** GE



**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

# HOT WATER CIRCULATOR PUMP MOTORS

**Typical Uses:** Exact replacement motors complete with mounting brackets to replace specific motors on Bell & Gossett, Armstrong, and Teel brand circulator pumps.

Certain models require a coupler assembly for proper Bell & Gossett replacement. See page 3274 for coupling ordering information.

**Special Features:** All units have exact performance and mechanical interchangeability with the OEM motor.

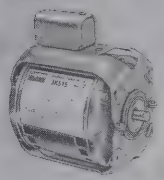
**Type:** Split-phase, capacitor-start, or 3-phase

**Mounting:** Resilient bracket, ring, and C-face

**Enclosure:** Open dripproof

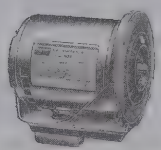
**Ambient:** 50°C, except Nos. 3N850 and 3N824 are 40°C

**Duty:** Continuous



**Finish:** Red or gray enamel

**Brand:** Dayton



**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

(†) No. 6K521 fits old style bracket. (*) Coupling assembly required for proper Bell & Gossett replacement; see page 3274.
NOTE: To ensure correct motor selection, measure the bolt circle of old unit.

# FLANGE-MOUNT OIL BURNER MOTORS

**Typical Uses:** NEMA oil burner flange for direct-coupling to domestic oil burners. Also widely used for replacements in applications where a NEMA 48M, 48N, or 56N flange mounting is required.

**Special Features:** Dayton and GE models feature quick-change reversing terminals.

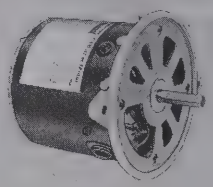
**Type:** Split-phase or capacitor-start

**Service Factor:** 1.0

**Thermal Protection:** Manual reset

**Ambient:** 40°C

**Duty:** Continuous



**Rotation:** CW/CCW (except No. 3K036 is CCW facing shaft)

**Finish:** Black

**Brand:** Dayton and GE

(*) 24" long #18 SO, 2-conductor cord out of shell at 11 o'clock position. (†) No. 3K036 is a direct replacement for Beckett. (‡) Capacitor-start.

**CAUTION: Not for fans in unattended areas.**

Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.

# EVAPORATIVE COOLER MOTORS

## SPLIT-PHASE, MOISTURE-RESISTANT, SINGLE, 2, AND 3 SPEED

**Typical Uses:** Evaporative coolers, pumps, and other devices in high moisture environments.

**Special Features:** Moisture-resistant features include corrosion-resistant rotor core, internally and externally painted shell, finished hardware, and nylon actuator bracket.

**Type:** Split-phase

**Bearings:** All-angle sleeve

**Mounting:** Cradle base

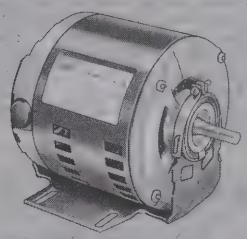
**Enclosure:** Open dripproof

**Ambient:** 40°C

**Insulation Class:** B

**Thermal Protection:** Auto

**Duty:** Continuous



**Rotation:** CW/CCW

**Finish:** Gray

**Brand:** Dayton

## SPLIT-PHASE AND CAPACITOR-START, SINGLE AND 2 SPEED

**Typical Uses:** Evaporative cooler fans and blowers. Use on other applications voids warranty.

**Special Features:** All copper windings. Corrosion resistant internal parts. Thrubolts on endshields facilitate easy access for servicing internal components.

**Type:** Split-phase or capacitor start

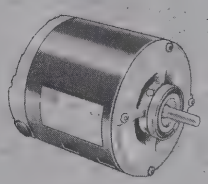
**Bearings:** All-angle sleeve

**Enclosure:** Open dripproof

**Thermal Protection:** Auto

**Insulation Class:** B

**Ambient:** 40°C



**Duty:** Continuous

**Finish:** Gray

# DIRECT OEM REPLACEMENT MOTORS

Here, and on the next 11 pages, you will find OEM replacement motors listed alphabetically by OEM and then horsepower. All motors feature automatic thermal protection (except Nos. 4M246 and 4M247 are impedance protected). All are recognized by UL for construction: Dayton E47479 and GE E46035 under the Motor Component Recognition Program. CSA Certified. 40°C ambient. Gray finish.

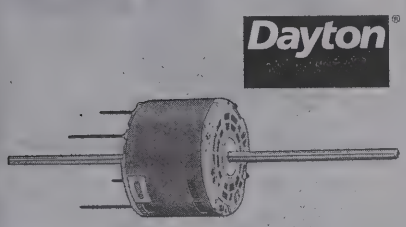
OEM REPLACEMENT INDEX

Brand ..... Page No.

A No. 4M222
Shaded pole roof ventilator and fan motor

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

B No. 4M002
PSC condenser fan motor



## SPECIFICATIONS AND

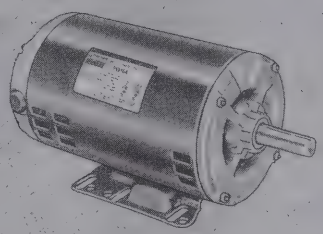
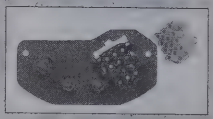
# 3-PHASE COMMERCIAL ROOFTOP BELT-DRIVE FAN AND BLOWER MOTORS

## 3-PHASE OPEN DRIPPROOF, RIGID WELDED BASE



### CONTRACTOR FRIENDLY™ FEATURES

- **Three posts replace line leads for quick and easy wiring**
- **Quick voltage change plugs change voltage without major reconnection**
- **Copper windings**



**Typical Uses:** New and replacement use in 5 to 15 ton and larger commercial outdoor condensers.
**Special Features:** Quick voltage changing plug for ease of installation. Dual voltage. Water slinger on shaft.
**Type:** 3-phase
**Bearings:** Sealed ball
**Mounting:** Rigid welded base
**Enclosure:** Open dripproof
**Thermal: Protection:** Auto
**Insulation:** Class: B
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

## 3-PHASE OPEN DRIPPROOF, CRADLE BASE

- **NEMA service factors up to 1.35 provide a reserve margin for intermittent overloading or fluctuating (high/low) voltage conditions**
- **Operable on 60/50 Hz at same HP rating and service factor**
- **NEMA design B**

**Typical Uses:** Pumps, fans, blowers, machine tools, air compressors, and other moderate to hard-starting applications where 3-phase power is available.
**Type:** 3-phase
**Bearings:** Double-shielded ball
**Mounting:** Cradle base
**Enclosure:** Open dripproof
**Windings:** Copper
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

## CAPACITOR-START, OPEN DRIPPROOF, SINGLE AND 2 SPEED

- **Quick connect terminals**
- **Electrically reversible**
- **Copper windings**
- **Tri-voltage models operate on all three voltage systems without de-rating**

**Typical Uses:** Designed for use on exhaust fans, belt-driven industrial blowers, and ventilators that require higher starting torque, lower starting amps, and smooth, quiet starting and running characteristics.

**Special Features:** Single speed motors meet NEMA performance requirements at all voltages.

Two speed models are specifically designed for diminishing torque, air-moving applications, such as belted or direct-drive fans and blowers.

**Type:** Capacitor-start

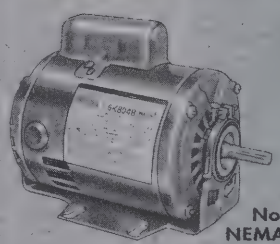
**Bearings:** All-angle sleeve or double-shielded ball

**Mounting:** Cradle base

**Thermal Protection:** Auto

**Ambient:** 40°C

**Duty:** Continuous



**Rotation:** CW/CCW

**Finish:** Gray

**Brand:** Dayton

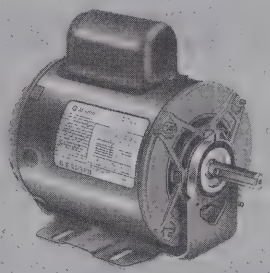
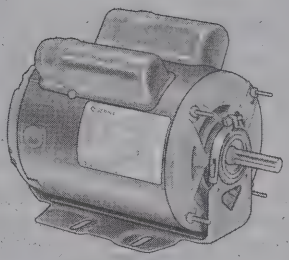
# BELT-DRIVE FAN AND BLOWER MOTORS



**Typical Uses:** Belt-drive furnace blowers, exhaust fans, circulating fans, and other similar belt-driven applications where a motor with smooth, quiet starting and running characteristics is desired.

**Special Features:** Single speed motors meet NEMA performance requirements at 115/208-230V, 60 Hz and are capable of operating on a 208V system. Serv-S-Line® models have studs that extend out shaft endshield for mounting fan guard.



Two speed models are specifically designed for diminishing torque, air-moving applications, such as belted or direct-drive fans and blowers.

**Type:** Capacitor-start, single phase
**Bearings:** Prelubricated ball
**Enclosure:** Open dripproof
**Thermal Protection:** Auto
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray

### LIBRARY OF TECHNICAL MANUALS

Helpful reference books for the tradesman, student, and homeowner. Topics cover electricity, electric motors, welding, plumbing, refrigeration, air conditioning, pneumatics, hydraulics, and much more. See Index under Books, Technical.

# SPLIT-PHASE BELT-DRIVE FAN AND BLOWER MOTORS

**Typical Uses:** Fans, blowers, whole-house fans, air circulators, and air coolers where a quiet running motor is required.

**Special Features:** NEMA service factors of 1.25 to 1.4 are needed when intermittent overloading or fluctuating (high/low) voltage conditions may occur.

NEMA 42 frame is supplied with a relay and relay mounting clip instead of centrifugal switch.

NEMA 48Y frame cradles are notched for mounting in place of 48 or 56 frame cradle.

NEMA 56Z frame motors feature 1/2 x 1½" shaft with flat and are supplied with a 5/8" diameter shaft bushing.

Two speed models are specifically designed for diminishing torque, air-moving applications, such as belted or direct-drive fans and blowers.

**Commercial Duty Motors:** Feature higher starting torque than residential duty motors. Cooler running temperature ensures longer life performances.

**Type:** Split-phase, single phase

**Bearings:** All-angle sleeve or double-shielded ball

**Mounting:** Cradle base

**Thermal Protection:** Auto

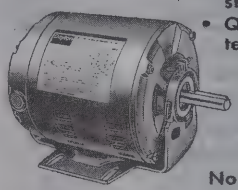
**Shaft Diameters:** NEMA 42, 3/8"; NEMA 48, 1/2", NEMA 56, 5/8"

**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CW/CCW

**Finish:** Gray except Nos. 3K771, 6K778, and 3K772, which are black



**Brand:** Dayton

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

(*) Has extended studs out shaft endshield for mounting fan guard. 4 3/16" OC. (†) Supplied with 5/8" dia. shaft bushing. (‡) Two-speed switch No. 2X605 available on page 3622.

**CAUTION: Not for fans in unattended areas.**

**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

## WHOLE-HOUSE/MOBILE FAN MOTORS

- **Quick connect terminal board for easy wiring on 1/3 HP models**
- **Heavy-duty 12 gauge steel base**

**Typical Uses:** Replacement of original single and two speed belt-drive motors. Also suitable for use in other belt-drive fan and blower applications.

**Special Features:** On 48 frame models, shaft extends from lead end so motor can be mounted and wired without lead interference that may occur in some fans.

Two speed models are specifically designed for diminishing torque, air-moving applications, such as belted or direct-drive fans and blowers. Two-speed switch No. 2X605 available, see page 3622.

**Type:** Split-phase, single phase

**Bearings:** All-angle sleeve or double-shielded ball

**Mounting:** Cradle base

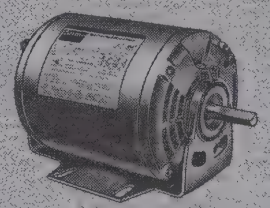
**Enclosure:** Open dripproof

**Service Factor:** 1.0

**Thermal Protection:** Auto

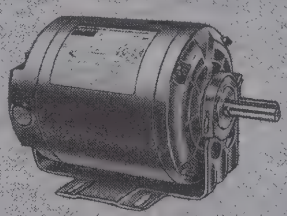
**Ambient:** 40°C

**Duty:** Nos. 3K384, 3K386, and 3K371 are continuous; **No. 3K372 is continuous air-over**



**Rotation:** CW/CCW

**Finish:** Gray



**Brand:** Dayton

# SPLIT-PHASE BELT-DRIVE FAN AND BLOWER MOTORS

**Typical Uses:** Belt-drive furnace blowers, exhaust and circulating fans, and air coolers.

**Special Features:** NEMA 42 frame includes relay. NEMA 48Z frame has 1/2 x 1⅞" shaft. NEMA 48Y frame has cradle base with holes and slots to match mounting dimensions of either NEMA 48 or 56. Also supplied with 5/8" dia. shaft bushing. NEMA 56Z frame has nonstandard 1/2" dia. shaft with flat and is supplied with 5/8" dia. shaft bushing.

Two speed models are specifically designed for diminishing torque, air-moving applications, such as belted or direct-drive fans and blowers.

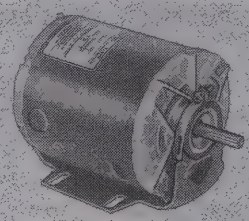
**Commercial Duty Motors:** Feature higher starting torque than residential duty motors and offer universal replacement. Cooler running temperature ensures longer life expectancy.

**Type:** Split-phase, single phase

**Thermal Protection:** Auto

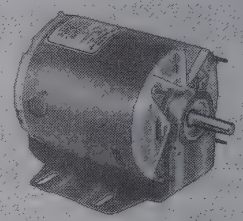
**Insulation Class:** B

**Ambient:** 40°C



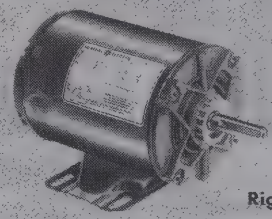
**Duty:** Continuous

**Rotation:** CW/CCW



**Finish:** Gray

**Brand:** GE



**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

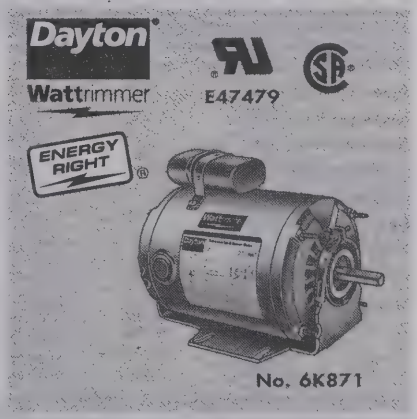
## HIGH EFFICIENCY SPLIT-PHASE START/CAPACITOR-RUN, OPEN DRIPPROOF, SINGLE SPEED



**Typical Uses:** High efficiency performance in furnace blowers, and other belt-driven fan and blower applications. All models have the starting torque of split-phase motors but use less electricity when running because they are capacitor-run.
**Special Features:** Studs extend out shaft endshield for mounting to fan guard. Capacitor included.
**Type:** Split-phase start/capacitor run

**Bearings:** All-angle sleeve
**Mounting:** Cradle base
**Thermal Protection:** Auto
**Insulation Class:** A
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

**CAUTION:** **Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

(*) NEMA 48Y frame motors have cradle base with holes and slots to match mounting dimensions of either NEMA 48 or 56 frame. (✓) Denotes energy efficient product.
(†) NEMA 56Z frame motor has nonstandard 1/2" dia. shaft with flat and is supplied with 5/8" dia. shaft bushing.

No. 6K871

### ESTIMATED YEARLY POWER COST SAVINGS for HEATING/COOLING

**Dayton Wattrimmer Compared to Standard Fan and Blower Motor**

| HP | Average Expected Watts Saved | Typical‡ Hrs. Usage per Year | SAVINGS PER YEAR at 5¢ per KwH | at 8¢ per KwH | at 10¢ per KwH | at 12¢ per KwH |
|---|---|---|---|---|---|---|
| 1/4 | 60 | 2400 | $8.64 | $11.52 | $14.40 | $17.28 |
| 1/3 | 86 | 2400 | 12.38 | 16.51 | 20.64 | 24.77 |
| 1/2 | 82 | 2400 | 11.81 | 15.74 | 19.68 | 23.62 |
| 3/4 | 88 | 2400 | 12.67 | 16.90 | 21.12 | 25.34 |

(‡) Hours will vary depending on weather and personal preference.

# SPLIT-PHASE BELT-DRIVE FAN AND BLOWER MOTORS

## SPLIT-PHASE, OPEN DRIPPROOF, ADJUSTABLE MOUNTING RING

**Typical Uses:** Replacing NEMA 48 and 56 frame belt-driven furnace blower motors.

**Special Features:** Designed with the contractor in mind. Adjustable resilient mounting rings can be varied as much as 1 1/16" to fit most existing base lengths. All models have extra features shown for maximum flexibility on field service calls.

**Type:** Split-phase

**Bearings:** All-angle sleeve

**Thermal Protection:** Auto

**Insulation Class:** B

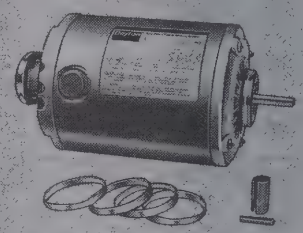
**NEMA Frame:** 48Y

**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CW/CCW

**Finish:** Gray



**Brand:** Dayton

**CONTRACTOR FRIENDLY™ FEATURES**

- **Adjustable mounting ring. Align shaft end resilient ring and adjust other resilient ring along extended hub until it matches length of old motor.**
- **Adjustable ring diameters. Supplied with 2½" diameter rings. If 2¼" diameter is required, remove snap-on split bands (included).**
- **Adjustable shaft diameters. Motor has 1/2" dia. shaft with flat. For 5/8" dia. use shaft adapter with key (included).**

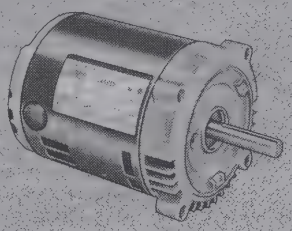
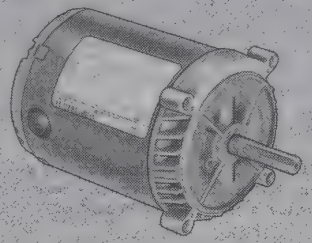
# FACE-MOUNTED FAN MOTORS



- **Dayton models provide direct replacement in many Jenn-Air and similar commercial kitchen exhaust ventilators**
- **NEMA service factors up to 1.4 provide a reserve margin for applications where intermittent overloading or fluctuating (high/low) voltage conditions may occur**

**Typical Uses:** Exhaust ventilators in commercial cooking areas and other moderate-starting torque equipment that can be directly connected to a NEMA 56CZ face-mounted motor. **(Not intended for power transmission applications.)**



**Type:** Split-phase
**Bearings:** Double-shielded ball
**Enclosure:** Open dripproof
**Thermal Protection:** Auto
**NEMA Frame:** 56CZ
**Shaft Dimensions:** 5/8 x 2 7/16"
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton and GE

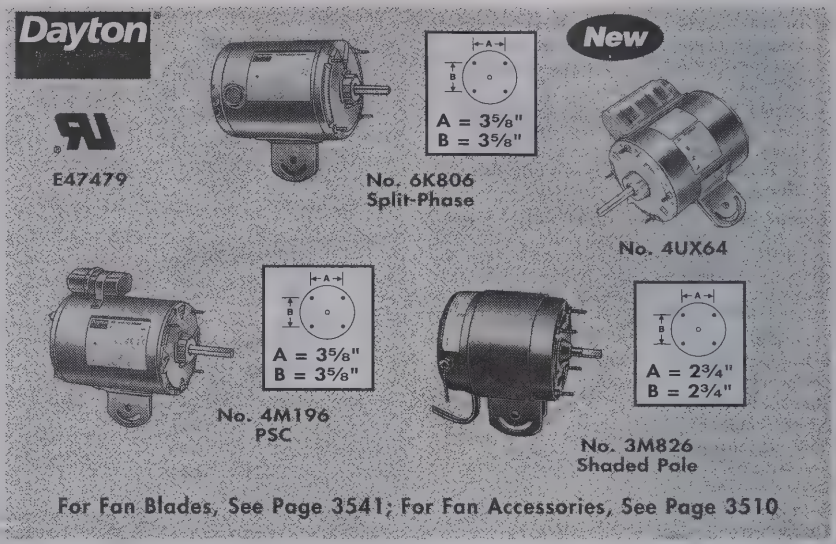
**CAUTION: Not for fans in unattended areas.**



**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

# YOKE-MOUNTED FAN MOTORS

**Typical Uses:** Air circulators where motor is mounted directly to fan column. Supplied with durable Dayton yoke-type welded bracket or strap. Studs for mounting fan guard directly to shaft endshield. Also used on exhaust fans, unit heaters, and other air-moving applications.
**Type:** Split-phase, permanent split capacitor, and shaded pole
**Bearings:** All-angle sleeve or double-shielded ball
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Duty:** Continuous air-over
**Finish:** Gray
**Brand:** Dayton
**Voltage:** All motors are 115 volts, except No. 6K411 which is 115/230V.

**CAUTION: Motor overload could result if the fan blade is not correctly matched to the motor's HP and RPM rating.**

**CAUTION**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

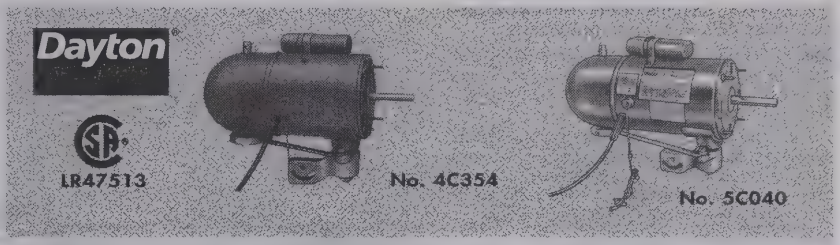
# FAN MOTORS

## OSCILLATING AIR CIRCULATOR MOTORS

**Typical Uses:** No. 4C354 is for use on Dayton 20 and 24" oscillating fans. No. 5C040 is for use on Dayton 30" oscillating fans.

**Special Features:** Hardened metal precision gearing and durable clutch assembly. Four extended studs 3⅝" OC for mounting guard. 10 ft., 3-conductor cord with grounding type molded plug. 90 or 45° sweep or to blow straight. Two-speed pull chain switch.



**Motor Type:** Permanent split capacitor

**Enclosure:** TEAO

**Thermal Protection:** Auto

**Finish:** Gray

**Brand:** Dayton

| HP | Nameplate RPM | Volts 60 Hz | Full-Load Amps at Nameplate Volts | Shaft Dia. (In.) | Ins. Class | Stock No. | List | Each | Shpg. Wt. |

## CENTRIFUGAL DIRECT DRIVE FAN MOTORS

**Typical Uses:** Direct replacements for Dayton direct drive upblast and downblast centrifugal roof and wall ventilators.

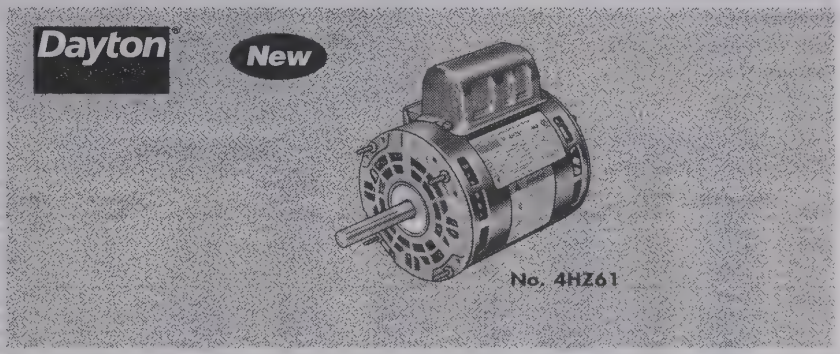
**Motor Type:** Permanent split capacitor and shaded pole

**Bearings:** Ball

**Mounting:** Stud

**Enclosure:** Open

**Thermal Protection:** Auto



**Ambient:** 40° C

**Duty:** Continuous

**Rotation:** CCW facing shaft

**Finish:** Gray

**Brand:** Dayton

# BELT-DRIVE FAN AND DIRECT-DRIVE FAN MOTORS

## DAYTON SPLIT-PHASE

**Typical Uses:** Exhaust fans, air circulators, and other air-over fan applications.

**Special Features:** Extended studs for mounting fan guard on shaft endshield. Totally enclosed construction for use in dusty or dirty environments.

Two speed models are specifically designed for diminishing torque, air-moving applications, such as belted or direct-drive fans and blowers. Two-speed switch No. 2X605 is available, see page 3561.

**Type:** Split-phase

**Bearings:** All-angle sleeve or double-shielded ball

**Mounting:** Cradle base with studs

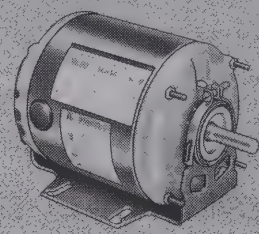
**Enclosure:** TEAO

**Service Factor:** 1.0 (except Nos. 6K687 and 6K691 are 1.35)

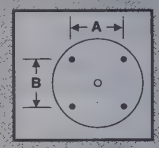
**Thermal Protection:** Auto

**Ambient:** 40°C

**Duty:** Continuous air-over



**Rotation:** CW/CCW



**Finish:** Gray

**Brand:** Dayton

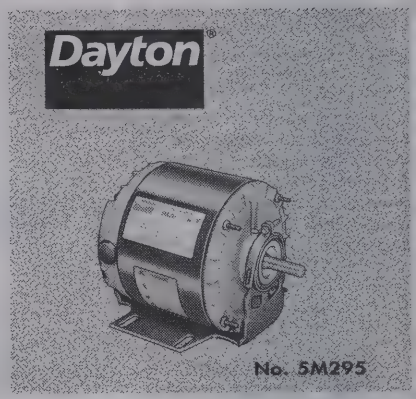
## DON'T FORGET THE BACK OF THE BOOK!
## MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER

**Besides complete National Brand and Product Indexes, the back section of this Catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.**

# BELT-DRIVE FAN AND DIRECT-DRIVE FAN MOTORS



## SPLIT-PHASE, MANUAL RESET THERMAL PROTECTION

- **UL507 Compliant, for use in fans and blowers in unattended areas**

**Typical Uses:** For use in wall-insert fans, in-wall fans, ceiling fans, attic exhaust fans, whole house fans, duct fans, and other air-over direct drive fan applications mounted in unattended, hard-to-reach locations. These motors include a manual reset protector for use in applications which are likely to operate unattended or in situations in which a locked rotor condition may go undetected. Motors meet Underwriter Laboratories specifications for use in unattended areas.

**Special Features:** Supplied with extended studs for mounting fan guard on shaft endshield. Totally enclosed construction for dusty or dirty environments.

**Type:** Split-phase
**Bearing:** All-angle sleeve or double-shielded ball
**Mounting:** Cradle/stud
**Enclosure:** TEAO
**Ambient:** 40°C
**Service Factor:** 1.0
**Thermal Protection:** Manual reset
**Insulation Class:** A
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

No. 5M295

## DIRECT-DRIVE FAN MOTORS

- **Supplied with mounted capacitor**
- **1/2" studs for mounting fan guard on 48 frame**

**Typical Uses:** Exhaust and poultry fans, air circulators, and other equipment operating in dusty, dirty, noncombustible environments. High efficiency or standard.

**Special Features:** Terminal board on all 48 frame. Large internal conduit box on 56 frame.

**Type:** Permanent split capacitor
**Mounting:** Resilient cradle base
**Enclosure:** TEAO (No. 3M742 is TENV)
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Continuous air-over
**Finish:** Gray

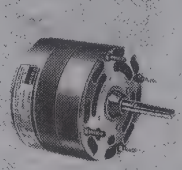
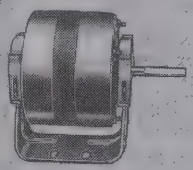
*Need reliable fan and blower motors? You've come to the right place.*

# 4.4" DIAMETER FAN AND BLOWER MOTORS

- **Sturdy steel construction**
- **Bearings surrounded by Permawick® lubrication**
- **Stators press-fitted into a rugged steel sleeve**



**Typical Uses:** New and replacement use on a wide range of small fan and blower applications.



**Type:** Shaded pole
**Bearings:** All-angle, self-aligning sleeve (except No. 4M222 has ball bearings)
**Mounting:** Studs for mounting from shaft endshield or attaching fan guard and cradle base.
**Enclosure:** Open or TEAO
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Air-over or fan-cooled
**Finish:** Gray

(†) Use with No. 2W333, 16/3# 10 ft. SJ cord with SPDT feed-thru switch. (‡) Has 5.0 cubic inch junction box. (#) Ball bearings.

# 3.3" DIAMETER FAN AND BLOWER MOTORS

## SHADED POLE, OPEN OR TEAO, MECHANICALLY REVERSIBLE, SINGLE SPEED

- **Contractor Friendly™ Features**
- **Mechanically reversible**
- **OEM and replacement use for a wide variety of air-moving applications**

**Typical Uses:** Designed with the contractor in mind for increased versatility and wide range of air-moving applications.

**Special Features:** Unique design for reversing the rotation of the motor shaft. Easily removable clips enable quick removal of motor endshield allowing the rotor to be reversed, thereby changing the rotation. A specially designed stator/rotor ensures nameplate performance in either direction.

**Type:** Shaded pole

**Bearings:** All-angle, self-aligning sleeve

**Mounting:** Stud, 3/4" on both endshields

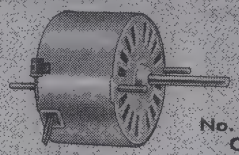
**Service Factor:** 1.0

**Thermal Protection:** Auto

**Insulation Class:** A

**Ambient:** 40°C

**Duty:** Continuous air-over



**Finish:** Gray

**Brand:** Dayton

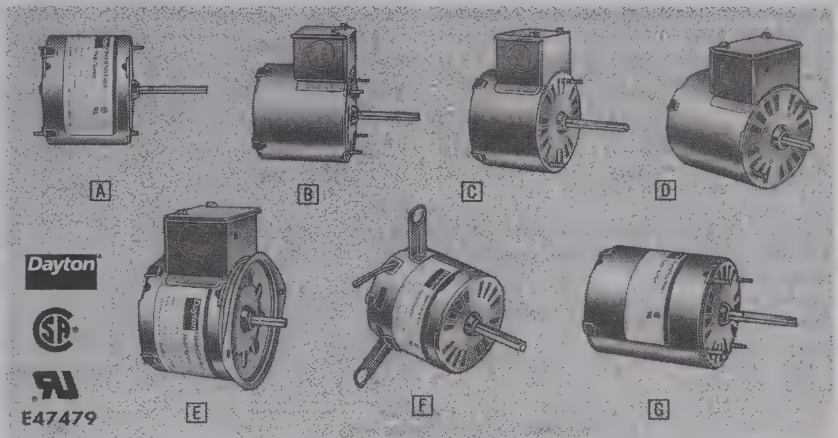
## UL LISTING AND CSA CERTIFICATION

When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.

### DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER

**Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.**



# 3.3" DIAMETER FAN AND BLOWER MOTORS

## SHADED POLE, OPEN AIR-OVER, SINGLE AND 2 SPEED

- **Sturdy all-steel construction**
- **Bearings surrounded by Permawick® lubrication**
- **Stators press-fitted into a rugged steel sleeve**

**Typical Uses:** OEM and replacement use in a wide variety of air-over fan and blower applications such as bathroom fans and rangehoods.

**Type:** Shaded pole
**Mounting:** Stud, lug, or flange
**Bearings:** All-angle, self-aligning sleeve
**Enclosure:** Open air-over
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Continuous air-over
**Finish:** Gray enamel
**Brand:** Dayton

**CAUTION:**
**Not for fans in unattended areas.**

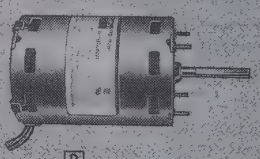
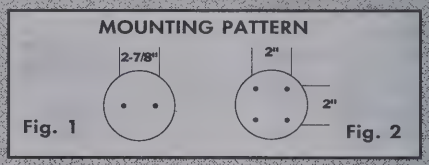
## SHADED POLE AND PSC, OPEN FAN-COOLED OR OPEN AIR-OVER, SINGLE SPEED



- **Open fan-cooled motors have internal fan for mechanical duty applications**
- **Sturdy all-steel construction**



**Typical Uses:** OEM and replacement use in a wide variety of fan and blower applications. Internal fan in open fan-cooled motors makes them suitable for mechanical duty applications such as pumps, diaphragm compressors, laboratory equipment and business machines.

**Type:** Shaded pole
**Bearings:** All-angle, self-aligning sleeve
**Mounting:** Studs on one or both endshields
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray
**Brand:** Dayton

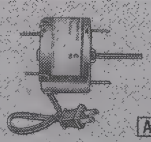
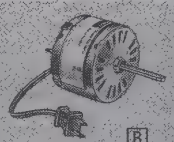
**CAUTION: Not for fans in unattended areas.**

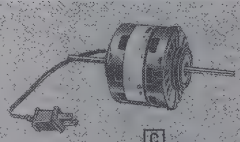
**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**



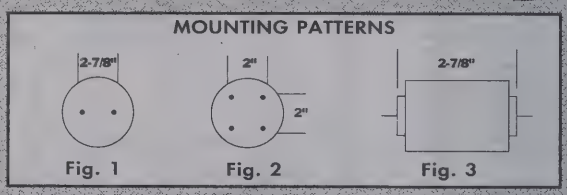
## SHADED POLE, TEAO OR OPEN, SINGLE SPEED, VENTILATION/KITCHEN EXHAUST FAN MOTORS



- **Cordset and plug included**



**Typical Uses:** Residential and commercial vent fans manufactured by Broan, Nutone, Penn Ventilator, Miami-Carey, Martin, Patton, Lakewood, Fasco, Bemis, and others. TEAO models are for use in dirty, dusty, noncombustible environments.



**Type:** Shaded pole
**Bearings:** All-angle, self-aligning sleeve
**Mounting:** Stud (except No. 4M195 is resilient ring and has double shaft)
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Body Diameter:** 3.3"
**Ambient:** 40°C
**Finish:** Gray

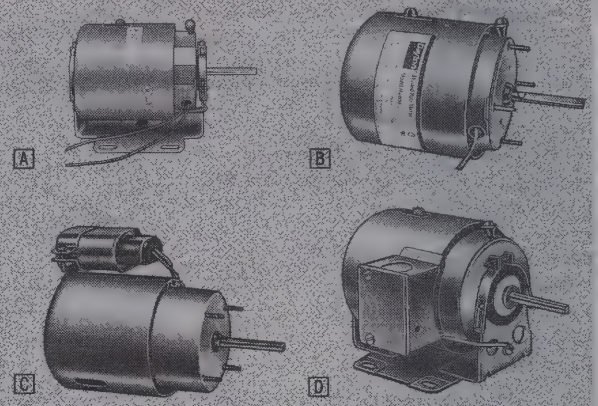
## UL LISTING AND CSA CERTIFICATION

When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.

# 3.3" DIAMETER FAN AND BLOWER MOTORS



- **Sturdy all-steel construction**
- **Bearings surrounded by Permawick® lubrication**
- **Stators press-fitted into sturdy steel sleeve**

**Typical Uses:** OEM and replacement use in a wide variety of fan and blower applications. Internal fan makes these motors suitable for mechanical duty applications such as pumps, diaphragm compressors, laboratory equipment, and business machines.

**Type:** Shaded pole or permanent split capacitor
**Bearings:** All-angle, self-aligning sleeve or ball
**Mounting:** Cradle base or stud (see mounting patterns below)
**Enclosure:** TEFC
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Body Diameter:** 4" including fan shroud
**Shaft Dimensions:** 5/16 x 2"
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray
**Brand:** Dayton

Dayton

E47479

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

## ECM™ ELECTRONICALLY COMMUTATED MOTOR

**Typical Uses:** Designed for direct drop-in replacement of conventional unit bearing motors. Ultra-high efficiency, up to three times greater than standard unit bearing designs.
**Special Features:** Labyrinth water slinger, extended temperature range, improved reliability, low operating temperature, design flexibility, and two-year warranty.
**Type:** Brushless DC
**Mounting:** Three #8-32 threads, three places, 2.812" diameter
**Finish:** Black

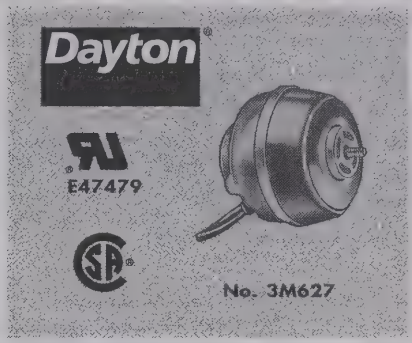
*Need reliable fan and blower motors? You've come to the right place.*



## DAYTON BRAND, SHADED POLE

- **Aluminum housing**

**Typical Uses:** Refrigerator and freezer fans, commercial refrigeration equipment, room and hood ventilators, room heaters, evaporative coolers, humidifiers, dehumidifiers, and other equipment having 6 to 10" hubless fan blades.

**Special Features:** Precision machined die-cast aluminum housing. Pre-oiled using large capacity felt wicking system. Kit included in carton contains vibration dampener, speed nut, and four No. 8-36 mounting screws, except No. 3M627 which requires only three screws (included).

**Type:** Shaded pole
**Mounting:** All-angle. Four tapped No. 8-36 mounting holes 2 13/16" OC at lead end and rigid foot base (except 2 watt model).
**Enclosure:** TEAO
**Service Factor:** 1.0
**Insulation Class:** A
**Body Diameter:** 3½"
**Shaft Dimensions:** 1/4-20 x 7/16" threaded
**Ambient:** 40°C
**Duty:** Continuous air-over
**Finish:** Gray
**Brand:** Dayton
**CSA Certified:** 9 thru 16 watt models only

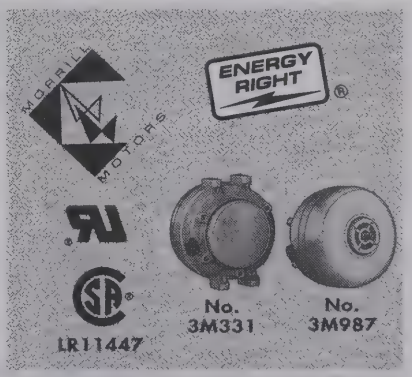
(*) Operable on 50 Hz.

**CAUTION: Not for fans in unattended areas. Refer to page 6 for UL Standard and motor selection information.**



## MORRILL MOTORS BRAND, HIGH EFFICIENCY, SHADED POLE

- **Aluminum housing**

**Typical Uses:** Domestic refrigerator and freezer fans, commercial refrigeration equipment, room and hood ventilators, room heaters, evaporative coolers, humidifiers, dehumidifiers, and on other equipment having 6 to 10" fan blades.

**Special Features:** High efficiency design. Precision machined die-cast aluminum housing. Positive flow lubrication system with large pre-oiled felt wick reservoir and hardened motor shaft for long life without re-oiling. Kit in carton contains speed nut and four No. 8-36 thread-forming mounting screws. Vibration dampeners pre-assembled on motor.

**Type:** Shaded pole
**Mounting:** Horizontal or vertical shaft-up. Five mounting holes, 2½" OC at lead end and two rigid foot bases, top and bottom, with four mounting holes (except 2-watt model).
**Enclosure:** TEAO
**Threaded Shaft Dimensions:** 1/4-20 x 3/8"
**Insulation Class:** B
**Body Diameter:** 3½"
**Ambient:** 40°C
**Duty:** Continuous air-over
**Finish:** Unpainted aluminum
**Brand:** Morrill
**UL Recognized:** E81645 or E81653

(†) Has no rigid foot base and three No. 8-36 mounting holes on rear endshield. (✓) Denotes energy efficient product.
**(*) Morrill motors are nameplated rotation facing lead end.**

# UNIT BEARING MOTORS

**Typical Uses:** Domestic refrigerator and freezer fans, commercial refrigeration equipment, room and hood ventilators, room heaters, evaporative coolers, humidifiers, dehumidifiers and other equipment having 7 to 10" hubless fan blades.

**Special Features:** Precision machined, cast-iron or aluminum housings. Pre-oiled for long use without re-oiling.

**Mounting:** All-angle. Three No. 8-36 mounting holes 2½" OC at lead end and rigid foot base (except 2 watt models)

**Mounting Brackets Available, See page 201.**

**Type:** Shaded pole or permanent split capacitor

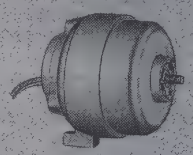
**Enclosure:** TEAO

**Service Factor:** 1.0

**Thermal Protection:** 2 thru 9 watt and 4M530, impedance; 16 watt models, auto

**Body Diameter:** 3½" (GE 51 frame)

**Shaft Dimensions:** 1/4-20 x 1/2" threaded shafts



**Ambient:** 50°C

**Duty:** Continuous air-over

**Finish:** Black (Nos. 4M235, 3M394 are natural finish)

**Brand:** GE

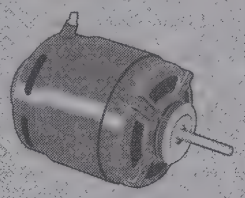
# UNIT BEARING MOTORS

## GE BRAND, SHADED POLE



**Typical Uses:** Room air conditioners, fans, air coolers, unit heaters, condenser units, and other air-over motor applications.

**Type:** Shaded pole

**Mounting:** All-angle, resilient ring and four No. 8-32 holes 2⅞" bolt circle for shaft end mounting. Nos. 3M179, 3M183, 3M186, 3M187, and 3M189 are hole mount only. Bases and accessories available on pages 200 and 202.

**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** A
**Body Diameter:** 4" (GE 11 frame)
**Ambient:** 50°C
**Duty:** Continuous air-over
**Finish:** Unpainted
**UL Recognized:** Thermal protection (E27885); insulation system (E37513); and construction (E46035)

# C-FRAME MOTORS

## SHADED POLE, C-FRAME (3" HIGH), OPEN AIR-OVER, SINGLE AND TWO SPEED

**Typical Uses:** Small fans and blowers found in bathroom ventilators, rangehoods, electric heaters, hair dryers, slide projectors, air cleaners, humidifiers and refrigeration equipment. Ball bearing models are designed for extended life in temperature-sensitive applications such as business machine cooling systems, audio visual equipment, and wood burning stoves.

**Special Features:** Coils are bobbin-wound for uniformity and are wrapped with flame retardant material.

**Type:** Shaded pole

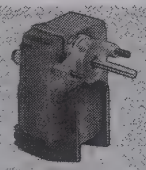
**Bearings:** Sleeve type are sintered bronze with large felt wick oil reservoir; ball bearings are permanently lubricated and double-shielded. All have zinc die-cast bearing brackets.

**Mounting:** Studs from shaft end, two 9/64" dia. mounting holes on each side of stator 1 7/8" OC. All-angle.

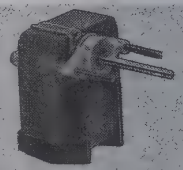
**Service Factor:** 1.0

**Ambient:** 40°C

**Duty:** Continuous air-over



**Rotation:** CW facing shaft



**Brand:** Dayton

**UL Recognized:** (E47479) for construction; (E40077) for impedance protection; (E37403) for thermal protection

CAUTION:
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

## SHADED POLE, C-FRAME (3" HIGH), OPEN AIR-OVER, OEM REPLACEMENT

**Typical Uses:** OEM replacement motors in popular kitchen and bath vent fans manufactured by Broan, Nutone, Aubrey, and Fasco.

**Special Features:** Short cordset with two prong male plug. Bobbin-wound coil is wrapped with flame retardant material.

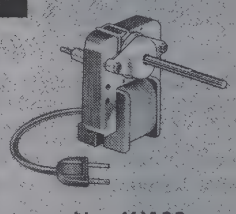
**Type:** Shaded pole

**Bearings:** Bronze sleeve with large felt wick oil reservoir.

**Mounting:** All-angle

**Thermal Protection:** Impedance (except Nos. 4M180 and 4M209 have one shot protection)

**Insulation Class:** B



**Ambient:** 40°C

**Duty:** Continuous air-over

**Brand:** Dayton

## SHADED POLE, C-FRAME (3" HIGH), OPEN AIR-OVER

**Typical Uses:** Direct replacement for Carrier high efficiency combustion furnaces.

**Special Features:** Plug provides exact interchange ability with the OEM motor. Double shaft extension.

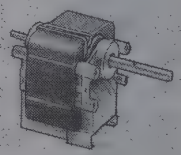
**Type:** Shaded pole

**Bearings:** Ball

**Mounting:** Hole

**Service Factor:** 1.0

**Ambient:** 40°C



**Rotation:** CW view facing lead end

**Brand:** Dayton

**UL Recognized:** (E47479) for construction; (E37403) for thermal protection

# UNIT BEARING WATER AGITATOR AND VENTILATION/REFRIGERATION MOTORS

## UNIT BEARING WATER AGITATOR MOTORS

**Typical Uses:** Direct replacements on ice bank beverage dispensers.
**Special Features:** Cast-iron unit bearing construction with machined 420 stainless steel shaft. Original equipment on Cornelius, Lancer, Alco, Wilshire, Booth, K-Way, and Multiplex. Eleven #8-36 mounting screws included.
**Type:** Shaded pole
**Mounting:** Rigid foot base, vertical shaft down
**Enclosure:** Totally enclosed
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** A (E129192)
**Body Diameter:** 3⅞"
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CCW view facing shaft end
**Finish:** Black enamel
**Brand:** Electric Motors and Specialties
**UL Recognized:** E131620 for construction; E128044 for thermal protection

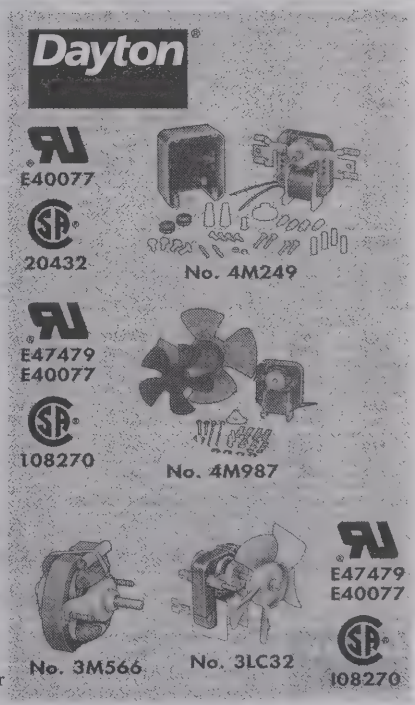
**CAUTION: Not for fans in unattended areas.** **Refer to page 6 for UL507 Standard and other motor regulatory information.**

# VENTILATION/REFRIGERATION MOTORS

## UNIVERSAL EVAPORATOR FAN MOTOR KIT

**Typical Uses:** Replaces hundreds of OEM motors as well as GEM EM-240 Series, MARS #90999, SUPCO, #SM-999, and Acme-Miami AM-4240 Series C-frame with 3" overall height.
**Special Features:** Includes all necessary hardware, adapters, brackets, and installation instructions. 2" break-off shaft.
**Type:** Shaded pole.
**Bearings:** Sleeve
**Enclosure:** Open air-over
**Duty:** Continuous

## UNIVERSAL REFRIGERATION FAN MOTOR KIT



**Typical Uses:** Replace hundreds of standard C-frame motors as well as 3.3, 3.5, and 4" diameter motors.
**Special Features:** Contains 4 and 5½" fan blades, hub adapter, screws, H-brackets, washers, and wire nuts for a wide variety of mountings.
**Approvals:** UL Recognized Component (E47479); UL Impedance Protected (E40077); CSA Certified (108270).
**Type:** Shaded pole
**Bearings:** Bronze sleeve
**Enclosure:** Open air-over
**Duty:** Continuous air-over

## UNCASED SMALL FAN MOTOR

**Typical Uses:** For small fans and blowers in bathroom ventilators, rangehoods, electric hair dryers, heaters, slide projectors, air cleaners, humidifiers, and refrigeration equipment.
**Special Features:** Two pole construction.
**Type:** Shaded pole
**Bearings:** All-angle, self-aligning sleeve
**Mounting:** Stud on shaft end, 2⅞" OC
**Overall Length:** 2⅛"
**Ambient:** 40°C
**Duty:** Continuous air-over

## EVAPORATOR FAN MOTOR FOR CHOICE BRAND VENDING MACHINES

**Typical Uses:** OEM replacement for evaporator fan motor in Choice brand vending machines.
**Special Features:** Two double male electrical terminals, new fan blade, and front mount. Studs 1⅞" OC.
**Approvals:** UL Recognized Component (E47479); UL Impedance Protected (E40077); CSA Certified (108270)
**Type:** Shaded pole
**Bearings:** All-angle sleeve
**Mounting:** Front mount
**Ambient:** 40°C
**Duty:** Continuous air-over

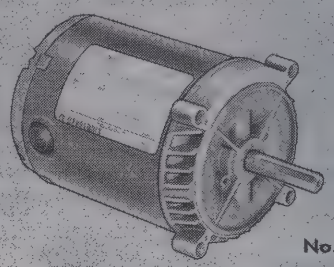
# SPLIT-PHASE C-FACE MOTORS



- **2¼" shaft length x 5/8" diameter**

**Typical Uses:** Commercial fans, blowers, and other air-moving applications that can be directly mounted to a C-face end-mounted motor.

**Type:** Split-phase
**Bearings:** Ball
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** GE

## GRAINGER STOCKS A BROAD LINE OF DAYTON AND GE MOTORS

**Top Performance.** Dayton motors are built to exceed industry standards such as NEMA (National Electrical Manufacturers Association). Used as a replacement motor in a wide variety of applications, each Dayton motor must outperform the best motor it may be called upon to replace, hence "best of the best" performance. You can be confident that the Dayton motor will work as well as, or better than, the motor you are replacing.

**Clearly Identified.** Dayton motors are clearly identified by full fact carton labels and nameplates with wiring diagrams. Maintenance and installation instructions appear in every motor carton.

**Broad Line Offering.** Dayton offers one of the broadest lines of motors in the industry. One brand can be used for nearly all your motor replacement needs.

**Time Proven Performance.** Established in 1937, Dayton has grown to be one of the most dependable names in the motor industry.

**Broad Line Offering.** Grainger now offers over 2400 stock GE brand motors including AC and DC motors from 1/370 HP to 450 HP in Energy $aver™ and standard efficiency designs including severe duty, explosion proof, farm duty, HVAC, and many others.

**National Recognition.** GE is considered the leading national brand motor with the largest installed customer base. The GE brand is widely known for quality and reliability.

**Clearly Identified.** GE motors are clearly identified by full fact carton labels and nameplates. Easy-to-read wiring diagrams are included.

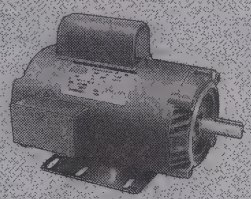
**Premium Efficiency Leader.** GE has long been recognized as an industry leader in premium efficiency motors with a wide variety of ratings and types to suit many applications.

**Heritage of Excellence.** General Electric is one of the pioneers in the electrical industry with a proud 100 year history dating back to the time of founder Thomas Edison.

# CAPACITOR-START C-FACE MOTORS

- **Copper windings**
- **Removable base on 145TC and larger frame sizes**
- **Service factors up to 1.35**

**Typical Uses:** For powering industrial and commercial pumps, speed reducers, blowers, machine tools, and other equipment that can be directly connected to an end-mounted motor.



**Type:** Capacitor-start
**Bearings:** Double-shielded ball
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

**Replacement Parts Available**
**1-800-323-0620**

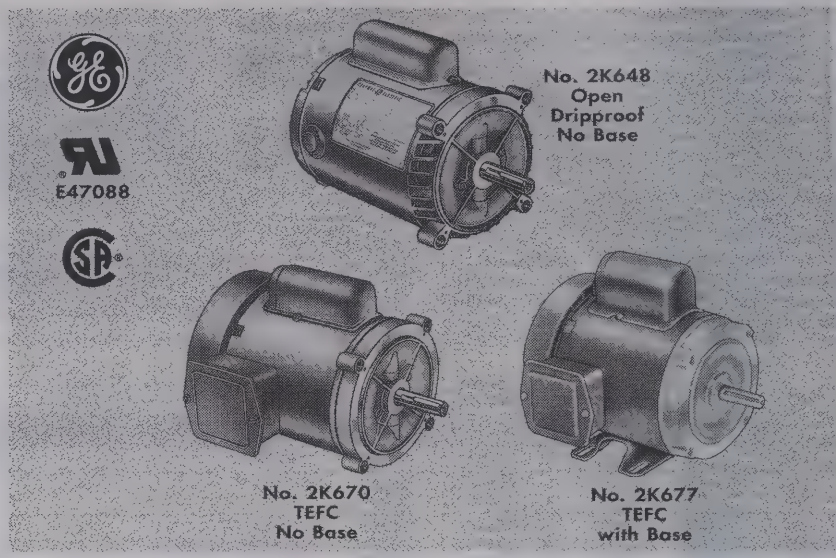
(*) Capacitor-start, capacitor-run. (†) Removable base. (#) 42CZ frame motors have 1/2 x 11/8" shaft with key. NOTE: All TEFC and T-frame models supplied with conduit box.

# CAPACITOR-START C-FACE MOTORS



**Typical Uses:** For powering industrial and commercial pumps, speed reducers, machine tools, and other equipment that can be directly connected to a NEMA 56C face end-mounted motor.

**Type:** Capacitor-start
**Bearings:** Ball
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray
**Brand:** GE

**Replacement Parts Available**
**1-800-323-0620**

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

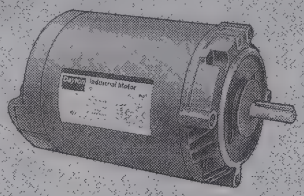
(*) Capacitor-start, capacitor-run. (†) Split-phase. (‡) 56J frame motors have threaded shaft.

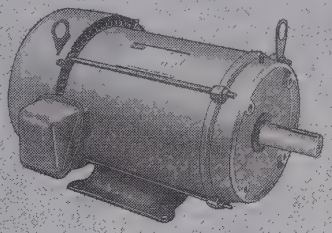
# 3-PHASE OPEN DRIPPROOF C-FACE MOTORS

- **Industrial duty**
- **T-frame models are NEMA Design B**



**Typical Uses:** Pumps, speed reducers, machine tools, and other equipment that can be directly connected to a NEMA C-face end-mounted motor where 3-phase power is available.

**Type:** 3-phase
**Bearings:** Double-shielded ball
**Thermal Protection:** None
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton



**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

# 3-PHASE OPEN DRIPPROOF C-FACE MOTORS

## HIGH EFFICIENCY MOTORS

**Typical Uses:** Designed for use on commercial and industrial pumps, centrifugal and hydraulic pumps, machine tools, speed reducers, and other equipment requiring NEMA C-face mounting configuration.

**Bearings:** Ball bearings, double shielded.

**Enclosure:** Open dripproof

**Mounting:** C-face

**Insulation Class:** B

**Ambient:** 40 degrees C

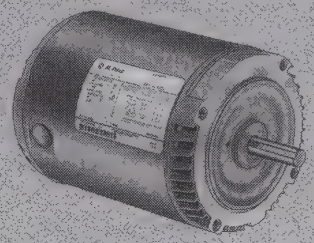
**Protection:** None

**Duty:** Continuous

**Rotation:** CW/CCW

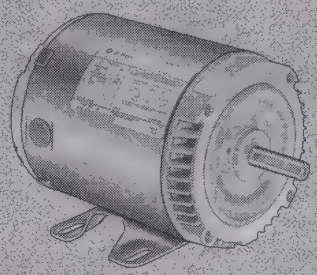
**Frame:** Rolled steel

**Finish:** Gray



**Brand:** GE

**Replacement Parts Available**
**1-800-323-0620**



**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

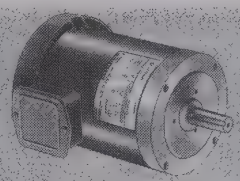
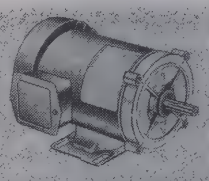
### ORDERING HAS NEVER BEEN EASIER!

**Whether you phone, fax, write or stop by your local branch to place an order, Grainger can tailor sales terms to meet your needs. Ask about establishing an open line of credit or pay with your VISA, MasterCard, or American Express card.**



DEFINITE PURPOSE MOTORS

# 3-PHASE TEFC C-FACE MOTORS



**Typical Uses:** Designed for use on commercial and industrial pumps, centrifugal and hydraulic pumps, machine tools, speed reducers, and other equipment requiring NEMA C-face mounting configuration.
**Bearings:** Ball bearings, double shielded, regreaseable on 320-360 frame motors
**Enclosure:** TEFC
**Ambient:** 40°C
**Protection:** None
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray, black
**Mounting:** C-Face
**Brand:** GE

- **Energy efficient motors meet or exceed US and Canadian energy standard**
- **Higher efficiency results in lower operating costs and improved cooling for longer life**
- **All copper windings**

## GE BRAND, 3-PHASE TEFC C-FACE PREMIUM EFFICIENCY SEVERE DUTY MOTORS

- **For high humidity, acidic, alkali, or dirty (nonexplosive) conditions**
- **Efficiencies meet most utility rebate program requirements**
- **NEMA Design B**
- **Includes grease fittings**
- **Suitable fo 40°C ambient at 1.15 service factor; 65°C at 1.0 service factor**
- **Cast-iron construction**
- **Three-year warranty**

**Typical Uses:** Pumps, conveyors, speed reducers, blowers, machine tools, and equipment that can be directly connected to a NEMA C-face end-mounted motor.

**Type:** 3-phase
**Bearings:** Ball
**Mounting:** NEMA C-face with rigid base
**Enclosure:** TEFC; No. 5U241 is TENV
**Thermal Protection:** None
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Beige
**Brand:** GE

# SPLIT-PHASE HAZARDOUS LOCATION MOTORS

## DAYTON BRAND, TENV AND TEFC HAZARDOUS LOCATION MOTORS

**Typical Uses:** Listed by UL for use in Class I, Group C, D and Class II, Groups E, F, and G hazardous locations such as dry cleaning and dyeing plants, paint and varnish factories, flour and feed mills, grain elevators, coal and coke plants, and other locations that require a motor to meet the National Electrical Code for hazardous locations.

**Leads:** 24" thru 3/4-14 NPT nipple

**Type:** Split-phase
**Bearings:** Double-shielded ball for heavy radial and thrust loads
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Temperature Code:** T3B
**Brand:** Dayton
**Conduit Box:** Optional; order No. 4X788 separately

## GE BRAND, TENV AND TEFC C-FACE HAZARDOUS LOCATION MOTORS

- **2¼" shaft length x 5/8" diameter**

**Typical Uses:** Listed by UL for use in Class I, Group D and Class II, Groups E, F, and G hazardous locations such as dry cleaning and dyeing plants, paint and varnish factories, flour and feed mills, grain elevators, coal and coke plants, and in commercial fans, blowers, and other air-moving applications that can be directly mounted to a C-face end-mounted motor.

**Type:** Split-phase
**Bearings:** Ball
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW

**CAUTION: Not for fans in unattended areas.**

**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

## TEMPERATURE CODE

In addition to the identification of the class, group and division, it is necessary as well to obtain the temperature code or maximum surface temperature for the explosion-proof motor. This code or temperature indicates the maximum surface temperature for all conditions including burnout, overload, single phasing, and locked rotor. The maximum surface temperature or "T" code must be identified on the nameplate.

**TEMPERATURE IDENTIFICATION NUMBERS**

| "T" Number (T-Code On Nameplate) | Maximum Temperature (For All Conditions) | | "T" Number (T-Code On Nameplate) | Maximum Temperature (For All Conditions) | |
|---|---|---|---|---|---|
| T1 | 450°C | 842°F | T3A | 180°C | 356°F |
| T2 | 300°C | 572°F | T3B | 165°C | 329°F |
| T2A | 280°C | 536°F | T3C | 160°C | 320°F |
| T2B | 260°C | 500°F | T4 | 135°C | 275°F |
| T2C | 230°C | 446°F | T4A | 120°C | 248°F |
| T2D | 215°C | 419°F | T5 | 100°C | 212°F |
| T3 | 200°C | 392°F | T6 | 85°C | 185°F |

## GRAINGER STOCKS A BROAD LINE OF DAYTON AND GE MOTORS

**Top Performance.** Dayton motors are built to exceed industry standards such as NEMA (National Electrical Manufacturers Association). Used as a replacement motor in a wide variety of applications, each Dayton motor must outperform the best motor it may be called upon to replace, hence "best of the best" performance. You can be confident that the Dayton motor will work as well as, or better than, the motor you are replacing.

**Clearly Identified.** Dayton motors are clearly identified by full fact carton labels and nameplates with wiring diagrams. Maintenance and installation instructions appear in every motor carton.

**Broad Line Offering.** Dayton offers one of the broadest lines of motors in the industry. One brand can be used for nearly all your motor replacement needs.

**Time Proven Performance.** Established in 1937, Dayton has grown to be one of the most dependable names in the motor industry.

**Broad Line Offering.** Grainger now offers over 2400 stock GE brand motors including AC and DC motors from 1/370 HP to 450 HP in Energy $aver™ and standard efficiency designs including severe duty, explosion proof, farm duty, HVAC, and many others.

**National Recognition.** GE is considered the leading national brand motor with the largest installed customer base. The GE brand is widely known for quality and reliability.

**Clearly Identified.** GE motors are clearly identified by full fact carton labels and nameplates. Easy-to-read wiring diagrams are included.

**Premium Efficiency Leader.** GE has long been recognized as an industry leader in premium efficiency motors with a wide variety of ratings and types to suit many applications.

**Heritage of Excellence.** General Electric is one of the pioneers in the electrical industry with a proud 100 year history dating back to the time of founder Thomas Edison.

**HELPFUL GUIDES TO TERMINOLOGY AND TECHNICAL DATA ARE PROVIDED FOR MANY OF OUR PRODUCTS. SEE PAGES AT BACK OF CATALOG**

# 3-PHASE HAZARDOUS LOCATION MOTORS

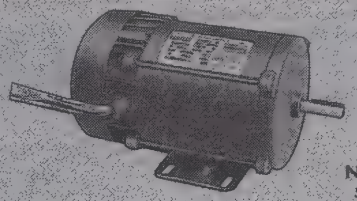
- **UL Listed (E62643) for use in designated hazardous locations**
- **T-frame models have built-in temperature-sensing switch with leads brought out. When properly wired to the external control circuit, maximum frame temperature is limited as required by UL and the NEC**
- **Hazardous location conduit box is supplied with all T-frame models; conduit box (No. 4X788) is sold separately for NEMA 56 and 56H frame models**
- **NEMA Design B**

**Typical Uses:** To power fans, blowers, pumps, and air compressors in locations such as dry cleaning plants, paint and varnish factories, flour and feed mills, coal or coke plants, grain elevators, and other locations that require a motor to meet the National Electrical Code for hazardous locations.

**Type:** 3-phase

**Bearings:** Double-shielded ball

**Enclosure:** Hazardous location, TEFC



**Thermal Protection:** Auto on NEMA 56 and 56H frames; 143 thru 215 frames have thermostat (T-Stat)

**Windings:** Copper
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Temperature Code:** T3B
**Finish:** Gray
**Brand:** Dayton

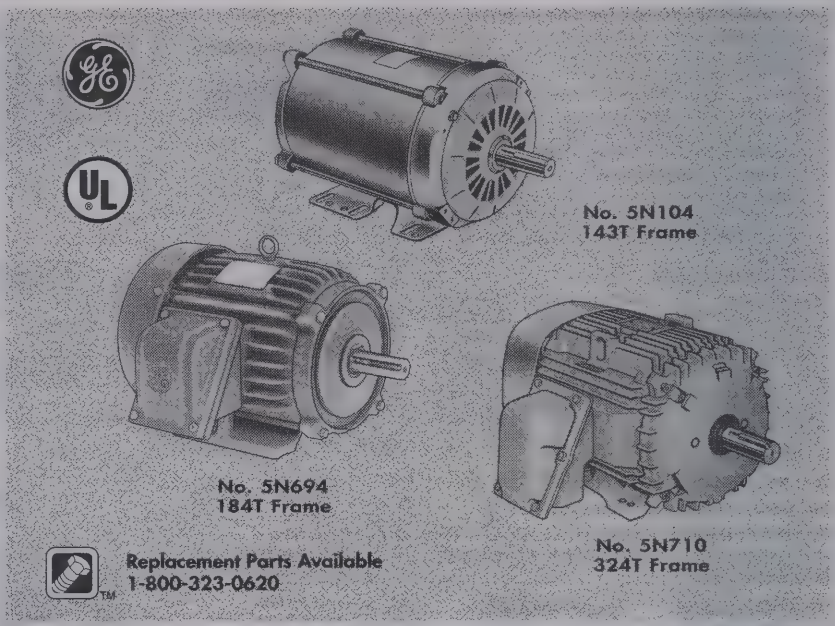
(*) Operable on 50 Hz 230/460V at 5/6 rated HP and speed at 1.0 service factor. (†) Class I, Group D only.

## CONDUIT BOX FOR HAZARDOUS LOCATION MOTORS

For use on Dayton brand 56 frame hazardous location motors. Has hole for self-tapping grounding screw. Easily installed. UL Listed. Gray finish.

**No. 4X788.** Shpg. wt. 1.6 lbs. List $34.00.....Each $29.90



# 3-PHASE HAZARDOUS LOCATION MOTORS

- **Thermostat (T-Stat) models have built-in temperature-sensing switch with leads brought out. When properly wired to the external control circuit, maximum frame temperature is limited as required by UL and the NEC**
- **NEMA Design B**
- **180 frame and above supplied with grease fittings**

**Typical Uses:** To power fans, blowers, pumps, and air compressors in dry cleaning plants, paint and varnish factories, flour and feed mills, coal or coke plants, grain elevators, and other locations that require a motor to meet the National Electrical Code for hazardous locations.

**Type:** 3-phase
**Bearings:** Ball
**Mounting:** Rigid
**Enclosure:** Hazardous location, TEFC
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** GE

**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

**CAUTION: Not for fans in unattended areas.**

**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

## NATIONAL ELECTRICAL CODE EXPLOSIVE ATMOSPHERE CLASSIFICATIONS

Certain locations are hazardous because the atmosphere does or may contain gas, vapor or dust in explosive quantities. The National Electrical Code (NEC) divides these locations into classes and Groups according to the type of explosive agent which may be present. Listed are some of the agents in each classification. For complete list, see NFPA (National Fire Protection Association) publication 497M.

Underwriters' Laboratories tests motors and other devices for safety in explosive atmospheres, and publishes a list of those meeting its standards for each class and Group.

Use of UL Listed devices does not necessarily make an installation conform to the NEC or local codes. Consult Chapter 5 of the NEC, local building codes, OSHA requirements and insurance inspectors for detailed data as to proper procedures. This catalog does not contain any motors designed for Class I, Groups A, B, and C atmospheres.

### CLASS I

**Group A:** Acetylene

**Group B:** Butadiene, ethylene oxide, hydrogen, propylene oxide, manufactured gases containing more than 30% hydrogen by volume.

**Group C:** Acetaldehyde, cyclopropane, diethyl ether, ethylene.

**Group D:** Acetone, acrylonitrile, ammonia, benzene, butane, ethanol, ethylene dichloride, gasoline, hexane, isoprene, methane (natural gas), methanol, naphtha, propane, propylene, styrene, toluene, vinyl chloride, xylene.

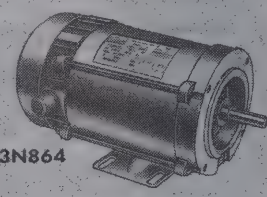
### CLASS II

**Group E:** Aluminum, magnesium and other metal dusts with similar characteristics

**Group F:** Carbon black, coke or coal dust

**Group G:** Flour, starch or grain dust

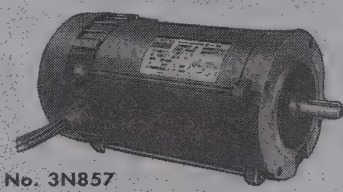
### CLASS III



Easily ignitable fibers, such as rayon, cotton sisal, hemp, cocoa fiber, oakum, excelsior and other materials of similar nature.

# 3-PHASE C-FACE HAZARDOUS LOCATION MOTORS

- **UL Listed (E62643) for use in Class I Group C, D and Class II Group E, F, &G hazardous locations**
- **T-frame models have built-in temperature-sensing switch with leads brough out. When properly wired to the external control circuit, maximum frame temperature is limited as required by UL and the NEC**
- **Hazardous location conduit box is supplied with T-frame models; conduit box (No. 4X788) is sold separately for NEMA 56 models**
- **NEMA Design B**



**Typical Uses:** To power fans, blowers, pumps, and air compressors in locations such as dry cleaning plants, paint and varnish factories, flour and feed mills, coal or coke plants, grain elevators, and other locations that require a motor to meet the National Electrical Code for hazardous locations.

**Type:** 3-phase
**Bearings:** Double-shielded ball
**Enclosure:** Hazardous location, TEFC
**Windings:** Copper
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Thermal Protection:** Auto or Thermostat (T-Stat)
**Temperature Code:** T3B
**Finish:** Gray
**Brand:** Dayton

No. 3N864

No. 3N857

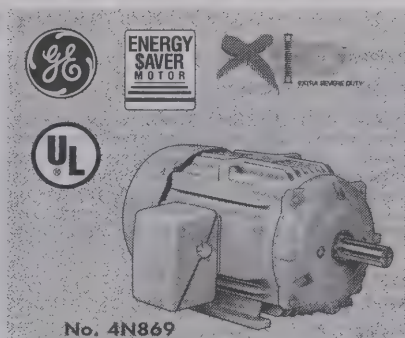
(†) Operable on 50 Hz, 230/460V at 5/6 rated speed.



# 3-PHASE HAZARDOUS LOCATION PREMIUM EFFICIENCY MOTORS

## SEVERE DUTY

- **Listed by UL (E125132) for use in Class I, Group D and Class II, Groups F and G hazardous locations**
- **Motors have built-in temperature-sensing switch with leads brought out. When properly wired to the external control circuit, maximum frame temperature is limited as required by UL and the NEC**
- **Premium efficiency motors meet most utility rebate program requirements**
- **NEMA Design B**
- **Cast-iron construction**
- **Supplied with grease fittings**
- **Three-year warranty**

**Typical Uses:** To power fans, blowers pumps and air compressors in dry cleaning plants, paint and varnish factories, grain elevators, and other locations that require a motor to meet the National Electrical Code for hazardous locations.

**Type:** 3-phase
**Bearings:** Ball
**Enclosure:** Hazardous location, TEFC
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Beige
**Brand:** GE

No. 4N869

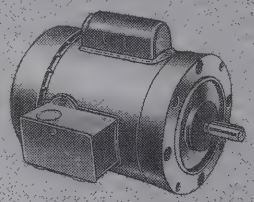
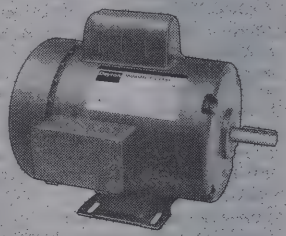
# CAPACITOR-START 50 Hz MOTORS

## DAYTON BRAND, 50 Hz MOTORS



- **Copper windings**
- **50 Hz operation**

**Typical Uses:** Machinery, air compressors, conveyors, fans, blowers, machine tools, pumps, and industrial equipment in **non-combustible** dusty, dirty environments. 56 C-face end-mounted models are for use on commercial pumps, speed reducers, and other equipment designed for direct connection.



**Type:** Capacitor-start
**Bearings:** Double-shielded ball
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

(*) NEMA 56Z frame motors have nonstandard 1/2" diameter shaft with flat.

**CAUTION: Not for fans in unattended areas.**

**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

## GE BRAND, CAPACITOR-START, CAPACITOR-RUN, 60/50 Hz, CRADLE BASE

**Typical Uses:** High efficiency performance on pumps, blowers, air compressors, machinery, and other heavy-duty, hard-starting equipment.

**Special Features:** NEMA service factors provide a reserve margin for applications where intermittent overloading or fluctuating (high/low) voltage conditions may occur. Dual capacitors.

**Volts:** 60/50 Hz Energy $aver™ models are 100-120/200-240 volts

**Bearings:** Ball

**Enclosure:** Open dripproof

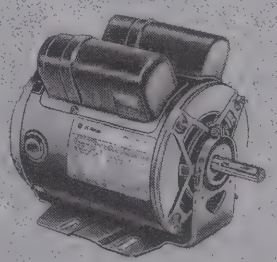
**Insulation Class:** B

**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CW/CCW

**Finish:** Gray



**Brand:** GE

(*) Suitable for 50 Hz operation at nameplate HP and service factor. (✓) Denotes energy efficient product.

# 3-PHASE 60/50 Hz MOTORS

## DAYTON BRAND, 3-PHASE

- **NEMA service factors provide a reserve margin for intermittent overloading or fluctuating (high/low) voltage conditions**
- **NEMA Design B**

**Typical Uses:** Designed for operating industrial-type sewing machine clutches. Also used for other belt-driven applications where 3-phase power is supplied.

**Bearings:** Double-shielded ball

**Mounting:** Cradle base

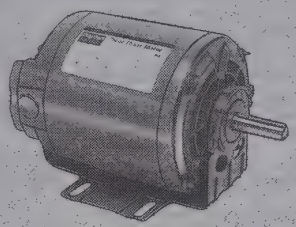
**Enclosure:** Open dripproof

**Windings:** Copper

**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CW/CCW



**Finish:** Gray

**Brand:** Dayton

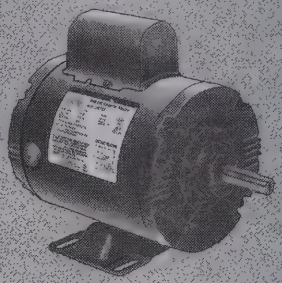
# INSTANT REVERSE MOTORS

## DAYTON BRAND

- **Reversing device is built into motor, no relay required**
- **Maximum cycling rate 5 times per minute**

**Typical Uses:** Mechanical doors, gates, hospital beds, hoists, and other equipment that require remote control instant reversibility. 5-Wire hook up.



**NOTE:** No. 2X469 DPDT toggle switch with On/Off/On action is recommended for controlling these motors. Order No. 2X469 separately from page 558

**Type:** Capacitor-start
**Bearings:** Prelubricated, double-shielded ball
**Mounting:** Rigid welded base
**Enclosure:** Open dripproof
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** Instant reverse
**Finish:** Gray
**Brand:** Dayton

## HIGH TORQUE, DAYTON BRAND

- Made in USA
- Heavy-duty design provides dependable service for severe farm applications
- Gasketed capacitor covers, conduit box, and shaft slingers provide added protection against dirt and moisture
- Sealed ball bearings on 56 and 140 frames; double-shielded ball on 180 and 210 frames with moisture-resistant grease effective at temperatures to -40°F to help provide long life
- All copper windings

**Type:** Capacitor-start and capacitor-start/capacitor-run
**Bearings:** Ball
**Mounting:** Rigid welded base
**Enclosure:** TEFC
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Green
**Brand:** Dayton

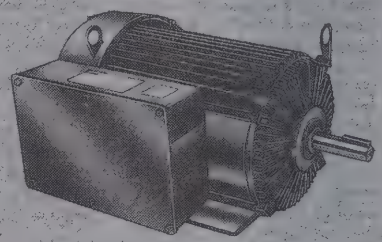
# FARM DUTY MOTORS

## EXTRA HIGH TORQUE, DAYTON BRAND

- Made in USA
- Extra high torque motors have typical starting torque 300-400% of full-load torque
- Gasketed capacitor cover and conduit box and shaft slinger provide added protection
- Sealed ball bearings on 140 frames; double-shielded ball on 180 and 210 frames with moisture-resistant grease effective at temperature to -40°F to provide long life
- Regreasable shaft bearings on 182 frame and above



**Typical Uses:** Designed for severe farm applications which require motors to start under fully loaded conditions. Used in conveyors, silo unloaders, barn cleaners, compressors, and manure pumps.

**Type:** Capacitor-start and capacitor-start/capacitor-run
**Bearings:** Ball
**Mounting:** Rigid welded base
**Enclosure:** TEFC
**Thermal Protection:** Manual
**Insulation Class:** F
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Green
**Brand:** Dayton

### IF YOU'RE IN A BIND, CALL GRAINGER

If it's an emergency, chances are Grainger's got the items you need today. Grainger has more than 350 well-stocked branches nationwide. So you can replace, build, or repair it right away. And we're conveniently located. To find the branch nearest you, check the Branch Locations listed in the front of this catalog.

## POULTRY FEED AUGER DRIVE MOTORS

- For new and replacement use on poultry feed auger-drive systems
- Special mounting flange assembles easily to auger systems manufactured by GSI, Cumberland, Chore-Time, and others
- Special guard on rotary switch protects against high-speed back-drive condition
- Capacitor-start models have shaft extensions out fan guard for hand cranking
- All copper windings

**Type:** Split-phase and capacitor-start
**Bearings:** Ball
**Mounting:** Flange and base
**Enclosure:** TEFC and TENV
**Thermal Protection:** Manual
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

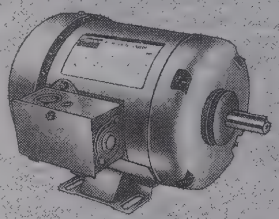
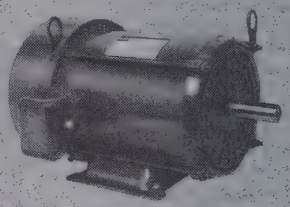
# FARM DUTY MOTORS

## 3-PHASE AUGER MOTORS



- **T frame models are NEMA design B**
- **Gasketed conduit box and shaft slinger provide added protection**
- **Double-shielded ball bearings with low temperature grease**
- **All copper windings**

**Typical Uses:** For driving air compressors, conveyors, augers, pumps and other farm equipment where 3-phase power is available.



**Type:** 3-phase
**Bearings:** Ball
**Mounting:** Rigid base
**Enclosure:** TEFC
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Green

## GE BRAND, 3-PHASE CENTER PIVOT IRRIGATION MOTORS

- **NEMA 56 C-face assembles directly to geardrive**
- **Drain holes in shaft endshield**
- **Rainshield helps resist corrosion from the high moisture and chemical environment of irrigation systems**

**Typical Uses:** Designed specifically for powering center pivot irrigation systems.

**Type:** 3-phase
**Bearings:** Ball
**Mounting:** C-face
**Enclosure:** TEFC
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** GE

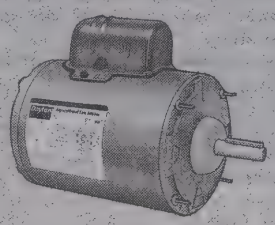
# FARM DUTY MOTORS

## DIRECT-DRIVE POULTRY FAN MOTOR

- **Cup shaped slinger and gasket capacitor cover provide added protection against dust and dirt**
- **Sealed ball bearings**
- **Corrosion-resistant bearing caps**
- **All copper windings**

**Typical Uses:** Direct-drive exhaust and ventilation fans operating in poultry and livestock houses. Direct replacement for Dayton direct-drive poultry fans.



**Type:** Single phase and three-phase
**Bearings:** Ball
**Enclosure:** TEAO
**Thermal Protection:** None; Auto on No. 4M644
**Insulation Class:** B
**Ambient:** 40°C

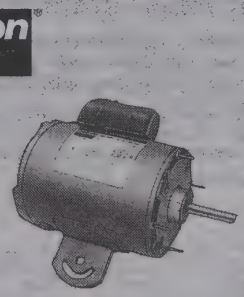
## PSC ADJUSTABLE SPEED MOTORS

- **Shaft slinger and gasketed conduit box and capacitor cover provide added protection against moisture and dirt**
- **Designed for adjustable speed operation with optional solid state Triac-type controller No. 4C929 at 115V or No. 4C931 at 230V**
- **All copper windings**
- **Supplied with 5/8" bushing**



**Typical Uses:** Exhaust fans operating in livestock confinements, or other dusty, dirty noncombustible environments. Not intended for mechanical applications.

**Type:** Permanent split capacitor
**Bearings:** Ball
**Enclosure:** TEAO
**Thermal Protection:** Auto
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous air-over

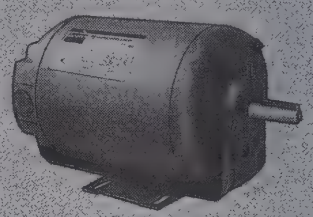
# FARM DUTY MOTORS

## SPLIT-PHASE AGRICULTURAL FAN MOTORS

- **Gasketed conduit boxes and shaft slinger help protect against water and dirt**
- **Dual voltage ratings and reversible rotation provide added interchangeability in a variety of fan applications**
- **All copper windings**
- **No. 6K791 has extended fan bolts for fan guard mounting**



**Typical Uses:** Exhaust fans operating in poultry and livestock houses. Also used for other fan and blower applications in locations with a dusty, dirty, **noncombustible** environment.

**Type:** Split-phase
**Bearings:** Double-shielded ball
**Enclosure:** TEAO
**Thermal Protection:** Auto
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

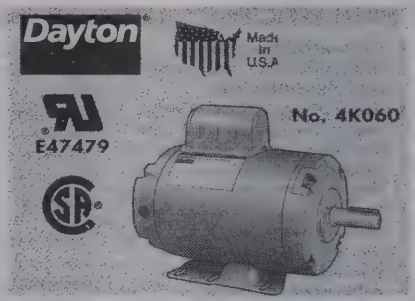
## MOTOR PROTECTION

Motors that start automatically (eg. thermostat controlled), that are located remotely or unattended, or that are out-of-sight of the operator, must be protected against dangerous overheating due to failure-to-start or overloading. This protection may be a separate overcurrent device (eg. motor starter) complying with Article 430 of the National Electrical Code (NEC), a thermally protected motor (integral motor protection), or an impedance protected motor.

Motors with automatic reset thermal protection MUST NOT be used where automatic or otherwise unexpected starting of the motor could be hazardous. Where such a hazard exists, always use a Manual-Reset thermally protected motor. Applications where automatic restarting could be hazardous include compressors, conveyors, power tools, farm equipment, and some fans and blowers.



# FARM DUTY MOTORS

## AERATION FAN MOTORS

- 1/2 to 3 HP
- Keyed shaft drilled on center 1" deep and tapped 1/4-20"-UNC for fan mounting
- Nos. 4K055 and 4K057 have shafts with flats
- Sealed ball bearings
- All copper windings

**Typical Uses:** Replacement in tube axial fan grain aeration systems made by Dynavent, Farm Fan, Aero-Vent, and other manufacturers.

**Type:** Capacitor-start
**Bearings:** Ball
**Mounting:** Rigid welded base
**Enclosure:** TEAO
**Thermal Protection:** Auto
**Ambient:** 50°C
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

(*) Capacitor-start/capacitor-run.

## CROP DRYER MOTORS

- Special service factor design provides reserve margin that allows individual models to replace motors in a range of HP ratings
- Keyed shaft drilled on center 1" deep and tapped 1/4"-20 UNC for fan mounting
- Thermostat thermal protection
- Extra long 40" leads
- All copper windings
- No. 4K094 has capacitor mounted separately

**Typical Uses:** Replacement in air-over fan crop dryers where axial fan is mounted directly to the motor shaft.

**Type:** Capacitor-start/capacitor-run
**Bearings:** Shielded ball
**Mounting:** Rigid welded base
**Enclosure:** Open dripproof
**Service Factor:** 1.0
**Thermal Protection:** Thermostat (T-Stat)
**Insulation Class:** F
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Green
**Brand:** Dayton

**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

## HATCHERY/INCUBATOR FAN MOTOR

- **1" Extended clamp screws for fan shroud mounting**
- **Shaft diameter 1/2" x 2½" long with full length flat**
- **Capacitor mounted on the motor**
- **Centrifugal switch for tripping alarm circuit if motor stops**
- **Shaft slinger to prevent dirt and moisture entering bearing system**

**Typical Uses:** Designed for use in Jamesway and Chickmaster hatchers.

**Type:** Permanent split capacitor
**Bearings:** Double sealed ball
**Enclosure:** TEAO
**Thermal Protection:** Auto
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW facing shaft
**Finish:** Gray
**Brand:** GE

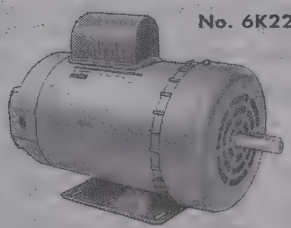
## DUST-TIGHT MOTORS

- **External die-cast aluminum fan on shaft end helps keep dirt from obstructing operation**
- **Double-sealed bearing on shaft end double-shielded bearing opposite shaft end**
- **All copper windings**



**Typical Uses:** Designed for use on farms to power conveyors, tools, pumps, blowers, and other equipment in dusty, dirty areas. Not for use where explosion-proof motors are required.

**Type:** Capacitor-start
**Bearings:** Ball
**Mounting:** Rigid welded base
**Enclosure:** TEFC
**Thermal Protection:** Manual
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW

# AIR COMPRESSOR MOTORS

## DAYTON BRAND

- **Heavy-duty designs for use on compressors used by contractors and other demanding environments**
- **Light-duty designs for use on compressors in less demanding environments such as residential and commercial use**
- **Light-duty designs up to 2 HP operate on 15 amp branch circuit, suitable for residential applications**
- **Electrical characteristics are designed to provide high breakdown torque to ensure dependable service**
- **Mechanical features are designed to provide long life in high tension, belt-type loads which typically shorten motor life**

**Typical Uses:** New and direct replacements for belt-drive air compressors such as Dayton, Speedaire, Champion, Campbell Hausfeld, Sanborn, and others.

**Type:** Capacitor-start
**Bearings:** Double-shielded ball
**Mounting:** Rigid welded base
**Enclosure:** Open dripproof
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Black
**Brand:** Dayton

No. 6K748

**NOTE: Use on other applications voids warranty.**

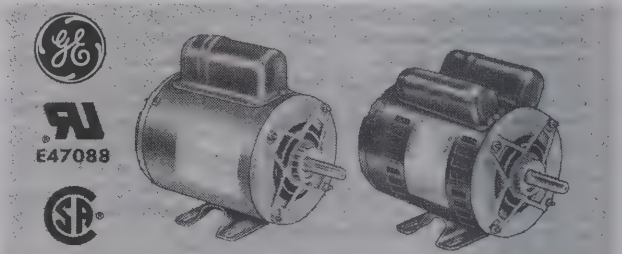
(*) Capacitor-start/capacitor-run. (†) All copper windings. (#) Mounting holes slotted to match 56, 56H, 143T, and 145T frames.



**CAUTION: Refer to page 6 proper thermal protection, and other motor selection information.**

## GE BRAND, COMMERCIAL DUTY

- **For commercial air compressor applications**
- **Bearing systems designed to provide long life**

**Typical Uses:** Direct replacement on selected air compressor applications including Dayton, Campbell-Hausfeld, Sanborn, and others. Use on other applications voids warranty.

**Type:** Capacitor-start
**Mounting:** Rigid welded base
**Enclosure:** Open
**Thermal Protection:** Manual or auto
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Compressor
**Rotation:** CCW facing shaft end
**Finish:** Black
**Brand:** GE

# CLOSE-COUPLED PUMP MOTORS

Dayton®

E47479 LR6153

No. 4FN81

No. 3N787

- **Oversized ball bearings with locked end shaft construction**
- **140 frame, rigid welded base; 182 thru 215 frame bolted base**
- **All 3-phase models listed usable on 50 Hz, 190/380V, 1.0 service factor**
- **All copper windings**

**Typical Uses:** Centrifugal close-coupled pumps where the pump impeller is mounted directly to the motor shaft using a JM or JP shaft.

**Type:** Single and 3-phase

**Bearings:** Ball

**Mounting:** Face with base

**Enclosure:** TEFC

**Thermal Protection:** None

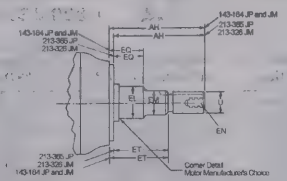
**Insulation Class:** F

**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CW/CCW

**Finish:** Gray



**Brand:** Dayton

**Replacement Parts Available**
**1-800-323-0620**

**CAUTION:**
**Not for fans in unattended areas.**
Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

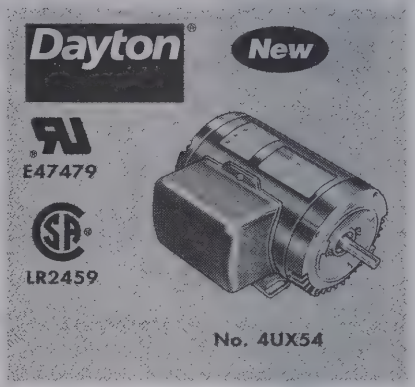
# PRESSURE WASHER AND CAR WASH MOTORS



## PRESSURE WASHER PUMP MOTORS

- NEMA service factors provide reserve margin
- Water slinger on shaft helps protect bearing
- Double shielded 203 ball bearings
- Dual voltage
- All copper windings

**Typical Uses:** For new and replacement use in both hot and cold water high pressure washer applications. Corrosion-resistant features to protect against the harsh conditions of this application.

**Type:** Capacitor-start
**Bearings:** Double-shielded ball
**Enclosure:** Open dripproof
**Thermal Protection:** Manual
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

Replacement Parts Available
1-800-323-0620

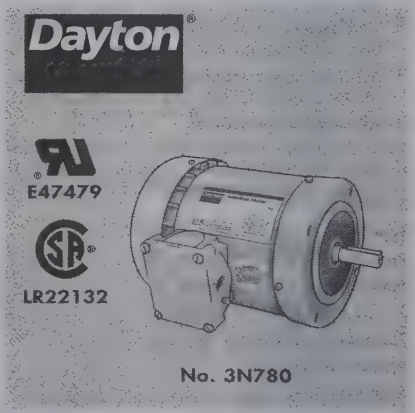
(*) Capacitor-start, capacitor-run with run capacitor mounted externally. (†) Nonconforming NEMA "BA" design.



## WET ENVIRONMENT/CAR WASH MOTORS

- No. 416 stainless steel shaft with lip seals at both ends
- Double gasketed cast aluminum conduit box with drain holes and plugs
- Double-dipped and baked copper windings
- Cast-iron C-face with four drain holes and plugs
- Durable gray epoxy finish on outside with stainless steel hardware

**Typical Uses:** For extended life in car washes or other wet environments where the motor is constantly exposed to water, chemicals, and harsh detergent.

**Type:** 3-phase
**Bearings:** Sealed ball with moisture-resistant grease
**Mounting:** C-face, no base
**Enclosure:** TEFC
**Thermal Protection:** Thermostat
Insulation Class: F
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

# PAINT-FREE WASHDOWN MOTORS

## PAINT-FREE WASH DOWN MOTORS

- **"VBX" INPRO/SEAL® bearing isolator on drive end provides protection against water and contaminants**
- **300 Series stainless steel shaft, frame and base**
- **Double-contact, double-sealed ball bearings with rust-preventative grease provide added protection against dirt and moisture**
- **T-type drains**
- **Oversized, laser etched nameplate**
- **Nitrile gasket on conduit box prevents moisture and chemicals from entering the motor**
- **Paint-free cast aluminum endshields and conduit box**
- **Double-dipped and baked copper windings**

**Typical Uses:** For extended life on equipment in food, beverage, or chemical processing plants where motor is constantly exposed to high pressure washdowns or other high humidity or wet environments.

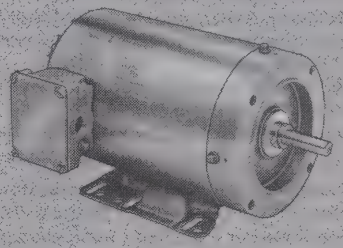
**Type:** 3-Phase

**Bearings:** Double-sealed ball with moisture-resistant and rust-inhibitive grease

**Mounting:** C-Face with base

**Enclosure:** TENV

**Thermal Protection:** None



**Insulation Class:** F

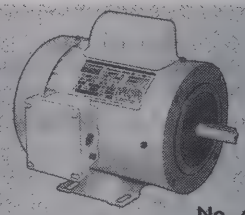
# WASHDOWN MOTORS

- **USDA approved corrosion-resistant white epoxy primer and paint**
- **Interior of all parts treated with rust inhibitor providing additional protection against moisture and corrosion**
- **Stainless steel drain plugs allow for easy drainage of condensation and moisture**
- **Double-contact, double-sealed ball bearings with rust-preventative grease provide added protection against dirt and moisture**
- **White nitrile gasket material prevents moisture and chemicals from entering motor**
- **Double-dipped and baked copper windings**
- **No. 303 stainless steel shaft with V-ring rotating seal**
- **Complies with BISSC, 2A Dairy Standard and NEMA definition MG1-1.26.5 standard for waterproof motors**

**Typical Uses:** For extended life on equipment in food, beverage, or chemical processing plants where motor is constantly exposed to high pressure washdowns or other high humidity or wet environments.

**Type:** Permanent split capacitor, capacitor-start, and 3-phase
**Bearings:** Double-sealed ball with moisture-resistant and rust-inhibitive grease
**Mounting:** Face, base, or yoke
**Enclosure:** TENV, TEFC, or TEAO
**Thermal Protection:** Thermostat (T-Stat) on 3-phase and capacitor-start; auto on PSC motors
**Ambient:** 40°C
**Insulation Class:** F
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** White epoxy
**Brand:** Dayton



**CAUTION:** Refer to page 6 for proper thermal protection and other motor selection information.

(†) Operable at 1425 RPM, 190/380V, 50 Hz, 1.0 service factor. (*) Meet efficiency for Energy Policy Act of 1992.

DEFINITE PURPOSE MOTORS

# WASHDOWN MOTORS

- Double-dipped and baked copper windings
- No. 303 stainless steel shaft with V-ring seal
- USDA approved white paint to meet sanitary requirements
- 3-phase motors feature Energy Saver design
- Full protective neoprene gaskets on conduit box, capacitor covers, and lead entry
- Easily removed plugs permit drainage of condensation

**Typical Uses:** For extended life in food, beverage, or chemical processing plants where motor is constantly exposed to high pressure washdowns or other high humidity or wet environments.

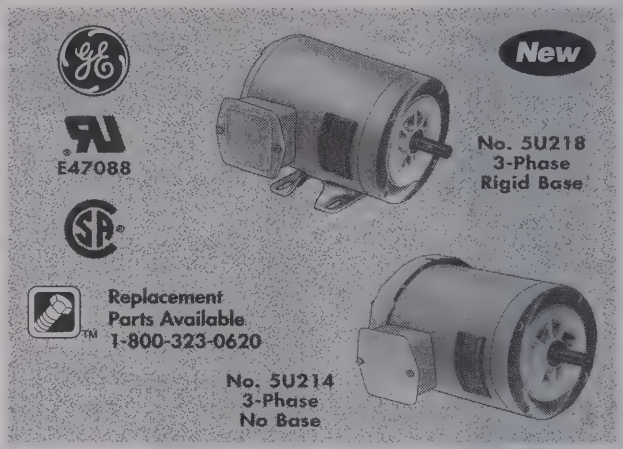
**Type:** Capacitor-start or 3-phase

**Bearings:** Double-sealed ball

**Thermal Protection:** None

**Insulation Class:** F

**Ambient:** 40°C



**Duty:** Continuous

**Rotation:** CW/CCW

**Finish:** White

**Brand:** GE

**CAUTION: Not for fans in unattended areas.** Refer to page 6 for UL507 Standard, proper thermal protection, and other motor selection information.

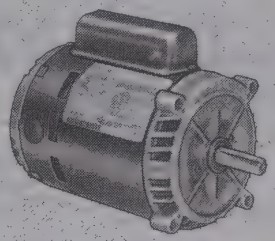
# CAPACITOR-START INDUSTRIAL PUMP MOTORS



## GE BRAND, OPEN DRIPPROOF, NO BASE

- **Shaft slinger and gasketed conduit box protect against moisture and contaminants**
- **56C frame steel keyed shaft**
- **56J frame stainless steel shaft 7/16"-20 UNF-2A threaded 11/16" from end**

**Typical Uses:** Industrial and commercial pumps and centrifugal and hydraulic industrial compressors requiring NEMA 56C or 56J face mounting.

**Type:** Capacitor-start
**Bearings:** Double-shielded ball
**Mounting:** Face
**Enclosure:** Open dripproof
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray
**Brand:** GE

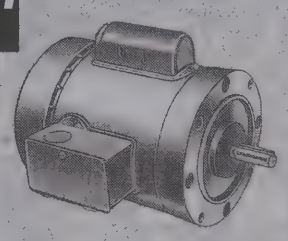
(*) Capacitor-start/capacitor-run; includes 16 cubic inch oversized conduit box. (†) Motor is rated 50 Hz.

**CAUTION: Refer to page 6 for proper thermal protection, and other motor selection information.**



## DAYTON BRAND, TEFC, NO BASE

- **Externally located capacitor**
- **Shaft slinger, gasketed cover, and conduit box protect against dirt and moisture**
- **56C frame steel keyed shaft; 56J frame stainless steel shaft 7/16"-20 UNF-2A RH threaded 11/16" from end**
- **All copper windings**

**Typical Uses:** Jet pumps, industrial/centrifugal pumps, and other equipment requiring NEMA 56C or 56J mounting.

**Type:** Capacitor-start
**Bearings:** Double-shielded ball
**Mounting:** Face
**Enclosure:** TEFC
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray
**Brand:** Dayton

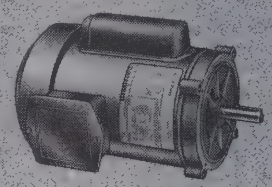
# CAPACITOR-START AND 3-PHASE, INDUSTRIAL PUMP MOTORS



## GE BRAND, TEFC, CAPACITOR-START

- **56C frame steel keyed shaft; 56J frame with stainless steel shaft with 7/16"-20 UNF-2A threaded 11/16" from end**
- **Shaft slinger and gasketed conduit box protects against moisture and contaminants**

**Typical Uses:** Industrial and commercial pumps, and centrifugal and hydraulic industrial compressors requiring NEMA 56C or 56J face mounting.

**Type:** Capacitor-start
**Bearings:** Double-shielded ball
**Enclosure:** TEFC
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray
**Brand:** GE

# 3-PHASE INDUSTRIAL PUMP MOTORS

## DAYTON BRAND, 3-PHASE, TEFC

- **Shaft slinger and gasketed conduit box protect against dirt and moisture**
- **56C frame steel keyed shaft; 56J frame stainless steel shaft 7/16"-20 UNF-2A RH threaded 11/16" from end**
- **Operable on 50 Hz**
- **All copper windings**

**Typical Uses:** Jet pumps, industrial/centrifugal pumps, and equipment requiring NEMA 56C or 56J mounting.
**Type:** 3-phase
**Bearings:** Double-shielded ball
**Mounting:** Face/base
**Enclosure:** TEFC
**Thermal Protection:** None
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray
**Brand:** Dayton

# JET PUMP MOTORS

- **NEMA service factors up to 1.85 provide reserve margin for intermittent overloading**
- **NEMA 56C frame carbon steel shaft with key**
- **NEMA 56J frame stainless steel shaft 7/16"-20 UNF-2A RH threaded 11/16" from end**
- **Locked shaft end ball bearing provides maximum thrust capacity**

**Typical Uses:** Jet pump water systems, centrifugal pumps, and other applications requiring NEMA 56C or 56J mounting face.

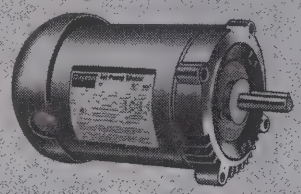
**Type:** Capacitor-start

**Mounting:** Horizontal or vertical, shaft down.

**Enclosure:** Open dripproof

**Thermal Protection:** Auto

**Ambient:** 40°C



**Duty:** Continuous

**Finish:** Gray

**Brand:** Dayton

(*) Operable at 50 Hz at rated HP and service factor, 110/220V, 2850 RPM. (#) Rainshield included for vertical mounting. (†) Two-compartment design.

**CAUTION: Refer to page 6 proper thermal protection and other motor selection information.**

# JET PUMP MOTORS

- **Two-compartment design protects components**
- **Enlarged/easy terminal lead**
- **56C frames have 416 stainless steel shaft**
- **56J frame have stainless steel shaft 7/16"-20 UNF-2A RH threaded 11/16" from end; square flange are 1/2"-20 UNF-2A RH threaded 1/2" from end**
- **Locked double-sealed ball bearings**
- **Voltage change plug for mistake-free voltage connection**
- **1/2 and 2 HP motors are capacitor-start, capacitor-run**

**Typical Uses:** Jet pump water systems, centrifugal pumps, and other applications requiring NEMA 56C or 56J mounting faces.

**Type:** Capacitor-start and split-phase

**Bearings:** Ball

**Mounting:** Horizontal or vertical, shaft down. Dripproof when mounted horizontally only. Rainshield needed for vertical dripproof applications (not included).

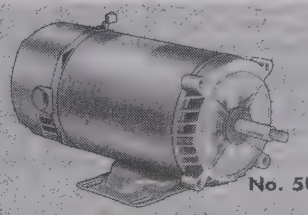
**Enclosure:** Open dripproof

**Insulation Class:** B

**Thermal Protection:** Auto

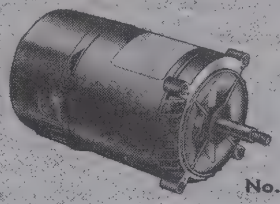
**Ambient:** 50°C (except Nos. 2K403 and 2K404 are 40°C)

**Duty:** Continuous



**Rotation:** CCW facing shaft

**Finish:** Black



**Brand:** GE

**Replacement Parts Available**
**1-800-323-0620**

# JET PUMP MOTORS

- **NEMA service factors up to 1.85 provide reserve margin for intermittent overloading**
- **NEMA 56C frame carbon steel shaft with key**
- **56J frame with 416 stainless steel shaft 7/16"-20 UNF-2A RH threaded 11/16" from end**
- **Locked shaft end bearings provide maximum thrust capability**
- **Rainshield included for vertical mounting**
- **All copper windings**

**Typical Uses:** Jet pump water systems, centrifugal pumps and other applications that require a NEMA 56J mounting face.
**Type:** Split-phase, capacitor-start, and 3-phase
**Mounting:** Horizontal or vertical, shaft down
**Enclosure:** Open dripproof
**Thermal Protection:** Auto (except 3-phase motors are none)
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray
**Brand:** Dayton

# SQUARE FLANGE SWIMMING POOL PUMP MOTORS

- All copper windings
- Unique reverse air flow design minimizes corrosive elements on the shaft end
- Easy access two-compartment design
- Convenient 12 and 3 o'clock conduit fittings
- Rust-resistant stainless steel right hand threaded shaft; special sealer on rotor inhibits rust in off-season
- Large body diameter to improve heat dissipation
- Dichromate-plated bearing lock tabs allow easier bearing removal, eliminate need for plate alignment and reduce corrosion
- 1081 Approvable

**Typical Uses:** In-ground swimming pool pumps. Square flange is designed for direct replacement of many popular pumps.

**Type:** Capacitor-start

**Bearings:** Ball

**Mounting:** Flange

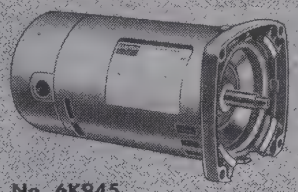
**Enclosure:** Open dripproof

**Thermal Protection:** Auto

**Insulation Class:** B

**Ambient:** 40°C or 50°C

**Duty:** Continuous



**Rotation:** CCW facing shaft

**Finish:** Black

**Brand:** Dayton

# SQUARE FLANGE SWIMMING POOL PUMP MOTORS

- **Two-compartment design protects components**
- **Enlarged terminal lead routing area**
- **NEMA 56YZ frame with special 303 stainless threaded shaft 1/2"-20 UNF-2A RH threaded 1/2" from end**
- **Encapsulated voltage change plug design for mistake-free voltage connection**
- **Locked double-sealed ball bearings**
- **1081 approvable**

**Typical Uses:** Swimming pool pump applications only. Square flange NEMA 56YZ frame mounting with 48 frame motor diameter allows motors to be used as direct replacement on selected pumps.

**Type:** Capacitor-start or PSC
**Bearings:** Ball
**Mounting:** Flange, horizontal or vertical shaft down
**Enclosure:** Open dripproof
**Thermal Protection:** Auto
**Insulation Class:** B
**NEMA Frame:** 56YZ on capacitor start; 56Y on PSC
**Ambient:** 50°C
**Duty:** Continuous
**Rotation:** CCW facing shaft
**Finish:** Black
**Brand:** GE

# SWIMMING POOL PUMP MOTORS

- **Two-compartment design protects components**
- **Encapsulated voltage change plug design for mistake-free voltage connection**
- **56C frame 303 stainless steel shaft; 56J frame 303 stainless steel shaft 7/16"-20 UNF-2A RH threaded 11/16" from end**
- **Enlarged/easy terminal lead routing**
- **Locked double-sealed ball bearings**
- **Easy access to shaft to hold impeller**
- **1081 approvable**

**Typical Uses:** In-ground and above ground swimming pool and hot tub pumps. Also used on jet and centrifugal pumps and similar applications requiring a NEMA 56C or 56J face mounting.

**Type:** Capacitor-start or PSC
**Bearings:** Ball
**Mounting:** Face, horizontal or vertical, shaft down
**Enclosure:** Open drip-proof
**Thermal Protection:** Auto
**Insulation Class:** B
**Ambient:** 50°C
**Duty:** Continuous
**Rotation:** CCW facing shaft
**Finish:** Black
**Brand:** GE

## CAST-IRON FLANGE SWIMMING POOL PUMP MOTORS

- **Cast-iron flange provides maximum protection against effects of pool chemicals**
- **NEMA service factors up to 1.6 provide reserve margin for intermittent overloading**
- **Copper windings have moisture-resistant insulation**
- **56C frame steel shaft with key; 56J frame stainless steel shaft 7/16"-20 UNF-2A RH threaded 11/16" from end**
- **Easy access two-compartment design**
- **1081 approvable**

**Typical Uses:** In-ground and above ground swimming pool and hot tub pumps. Also used on jet and centrifugal pumps and similar applications requiring a NEMA 56C or 56J face mounting.
**Type:** Capacitor-start
**Bearings:** Double-sealed ball
**Mounting:** Face, horizontal or vertical, shaft down
**Enclosure:** Open dripproof
**Ambient:** 50°C
**Insulation Class:** B
**Thermal Protection:** Auto
**Duty:** Continuous
**Finish:** Gray
**Brand:** Dayton

**CAUTION: Refer to page 6 for proper thermal protection and other motor selection information.**

# ALUMINUM FLANGE SWIMMING POOL PUMP MOTORS

- **Unique reverse air flow design minimizes corrosive elements on the shaft end**
- **Easy access two-compartment design is contractor friendly**
- **Dichromate-plated bearing lock tabs allow easier bearing removal, eliminate need for plate alignment and reduce corrosion**
- **Rust resistant 416 stainless steel shaft; special sealer on rotor inhibits rust in off-season**
- **Large 6⅜" barrel diameter to improve heat dissipation**
- **All copper windings**
- **1081 approvable**

**Typical Uses:** In-ground swimming pool and hot tub pumps. Designed for ease of direct replacement of many popular pumps.

**Type:** Capacitor-start

**Bearings:** Double-sealed ball

**Mounting:** Face, horizontal or vertical shaft down

**Enclosure:** Open dripproof

**Thermal Protection:** Auto

**Insulation Class:** B

**Ambient:** 50°C

**Duty:** Continuous

**Rotation:** CCW facing shaf

**Finish:** Black

**Brand:** Dayton

# SPA AND WHIRLPOOL PUMP MOTORS

## DAYTON BRAND, SPA AND WHIRLPOOL BATH AND ABOVE GROUND POOL MOTORS

- **Easy access two-compartment design**
- **Convenient 12 or 3 o'clock conduit fittings**
- **Rust-resistant 1/2" dia. shaft 3/8"-16 UNC-2A RH threaded 9/16" from end**
- **1081 and 1795 approvable**

**Typical Uses:** On pumps for spas, whirlpools, hot and jetted tubs. Sturdy 14 gauge slotted base on three inch centers. Replaces many popular spa and tub pump motors.

**Type:** Capacitor-start and split-phase

**Mounting:** Rigid base with four 8-32 extended thru-bolts

**Enclosure:** Open dripproof

**Service Factor:** 1.0

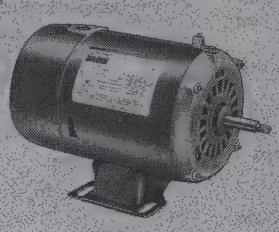
**Thermal Protection:** Auto

**Insulation Class:** B

**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CCW facing shaft



**Finish:** Black

**Brand:** Dayton

# CARBONATOR PUMP MOTORS

## DAYTON BRAND

- **Direct replacements for most carbonator pump motors**
- **1144 shaft steel**
- **Sleeve bearings suitable for all-angle operation**
- **Reversible rotation by easy reconnection**

**Typical Uses:** Specially designed endshield has extended hub and short, slotted 5/8" dia. shaft for close coupling carbonator pump to motor. Also used for liquid transfer pumps, vending machine pumps, and other close-coupled pump applications.

**Type:** Split-phase
**Bearings:** Sleeve
**Mounting:** Extended hub and cradle or rigid base
**Enclosure:** Open dripproof
**Thermal Protection:** Auto
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

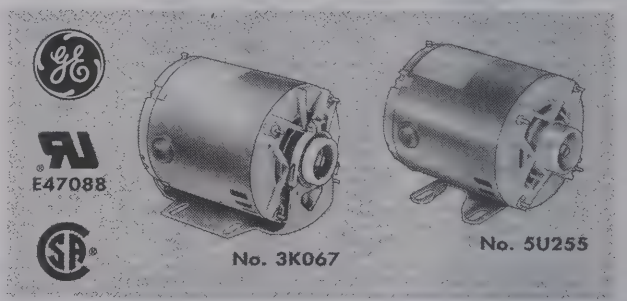
(*) Motor designed for 50 or 60 Hz operation.

**CAUTION: Not for fans in unattended areas.**



**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

## GE BRAND

- **Threaded conduit hole**
- **Reversible rotation by easy reconnection**

**Typical Uses:** Specially designed endshield has extended hub and short, slotted 1/2" diameter shaft for close coupling the carbonator pump to the motor. Also used for liquid transfer pumps, vending machine pumps, and other close-coupled pump applications.

**Type:** Split-phase
**Mounting:** Extended hub and cradle base with studs
**Enclosure:** Open dripproof
**Service Factor:** 1.0
**Thermal Protection:** Auto
**NEMA Frame:** 48Y
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** GE

(*) Motor designed for 50 or 60 Hz operation. (†) Double shaft—1/2 x 1.50" rear extension.

## DAYTON BRAND, SUMP PUMP MOTOR

**Typical Uses:** Direct replacements for OEM supplied motor on sump pumps. Shaft endshield has extended hub for mounting directly on 1½ or 1¾" OD pump support columns.

Use on other applications, such as glass washers, voids warranty.

**Type:** Split-phase
**Mounting:** Hub
**Service Factor:** 1.0
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Black
**Brand:** Dayton

## DAYTON BRAND, GLASS WASHER MOTOR

- **Gasketed conduit box**
- **Drain hole in shaft end endshield**
- **Double-sealed ball bearings with moisture-resistant grease**
- **Note: recommended for use with GFCI switch motor control No. 5Z974**

**Typical Uses:** Replacement on most OEM glass washers.

**Type:** Split-phase
**Bearings:** Ball
**Mounting:** Vertical shaft down on metal standpipe
**Enclosure:** TENV
**Service Factor:** 1.0
**Thermal Protection:** None
**Insulation Class:** A
**Ambient:** 40°C
**Duty:** Continuous
**Finish:** Gray
**Brand:** Dayton

MANY BRANDS OF POWER TOOLS AVAILABLE

Milwaukee® BLACK&DECKER® PORTER-CABLE SKIL WILTON®

# SINGLE-PHASE SUBMERSIBLE PUMP MOTORS

- **Corrosion-resistant stainless steel shell**
- **Hermetically sealed stator**
- **Water lubricated carbon sleeve and kingsbury-type thrust bearings**
- **Built-in lightning protection on 4" motors**
- **Lubricant replenishing filtered check valve**
- **Pressure equalizing diaphragm**
- **Replaceable motor lead wire assembly**
- **Splined, stainless steel shaft**
- **UL Recognized (E79319); ANSI/NSF Certified (MH18335/FDNP)**

**Typical Uses:** Motors manufactured for dependable operation in wells with 4" or 6" inside diameter or larger.

**CAUTION:**
Refer to page 6 for proper thermal protection and other motor selection information.

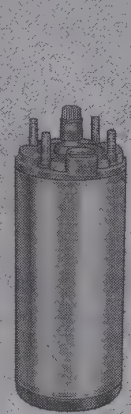
**Type:** 2-wire split-phase; 3-wire capacitor-start

**Mounting:** NEMA mounting dimensions

**Enclosure:** TENV sealed watertight

**Duty:** Continuous in 86°F (30°C) water at 1/4 ft./sec. for 4" motors, 1/2 ft./sec. for 6" motors.

**Rotation:** CCW facing shaft end



**Lead Wire Assembly:** 1/3 thru 2 HP motors include 48" assembly; 3 thru 5 HP 4" motors include 100" assembly; all 6" motors include 150" assembly. All lead wire assemblies include a ground wire.

**Control Boxes:** Use either a CSIR or CSCR control box. CSCR control boxes feature a reduction of noise, maximum service amps, and a run capacitor for higher efficiency. Deluxe CSCR box includes magnetic contactor. Recommended for water systems that utilize a pressure switch.

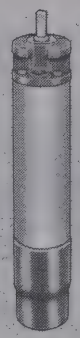
# 3-PHASE SUBMERSIBLE PUMP MOTORS

- **Corrosion-resistant stainless steel shell**
- **Hermetically sealed stator**
- **Water lubricated carbon sleeve and kingsbury-type thrust bearings**
- **Lubricant replenishing filtered check valve**
- **Pressure equalizing diaphragm**
- **Replaceable motor lead wire assembly**
- **Splined, stainless steel shaft**
- **UL Recognized (E79319); ANSI/NSF Certified (MH18335/FDNP)**

**Typical Uses:** Motors manufactured for operation in wells with 4 or 6" or larger inside dia.



**Type:** 3-wire, 3-phase
**Mounting:** NEMA mounting dimensions
**Enclosure:** TENV sealed watertight
**Duty:** Continuous in 86°F (30°C) water at 1/4 ft./sec. for 4" motors; 1/2 ft./sec. for 6" motors
**Rotation:** Must run CCW facing shaft when combined with pump for maximum pump pressure and capacity
**Lead Wire Assembly:** 1½ - 2 HP motors include 48" assembly; 3 thru 7½ HP 4" motors include 100" assembly; all 6" motors include 150" assembly. All lead wire assemblies include a ground wire.

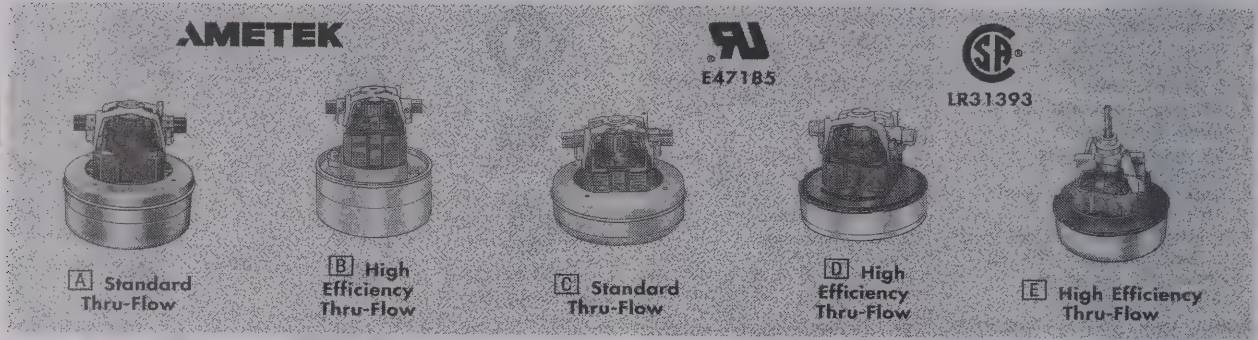
(*) Adjustable overload relay amp settings apply to approved types listed. Relay adjustment should be set at the specified SET amps, and only if tripping occurs with amps in all line measured to within nameplate maximum amps should the setting be increased, not to exceed the MAX. value shown.

**CAUTION:** **Refer to page 6 for proper thermal protection and other motor selection information.**



# AC/DC VACUUM MOTORS

## 5.7 INCH DIAMETER THRU-FLOW VACUUM MOTORS/BLOWERS

AMETEK

E47185

LR31393

A Standard Thru-Flow | B High Efficiency Thru-Flow | C Standard Thru-Flow | D High Efficiency Thru-Flow | E High Efficiency Thru-Flow

**Applications:** For replacing motors in canister vacuums, utility vacuums, spas, sprayer/foggers, air samplers, and commercial vacuums. For dry, clean air installations only.

**Features:** Permanently lubricated bearings. Copper windings.
**Mounting:** All position
**Enclosure:** Open
**Insulation Class:** A

**Ambient:** 40°C
**Duty:** Intermittent
**Average Life:** 500 hours
**Brand:** Ametek

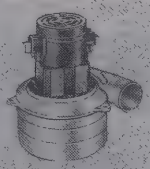
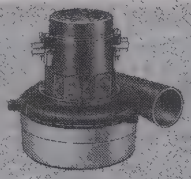
## REPLACEMENT BRUSH MECHANISMS

For Nos. 2M182, 2M192 thru 2M195, 2M198, 2M199, 2M201, 2M203, 2M265, 2M266, 2M267, and 2M420 thru 2M433.
**No. 1R236.** Shpg. wt. 0.1 lbs. List $6.30. Per Pair ..... **$5.89**



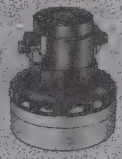
For Nos. 2M414 thru 2M419.
**No. 1R454.** Shpg. wt. 0.1 lbs. List $25.65. Per Pair ..... **$15.79**

For Nos. 2M173, 2M174, 2M178, 2M187, 2M188, and 2M202.
**No. 1R420.** Shpg. wt. 0.1 lbs. List $8.00. Per Pair ..... **$8.00**



For No. 2M179.
**No. 1R450.** Shpg. wt. 0.1 lbs. List $20.00. Per Pair ..... **$12.11**

# 5.7 INCH DIAMETER BYPASS AC/DC VACUUM MOTORS/BLOWERS



A
No. 4M921
Tangential Discharge

B
No. 2M430
Tangential Discharge

AMETEK

E47479 LR31393 (except Nos. 4M941 & 2M190)

C
No. 2M266 Acustek®
Peripheral Discharge

D
No. 2M195
Peripheral Discharge

E No. 4M957
Peripheral Discharge

**Applications:** Central, carwash, and utility vacuums; steam carpet cleaners; commercial/industrial vac systems; wet/dry uses.

**Features:** Permanently lubricated bearings. Acustek® models up to 10 dB quieter. Copper windings. All position mounting. Open enclosure. Class A insulation. No thermal protection. 40°C Ambient. Intermittent duty. 500 hours average life.

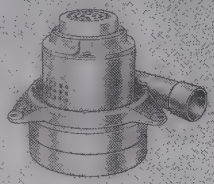
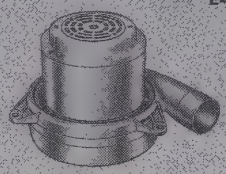
(*) Special Features: (1) Metal mounting brackets; (2) Thermoset brackets; (3) Air sealed bearing protection; (4) 1 7/8" inlet; (5) 1 1/2" inlet; (6) Double insulated; (7) Special fans (tapered). (8) High air flow for restricted ventilating conditions. (†) DC Volts.

# INDUSTRIAL/COMMERCIAL VACUUM MOTORS



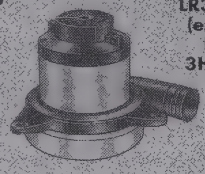
## 7.2 INCH DIAMETER BYPASS VACUUM MOTORS/BLOWERS

AMETEK

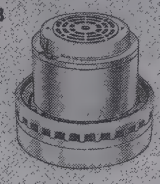


E47185

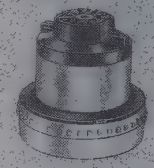
LR31393 (except No. 3HV26)



FOR REPLACEMENT BRUSH MECHANISMS, SEE PAGE 174



A No. 2M188 Tangential Discharge



B No. 2M174 Tangential Discharge

C No. 2M416 Tangential Discharge

D No. 2M173 Peripheral Discharge

E No. 2M414 Peripheral Discharge

- **Tangential or peripheral air discharge**
- **Copper windings**

**Typical Applications:** Central vacuums, steam carpet cleaners, carwash vacuums, and commercial/industrial vacuum systems.

**NOTE:** Thru flow vacuum motors are to be used in dry applications only. Bypass motors should not come in contact with foam, liquids, or moisture laden air. Applications should be designed to protect the motor's fan system, housing, and electric components.

**Bearings:** Ball
**Mounting:** All position
**Enclosure:** Open
**Thermal Protection:** None
**Insulation Class:** A
**Ambient:** 40°C
**Duty:** Intermittent
**Average Life:** 700 hours
**Brand:** Ametek

(*) Special Features: (1) Metal mounting brackets; (2) Thermoset brackets; (3) Air sealed bearing protection; (4) 2-inch inlet.

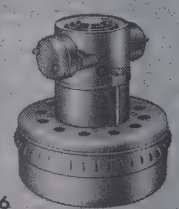
**CAUTION: Not for fans in unattended areas.**

**Refer to page 6 for UL Standard, proper thermal protection, and other motor selection information.**

## 7.5 INCH DIAMETER INDUSTRIAL/COMMERCIAL VACUUM MOTORS/BLOWERS

**Applications:** Commercial vacuums, dental evacuators, hopper loaders, and material handling and transfer systems.

**Features:** Permanently lubricated ball bearings, peripheral discharge, long life design, and copper windings.



**Bearings:** Ball
**Mounting:** All position
**Enclosure:** Open
**Thermal Protection:** None
**Insulation Class:** A (except Nos. 4M880 and 4M878 are Class B)
**Ambient:** 40°C
**Duty:** Intermittent
**Average Life:** 1000 hours
**Brand:** Ametek

AMETEK

E47185 LR31393

No. 4M876

## 5.7 INCH DIAMETER BRUSHLESS BLOWERS

- 50/60 Hz with continuous, long life operation
- Tangential discharge
- Aluminum construction
- Centrifugal fan system
- Brushless DC motor drive
- Low noise to power ratio
- Adjustable air performance
- Pressure or vacuum applications
- Compact size
- Air intake and exhaust tube
- Mechanical control features a built-in potentiometer
- Electronic control requires a remote 0-10 volt DC signal (not included)

**Typical Applications:** Business machines, computer peripherals, material handling, air samplers/evacuators, packaging equipment, photographic equipment, and medical equipment.

**Bearings:** Ball

**Mounting:** All position

**Enclosure:** Open

**Thermal Protection:** Auto

**Insulation Class:** A

**Ambient:** 40°C

**Brand:** Ametek

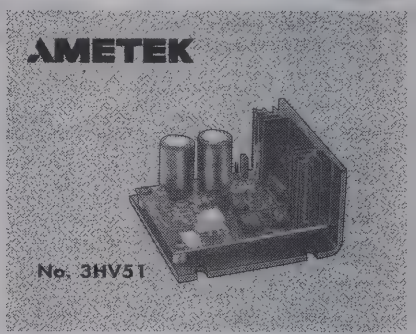
# BRUSHLESS BLOWERS AND MOTORS, CONTROLLERS, AND POWER NOZZLE MOTORS

## 12 AND 24 VOLT BRUSHLESS DC BLOWERS

- Tangential discharge
- 5.0 and 5.7" diameters
- Brushless DC motor drive
- Aluminum fan end bracket
- Centrifugal fan system
- Air intake and exhaust tube
- Nos.3HV18 and 3HV19 require controller No. 3HV53; No. 3HV20 requires controller No. 3HV51

**Typical Applications:** Business machines, computer peripherals, material handling, air samplers/evacuators, packaging equipment, photographic equipment, and medical equipment.



| Dia. (In.) | Blower Stages | DC Volts | Max. Amps | Overall Height (In.) | Max. Pressure (In. H2O Sealed) | CFM | Ametek Model | Stock No. | List | Each | Shpg. Wt. |

## BLOWER AND MOTOR CONTROLLERS

- Nos. 3HV51 and 3HV53 are blower controllers; No. 3HV52 is a motor controller
- Adjustable by built-in mechanical potentiometer or remote 0-5 volt DC input (not provided)
- High efficiency MOSFET drive
- Current limit protection
- 18" cable supplied
- Forward/reverse rotation
- Closed loop speed control
- Internal supply for hall effects
- Anodized heat sink chassis mount

| DC Volts | Description | Max. Amps | For Use With | Ametek Model | Stock No. | List | Each | Shpg. Wt. |

## 24 VOLT BRUSHLESS DC MOTORS

- Rare earth, neodymium-iron-boron magnets
- Requires motor control, No. 3HV52
- 8 pole/12 slot construction

**Typical Applications:** Cartridge/reel-to-reel tape drives, business machines, pump/compressor, medical instrumentation, robotics, and machine tools.

## POWER NOZZLE MOTORS

**Typical Applications:** Suitable for motorized brush drive power head replacements
**Features:** Thermoset plastic housing, threaded mounting inverts, and thermal cutoff protector
**Bearings:** Ball/Sleeve
**Mounting:** 2.25" OC tapped #8-32; No. 4M978 10-32
**Enclosure:** Open
**Thermal Protecton:** One time non-reset
**Insulation Class:** A
**Ambient:** 40°C
**Duty:** Intermittent
**Rotation:** CCW facing shaft
**Average Life:** 200 hours

(*) Cogged shaft extension.

# UNIVERSAL TYPE AC/DC MOTORS

**Typical Uses:** Appliances, power tools, outdoor equipment, food processing equipment, gearmotors, blowers, pumps, and other applications where high horsepower output and small size are required. Series wound. Full-load speeds shown are adjustable with proper speed control. Average brush life approximately 300 hours, depending on application.

**Enclosure:** Open
**Service Factor:** 1.0
**Thermal Protection:** None
**Windings:** Copper
**Ambient:** 40°C
**Rotation:** CW or CCW (non-reversible)
**Finish:** Gray enamel
**Approval:** UL Recognized (E47479)
**Brand:** Dayton

### A & B 2¾" DIA., SINGLE SHAFT

**Mounting:** Side mounted motors have two tapped #10-32 holes, 2 3/16" OC on one or both sides; No. 2M066 has base with 2 3/16 x 2 7/16" OC; **Special Features:** No. 2M277 has externally replaceable brushes for extended motor life.

### C 3" DIA., SINGLE SHAFT

**Mounting:** Stud, two threaded studs extended out shaft endshield, 2 7/16" OC; **CSA Certified:** 83496

### D 3⅝" DIA., SINGLE SHAFT

**Mounting:** Stud with two threaded studs extending out shaft endshield, 2 7/16"; **CSA Certified:** 83496

### E 3½ x 3¾" RECTANGULAR, SINGLE SHAFT

**Mounting:** Bottom with four tapped #10-32 holes, 2 x 2 13/16" OC

### F 3⅞" DIA., SINGLE SHAFT

**Mounting:** Face with four tapped #10-32 3¼ OC 90° apart; **Special Features:** External brushes for long motor life in industrial applications; **CSA Certfied:** 87989

## TECHNICAL REFERENCE LITERATURE

Technical reference literature is available on such subjects as welding, basic electricity, electric motors, and hydraulics and pneumatics
See Index under Books.

# AUTOMATIC WASHER AND DISHWASHER REPLACEMENT MOTORS

**Typical Uses:** For replacing factory-installed motors in specific brands of home washer and dishwasher appliances. Use on other applications voids warranty.
**Special Features:** Shaft and mounting dimensions are comparable to the original motor for easy replacement. Terminal switch is connected to motor in location convenient for installation. Wiring instructions included in carton; installation kit also included where required.
**Type:** Split-phase & Capacitor start
**Volts:** 115
**Bearings:** Sleeve
**Service Factor:** 1.0
**Thermal Protection:** Auto
**Insulation Class:** B (except for 6K839 & 3K364 are F)
**Ambient:** 40°C
**Duty:** Continuous
**Windings:** Copper
**Brand:** Emerson and GE

## COMMERCIAL WASHER AND DRYER REPLACEMENT MOTORS

**Typical Uses:** Built specifically for replacement use on commercial dryers manufactured by Cissel, Huebsch, and washers by Speed Queen.

**Special Features:** Dual voltage on capacitor models. 3/4" dia. shaft bushing included with No. 3K038.

**Bearings:** Prelubricated ball, 2K181 has sleeve

**Mounting:** Cradle, except No. 2K181

**Enclosure:** Open dripproof

**Thermal Protection:** Auto (except No. 3K038 has none)

**Windings:** Copper
**Insulation Class:** B (except Dayton models have A)
**NEMA Frame:** 56Z
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW facing shaft (except No. 2K145 and 2K181 are CW/CCW)
**Finish:** Gray
**Brand:** Dayton, GE, and Emerson
**UL File Nos.:** Dayton E47479; GE E47088; and Emerson E22922

**CAUTION:** Refer to page 6 for proper thermal protection and other motor selection information.

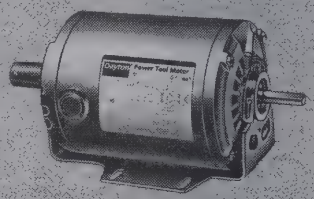
# POWER TOOL AND VIBRATOR MOTORS

## DAYTON BRAND, POWER TOOL MOTORS



- **CW/CCW rotation by easy reconnection**
- **Suitable for all position mounting**
- **Ball bearing designs are double-shielded**

**Typical Uses:** High speed moderate starting torque woodworking and metal-working tools; wood lathes, sanders, grinders, table saws, planers and other applications where maximum HP load will not exceed nameplate rating.
**Enclosure:** Open dripproof
**Service Factor:** 1.0
**Insulation Class:** A
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

## DAYTON BRAND, 3-PHASE

- **NEMA service factors provide a reserve margin for intermittent overloading or fluctuating (high/low) voltage conditions**
- **NEMA design B**

**Typical Uses:** Designed for operating industrial-type sewing machine clutches. Also used for other belt-driven applications where 3-phase power is supplied.

**Bearings:** Double-shielded ball

**Mounting:** Cradle base

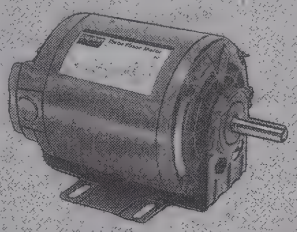
**Enclosure:** Open dripproof

**Windings:** Copper

**Ambient:** 40°C

**Duty:** Continuous

**Rotation:** CW/CCW



**Finish:** Gray

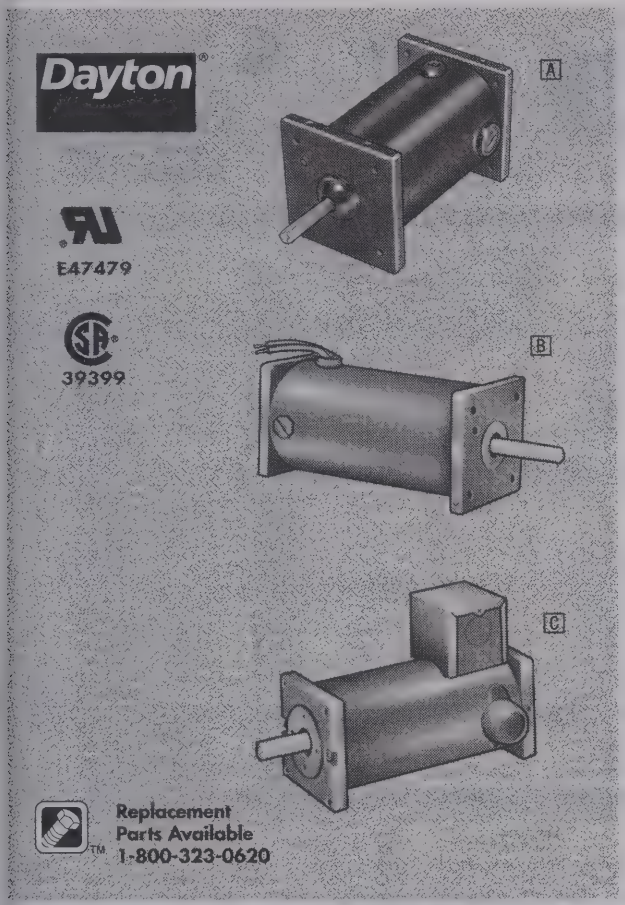
## 90VDC, TENV, 42CZ FACE MOTORS

**Type:** Permanent magnet
**Bearings:** Ball
**Mounting:** NEMA 42CZ
**Brushes:** Externally replaceable
**Shaft:** 1/2" diameter
**Rotation:** CW/CCW
**Ambient:** 40°C
**Duty:** Continuous
**Enclosure:** TENV
**Service Factor:** 1.0
**Finish:** Gray
**Brand:** Dayton
**Controller:** Recommended for use with Dayton Speed Control, No. 1Z808 (not included)



| HP | Nameplate RPM | Dimensions (In.) Length (C) | Length (L) | Full-Load Amps at 90 VDC | Full-Load Torque (In.-Lbs.) | Stock No. | List | Each | Shpg. Wt. |

Our Grainger Electronic Catalog is a state of the art CD-ROM selection guide which features products and information from our General Catalog. The perfect reference tool when you need product and technical information on the road. Contact your local branch for more information.

# PERMANENT MAGNET DC MOTORS

**Typical Applications:** Low voltage machines, pumps, fans, chemical feeders, and other applications.

**Special Features:** Externally replaceable brushes

**Type:** DC permanent magnet

**Bearings:** Ball

**Mounting:** All-position face and base

**Enclosure:** TENV

**Ambient:** 40°C

**Windings:** Copper

**Service Factor:** 1.0

**Insulation Class:** B

**Duty:** Continuous

**Rotation:** CW/CCW

**Finish:** Gray

**Brand:** Dayton

**Controller:** Recommended for use with Dayton speed control, No. 1Z802 at 12VDC or No. IZ805 at 24 VDC and No. IZ808 on 90VDC units (not included)

(*) Use with proper control listed on nearby page or with other DC rectified power sources matched to voltage (providing Form Factor does not exceed 1.3).

# PERMANENT MAGNET DC MOTORS

Dayton®

No. 2M168

No. 1F640

E47479

39033 (Except Nos. 1F646, 1F650, 1Z854 & 1Z856)

Replacement Parts Available 1-800-323-0620

**Typical Uses:** Designed for use with 90 or 180V speed controllers or NEMA type K DC power supplies on constant or diminishing torque applications. Applications include drives for conveyors, food packaging, and processing machinery.

Motors have a 10-32, 1/2" deep tapped hole on the fan end shaft. This hole can be used to mount No. 6Z392 pulse generator (see page 194).

All Dayton and GE 56 frame models have a removable base. GE 148ATC and 1412ATC are footless. Bases available on page 190. All Dayton models and GE Nos. 2M501 thru 2M508 are performance matched with Dayton and Dart speed controllers on pages 192 and 193.

**Dayton Approvals:** UL Recognized (E47479); CSA Certified (39033) except Nos. 1F646, 1F650, 1Z854, and 1Z856.

**GE Approvals:** 56 frame UL Recognized (E47088), CSA Certified (LR56410); 148, 149, and 1412 frames UL Recognized (E79538) only.

**Type:** Permanent magnet
**Bearings:** Ball
**Mounting:** Face
**Service Factor:** 1.0
**Insulation Class:** F
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Brand:** Dayton and GE

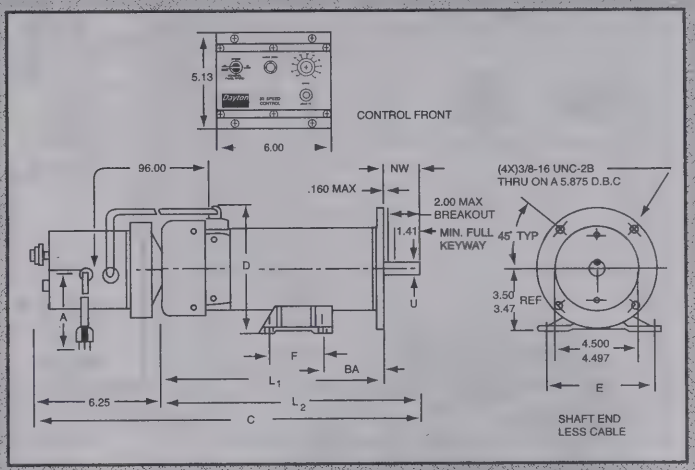
# PERMANENT MAGNET DC MOTORS WITH MATCHED SPEED CONTROLS

## 90 & 180 VDC PERMANENT MAGNET MOTORS

Dayton®



E165942

C E165942

**No. 4Z248 1/4 HP Motor and Mounted Speed Controller**

**8-Ft., 3-conductor cordset plugs into standard AC outlet**

Replacement Parts Available 1-800-323-0620™

**Provided with Mounted Speed Control**

**Order right-angle or parallel shaft speed reducer separately**

**Typical Uses:** Packaging equipment, pumps, fans, blowers, conveyors, and other constant or diminishing torque applications. Not for constant HP, cyclic load, or rapid reversing applications.

**Special Features:** Permanent magnet DC motor has matched speed controller mounted to end bracket of motor. Control has eight-foot, 3-conductor cordset for plugging into standard AC receptacle (no wiring required). Controller supplies DC power to motor through an additional eight-foot, 3-conductor cordset between motor and controller. Allows remote mounting of controller when removed from motor end bracket. External access to motor brushes.

**Input Voltage:** 115 VAC, 60/50 Hz on Nos. 4Z248, 1F800, 1F796, 2Z846, and 1F798; 230V, 60/50 Hz on No. 4Z226, 1F802 and 1F804 (requires 250V, 20A receptacle)

**Bearings:** Prelubricated ball

**Mounting:** C-face with removable rigid base

**Enclosure:** Motor, TEFC; control, NEMA 4/12

**Ambient:** 40°C

**Service Factor:** 1.0

**Insulation Class:** F

**Duty:** Continuous

**Rotation:** CW/CCW

**Brand:** Dayton

### SPEED CONTROL FEATURES

**Speed Regulation:** Within 5% of nameplate RPM
**Full-Wave Rectification**
**Min. and Max. Speed Adjustable**
**Current/Torque Limit:** Built-in (adjustable)
**IR Compensation:** Built-in (fixed)
**Soft Start Acceleration**
**Transient and Surge Protection**
**Control Circuitry on One Printed Board**
**Control Protection:** Fused
**Forward On/Off/Reverse On Switch**
**Power-On Indicator Light**
**NEMA 4/12 Enclosure**
**UL Listed for USA and Canada (E165942)**

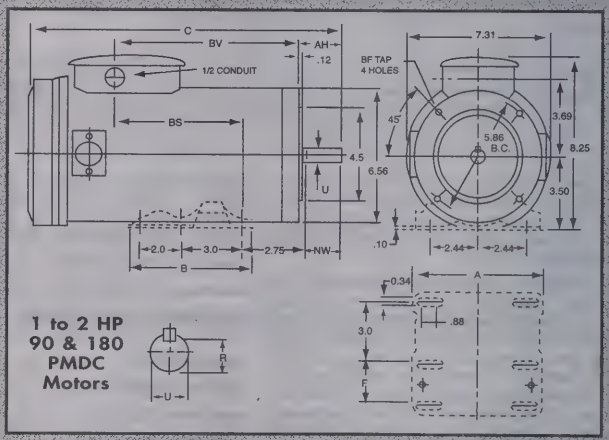
# 90 AND 180V PMDC MOTORS

RELIANCE ELECTRIC



E54825 LR40567

No. 2H545

1/4 to 3/4 HP 90 PMDC Motors

1 to 2 HP 90 & 180 PMDC Motors

- **TEFC design provides constant torque in full 20:1 speed range with freewheeling diode for cooler running and longer life**
- **Feature extended brush life, low maintenance, and reduced downtime**
- **Disassembly for brush inspection eliminated with new cartridge design using brass inserts and stainless steel springs**

**Typical Uses:** Conveyors and packaging equipment, exercise equipment, pumps, fans, blowers, and other constant or diminishing torque applications.

**Bearings:** Permanently lubricated double-shielded ball
**Mounting:** NEMA 56C face with base
**Service Factor:** 1.0
**Insulation Class:** F
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Blue-green

## 90V AND 180V MOTOR/CONTROL COMBINATIONS

Dayton®

DART CONTROLS, INC.

**Performance-matched combinations** of Dayton permanent magnet 90V DC motors with Dayton and Dart controls DC/SCR speed controls are provided at right. For more detailed specifications, the motors and speed controls indicated at right are listed on nearby pages.

**How to use**: Locate motor by stock number in the left hand column. To the right will be the stock numbers for that item combined with different controllers. See column heading for the specific control desired. Note that this is not an exhaustive list.

## ADJUSTABLE DC CONTROLS FOR PM AND SHUNT WOUND MOTORS

RELIANCE ELECTRIC

E59092 E59092

For Use With PMDC Motors on Facing Page or Shunt Wound DC Motors

- ±10% rated voltage
- AC frequency: 48 to 62 Hz
- All circuitry packaged on a single accessible surface mount circuit board
- Armature voltage or motor driven DC tachometer feedback
- Complete application adjustments
- Must be used with power disconnect switch between controller and power supply
- Built-in surge suppressor
- Relay in control circuit prevents automatic restarting after power outage

**Typical Uses:** For use with permanent magnet DC motors on facing page, or shunt wound DC motors, in a variety of constant or diminishing torque applications requiring wide range adjustable speed control. These include conveyors, assembly lines, packaging, food processing, exercise, silk screening, mixing, and photo processing equipment.

DC2 V★S® drives feature adjustable minimum (0 to 50%)/maximum (50 to 100%) speed, IR drop compensation (5 to 10%) and current limit (10 to 150%). Internal jumper reconnections match the drive incoming power (115 or 230VAC, 50 or 60 Hz) and select motor horsepower (1/4 thru 2), desired feedback, armature voltage or motor driven DC tachometer.

Power cube contains all semiconductors. Speed regulation with 95% load change: voltage feedback 2-5%, with 20:1 constant torque; tachometer feedback 1%, with 30:1 constant torque. (Separately adjustable accel/decel rates of 0.3 to 40 seconds.)

Full-wave, half-control power conversion with back diode. Built-in half wave field supply for operation of wound field motors.

NEMA/UL Type 12K construction. 0°C to 40°C ambient, up to 3300 feet (1000 meters) in elevation. 1.0 service factor. UL Listed for USA and Canada (E59092) and IEC classified. Black finish. Reliance® brand.

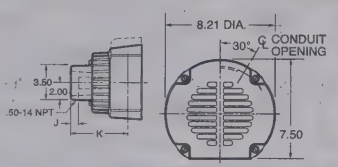
# WOUND FIELD DC MOTORS



**Typical Uses:** Conveyors, wire feeders, photo, food and paper processing, printing, factories and textile mills, and other constant or diminishing torque applications with NEMA Type K DC power supplies.

**Special Features:** Smooth operation at low speeds. C-face all-angle mounting. Continuous rated torque to 5% base speed (when used with properly matched controller with free-wheeling diode).

**Type:** Shunt wound
**Bearings:** Ball
**Mounting:** C-face (foot optional, except on 56C frame)
**Ambient:** 40°C
**Service Factor:** 1.0
**Insulation Class:** F
**Duty:** Continuous
**Rotation:** CW/CCW
**UL Recognized:** 56 frame (E47088); 146, 148, 149, and 1412 frames (E79538)
**CSA Certified:** 56 frame (LR56410)
**Finish:** Gray
**Brand:** GE

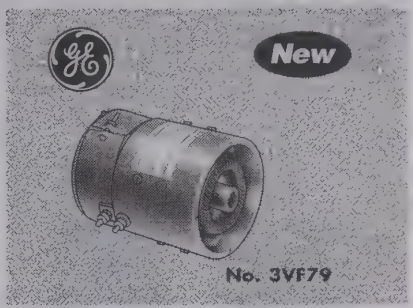
# SPEED CONTROLS FOR PERMANENT MAGNET DC MOTORS AND GEARMOTORS



## ELECTRIC VEHICLE SERIES MOTORS

**Applications**

These motors and controls are designed for golf carts, utility vehicles, and other similar applications and require a minimum of adjustment and fine-tuning after installation. Partial motors for replacement of OEM units.

- **19T spline female shaft extension for mating with Dana H30 axles**

**Bearings:** Ball
**Enclosure:** TENV
**Thermal Protection:** None
**Mounting:** Flange

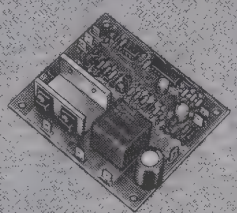
## PULSE WIDTH MODULATED (PWM)

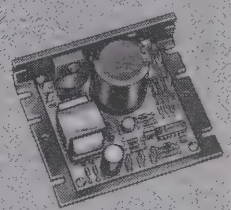
**STANDARD FEATURES**



- **Speed pot included**
- **FET PWM design**
- **Fixed current limit**
- **Board or chassis mount**
- **Pot loss protection—output voltage goes to zero if speed pot leads break**
- **Fixed acceleration (1 to 3 second "soft start")**
- **Single direction operation**

These controls feature high efficiency PWM designs resulting in cooler motor operation and longer brush life. For use with DC motors and gearmotors on constant or diminishing torque applications requiring wide range adjustable speed control. These include medical, packaging, office, laboratory, conveyor, and food processing equipment. Not intended for constant HP applications which include saws and drill presses. Do not use in close proximity to high capacitive discharge electrical circuits, such as welding equipment.

Dayton®



**Nos. 1Z802 and 1Z805**

- **15 ampere rating**
- **Reverse battery polarity protection**
- **On/Off control voltage relay**

**No. 1Z808**

- **Full wave power supply**
- **Transient voltage protection**
- **3 ampere rating**
- **Adjustable maximum speed**

(*) Capable of 130 VDC operation.

## DIRECT MOUNT GEARMOTOR SPEED CONTROL

Dayton®

- **Mounts directly to many Dayton permanent magnet DC gearmotors**
- **Can be panel mounted for use with many other 90V PMDC gearmotors**
- **Ideal for applications that require convenient speed adjustment right at the gearmotor**
- **Eliminates need to run long wires from controller to gearmotor, offering streamlined, compact drive package**
- **Full wave unfiltered control with freewheeling diode**
- **Made of strong Noryl plastic**
- **Adjustments: On-Off speed knob and current limit (0.2-4.0 amps) and min./max. speed**
- **Adaptable to Von Weise models VW07, VW31, VW33, VW62, VW80, VW83, VW94, VW88, VW89 using 90 VDC permanent magnet motors**

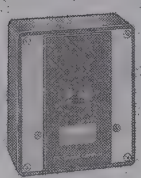
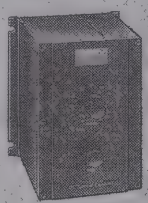
# DC SPEED CONTROLS FOR 90V AND 180V MOTORS AND GEARMOTORS

Dayton

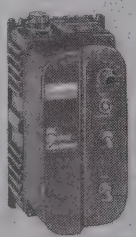


E165942 E165942

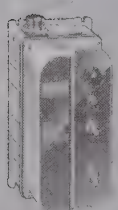


A

B



C



D

E

F

G Washdown

H

**ALL MODELS FEATURE:**

- Adjustable maximum/minimum speed
- Fused control protection
- Run/stop switch
- Metal enclosures (except Nos. 4Z527 and 6Z812 are phenolic)
- Built-in transient and surge suppression
- Performance matched to Dayton and GE PMDC motors
- Single-phase, 60/50 Hz input
- All models are UL Listed for USA and Canada (E165942)

Solid state speed controls convert 115 or 230 VAC input to full wave DC power for speed control of permanent magnet (90 and 180 VDC armature) motors and gearmotors. Some controls can also control shunt wound DC motors.

For constant or diminishing torque applications requiring adjustable speed control over a wide range. Not intended for constant HP applications such as saws and drill presses or in close proximity of high capacitive discharge electrical circuits such as welding equipment. Black finish (except Nos. 1F794 and 1F792 are white epoxy washdown duty). Dayton brand.

## MAGNETIC REVERSING KIT FOR No. 6Z812

Provides full armature reversing using forward and reverse contactors mounted on a printed circuit board. Also disconnects motor armature from control when motor is stopped, meeting electrical code requirements for an "M" contactor.

Includes an antiplugging circuit and an auxiliary form A contact rated for 5 amps at 115VAC or 30VDC. 3-5 HP range. Forward reverse toggle switch for selecting motor rotation. Operable on 230VAC only, 180V armature. Dynamic braking option included.

**No. 6Z813.** Shpg. wt. 3.3 lbs. List .....$426.00.
Each .....**$381.75**

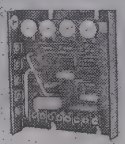
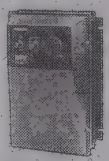
# DC VARIABLE SPEED CONTROLS

DART CONTROLS, INC.



Nos. 6Z387, 6Z385, and 2M510 include speed pot, knob, and dial plate.

**No. 6Z387, Chassis 1/4 to 2 HP**
**ADDITIONAL FEATURES**
- Adj. linear accel. and decel.
- Packaged gentron bridge
- Dual Voltage
- Two AC fuses
- C-UL Recognized (E78180(N)



**No. 6Z385, Chassis 1/8 to 2 HP**
**ADDITIONAL FEATURES**
- Adj. linear accel.
- One AC fuse
- Packaged gentron bridge
- Dual voltage
- UL Recognized (E78180)
- CSA Certified (LR85877)

**No. 2M510, Chassis 1/8 to 1 HP**
**ADDITIONAL FEATURES**
- 200% overload for 1 minute
- Dual voltage
- UL Recognized (E78180)
- CSA Certified (LR85877)
- European Compliance-C.E.Mark

**No. 6Z388, Enclosed, NEMA 4/12, 1/4 to 2 HP**
**ADDITIONAL FEATURES**
- Power interrupt relay
- Adj. linear accel. and decel.
- Packaged gentron bridge
- Two AC fuses
- Dual Voltage
- C-UL Recognized (E78180(N)

**No. 2M511, Enclosed, NEMA 4/12, 1/8 to 1 HP**
**ADDITIONAL FEATURES**
- Reverse manual or electric
- Power interrupt relay
- Dynamic brake
- Two AC fuses
- Adj. linear accel. and decel.

**No. 6Z386, Enclosed, NEMA 4/12, 1/8 to 2 HP**
**ADDITIONAL FEATURES**
- Adj. linear accel.
- One AC fuse
- Packaged gentron bridge
- Dual voltage
- UL Recognized (E78180)
- CSA Certified (LR85877)

## STANDARD FEATURES

- Operable on 60 or 50 Hz
- 1% speed regulation over constant torque speed range
- Adjustable minimum/maximum speed
- Adjustable current limit
- Line voltage compensation
- Transient voltage protection
- Free wheeling diode
- Inhibit capability
- HP adjustable by internal trim pot
- Barrier terminal strip
- Shunt field (1 amp max; 100 VDC for 120 VAC in; 200 VDC for 240 VAC in)
- DC tach follower capability
- DC tach feedback capability: 3 V/K
- Full wave power supply
- 100% full load tested
- Operate on 60 Hz at ±10% rated line voltage
- Chassis units are supplied with speed pot, knob, and dial plate

DC speed controls for use with DC motors and gearmotors on constant or diminishing torque applications requiring wide range adjustable speed control. These include conveyors, assembly lines, packaging, food processing, silk screening, and photo processing equipment. Not intended for constant HP applications which include saws and drill presses. Do not use in close proximity to high capacitive discharge electrical circuits such as welding equipment. UL Recognized (E78180). Dart brand.

## FIELD PROGRAMMABLE CLOSED LOOP DC VARIABLE SPEED CONTROL

DART CONTROLS, INC. E78180 LR85877

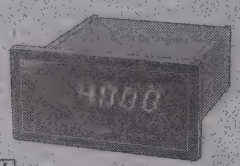
Field Programmability Allows User to Customize Control to Specific Application

- Microprocessor based with non-volatile memory
- Displays include RPM, FPM, GPM, rate or process time
- Digital closed loop accuracy
- Adjustable Min./Max. set speed
- Master or follower modes of operation
- Decimal point selection
- Large 1/2" digital display
- Operable on 60 or 50 Hz
- 1/8 DIN panel mount

For use on 90V PMDC motors and gearmotors, rated to 1/3 HP, requiring long term accuracy and repeatable speed settings. Accepts 120 VAC, 60/50 Hz input. Closed loop accuracy of ±1/2 RPM when used with pulse generator. Screw-type terminal strip for easy installation. Sturdy aluminum construction. Speed range: 25:1. Dart brand (MD10P)*.

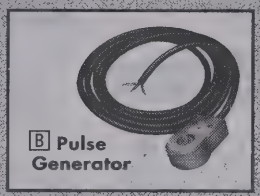
**No. 1XC92.** Shpg. wt. 1.2 lbs. List.....$582.00.
Each.....**$424.25**

(*) Requires No. 6Z392 pulse generator or equivalent.



# DIGITAL TACHOMETERS, PULSE GENERATOR, AND SPEED CONTROLS

## FIELD PROGRAMMABLE DIGITAL TACHOMETER AND PULSE GENERATOR



DART CONTROLS, INC.

**TACHOMETER FEATURES**

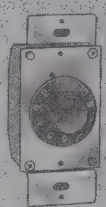
- Input voltage: 120V, 50 or 60 Hz
- Field programmable
- Four digit LED display (1/2 in.)
- Wire clamp terminal strip connnectors
- Accepts a variety of 5V TTL inputs: Hall effect, proximity (inductive) and photoelectric

A

B Pulse Generator

Compact in size, sturdy aluminum construction. Field programmable rate based display. Four digit .58" LED display. Wire clamp terminal strip for easy connections. Operates on 5 volt square wave pulse supplied by No. 6Z392 pulse generator or equivalent. Input voltage: 120V, 60 Hz. –10° to 45°C ambient. ±10% rated line voltage. Dart brand.

A **No. 6Z390 Tachometer/Ratemeter** converts input pulses to engineering units (RPM, Gal./Min., Ft./Sec., etc.)



B **No. 6Z392 Pulse Generator** provides 5 volt square wave pulse with frequency proportional to shaft RPM of unit to which it is mounted. Standard features include stainless steel ball bearing, compact housing of molded Monsanto "Santoprene" plastic rubber, and 6 ft. rubber-jacketed output cablewith 3-wire 18AWG conductors (red wire-+VDC supply input; black wire-common; white wire: signal). Operating temperature range: -10°C to +45°C. PU-E Series pick-up mounts directly on shaft being monitored using single 10-32 screw. Maximum shaft speed is 5000 RPM.

## SPEED CONTROLS FOR UNIVERSAL TYPE AC/DC MOTORS

Dayton

E165942

No. 4X796

No. 4X797

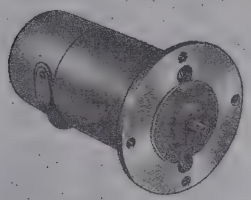
- Use only with 115V AC/DC universal brush-type motors
- Clockwise turn of dial permits control of motor speed from 20 to 100% of full speed
- Typical uses are gearmotors, power tools, sewing machines, grinders, blowers, and pumps
- Input 115 VAC (±10%) 60 or 50 Hz
- Mount in panels or directly into standard "handy" boxes (handy box not included)
- No. 4X796 uses single gang wall plate; No. 4X797 uses double gang wall plate (wall plates not included)
- Controls are not intended for shaded pole, PSC, split-phase, capacitor-start, or PMDC motors
- Instructions furnished
- UL Recognized (E165942)

| Max. Amps | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 5 | **4X796** | $30.00 | **$28.05** | 0.3 |
| 10 | **4X797** | 37.00 | **33.15** | 0.4 |

Boston Gear

## DOUBLE C-FACE DC TACHOMETER GENERATORS

- Self-contained design producing linear output voltage in direct proportion to actual motor speed
- Provides 35 VDC/1000 RPM output suitable for use with tach feedback for DC controls
- Mounting configuration designed for mounting between a C-face motor and a flanged speed reducer
- Not intended for overhung loads on the output shaft



| Voltage Output 1000/RPM | Max. Speed RPM | For Motor Series | Input Shaft Dia. | Output Shaft Dia. | Temperature Constant Per Degree F | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| **35 VDC** | 2000 | 56C | .6257/.6252 | .6245/.6250 | .04 Volts | **1F806** | $900.00 | **$830.50** | 7.0 |
| **35 VDC** | 2000 | 140TC-180TC | .8757/.8752 | .8745/.8750 | .04 Volts | **1F808** | 968.00 | **893.50** | 7.0 |

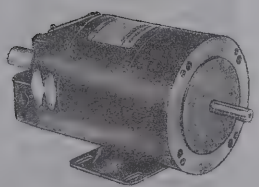
# TACHOMETER GENERATORS



E47088 LR56189

No. 4M655

No. 4M687

No. 4M685

**Tachometer Generator** is a generator mechanically coupled to a rotating machine whose main function is to generate a voltage, the magnitude or frequency of which is used either to determine the speed of rotation or the common shaft or to supply a signal to a control circuit to provide speed regulation.

**Typical Uses:** Speed indication on a variety of mill drives, machine tools, paper machines, and industrial machines.

**Special Features:** Hazardous location models have built-in temperature-sensing switch with leads brought out. When properly wired to the external control circuit, maximum frame temperature is limited as required by UL and the NEC.

**Bearings:** Ball

**Enclosure:** TENV

**Insulation Class:** A

**Duty:** Continuous

**Rotation:** CW/CCW or reversing service

**Field:** Alnico magnets

**Finish:** Gray

| Aero M | PSA, PSB Series | |

(*) Specific performance may vary between brands. If critical, review all specifications prior to purchase.

**Rated 3-Second Start, 20 Starts Per Hour, 50/60 Hz**

**TRIPLE TERMINAL STYLE**

**(Uses optional screw terminal No. 6X578 listed below.)**

AC electrolytic capacitors are designed for normal intermittent service on single-phase motor starting applications. Maximum Power Factor (PF) is 10%. They also meet or exceed Electronic Industries Association (EIA) Standard RS-463-type 2. Container is plastic to provide an effective seal against moisture. Dual terminals for either solder, 1/4" female quick-connect connections, or screw. Individually cartoned. Philips brand.

## Aerovox

### 15,000 OHM, 2 WATT RESISTOR

When soldered across the terminals of an electrolytic motor-start capacitor, resistor bleeds off the electrical charge that is stored as the relay or starting switch contacts open and the capacitor is disconnected from the line. Helps prevent contact points from arcing and welding closed on rapid-cycling applications. Comes in packages of 10 resistors. Aerovox brand.

**No. 6X181.** Shpg. wt. 0.1 lbs. List.....$4.45. Each.....**$3.47**

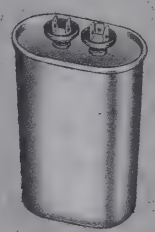
## 3M

### 1/4" SCREW TERMINAL

Convert 1/4" quick connect terminals of all capacitors listed above to screw-type terminals. Includes 6-32 screw. 25/64" long. Comes in boxes of 100. 3M brand.

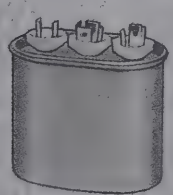
**No. 6X578.** Shpg. wt. 0.4 lbs. List.....$19.47. Each **$15.59**; Lots 5.....**$13.22**

**OUR PRODUCT SELECTION IS BIGGER AND BETTER THAN EVER!**



**In addition to our new product listings from the leading brand names, Grainger now offers you more than 78,000 products to meet your maintenance, repair, or operation supply needs.**

# MOTOR-RUN CAPACITORS



## GE OVAL CAPACITORS

For applications such as air conditioners and refrigerators. Operate in temperatures of -40°F to 156°F (-40°C to 70°C) with microfarad values within ±6% of nominal rating. Hermetically sealed aluminum case with turnplate steel cover. 1/4" male quick-connect terminals. Phenolic insulating bushings. UL Recognized pressure sensitive interrupters for maximum 10,000 amp fault currents. Individually cartoned.

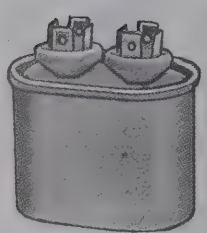
## AEROMET II® ROUND CAPACITORS

E51176

LR58450



For mounting kits, see page 197

- Noncorrosive plastic case
- Self-clearing to insure performance
- Uses environmentally compatible and biodegradable Supernol® fluid to prolong life
- Metallized polypropylene film dielectric
- Ambient operating temperature range -40°C to 70°C within ±10% of nominal rating
- Built to EIA Standard RS456A
- UL Class 94V-2 and 746C for direct support of live electrical parts. Also UL E51176 and CSA LR58450

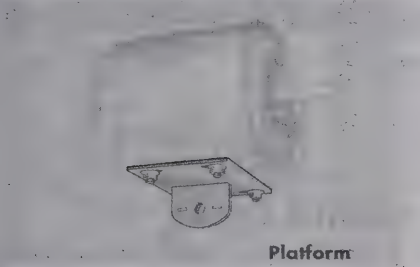
## ADAPT-O-MOUNTS



No. 3M130

**Convert mounting dimensions of original NEMA and NEMA U frame motors to NEMA T frame motors. Available in 5 sizes for adapting from NEMA 182 thru NEMA 326U motors, to NEMA 143T thru 286T motors.**

Adapt-O-Mounts compensate for the difference in mounting hole locations and shaft height; they do not alter the motor axial center lines or end of shaft extension. Corrosion-resistant gray primer finish. Zinc-plated bolts included. Motor mounting holes have nuts welded on base for easy installation. Not for ceiling or side-wall installations. Gray finish. Dayton brand.

| CONVERTS From NEMA U Frames | To NEMA T Frames | Adapt-O-Mount Dimensions (In.) Height | Width | Length | Stock No. | List | Each Pair | Shpg. Wt. |

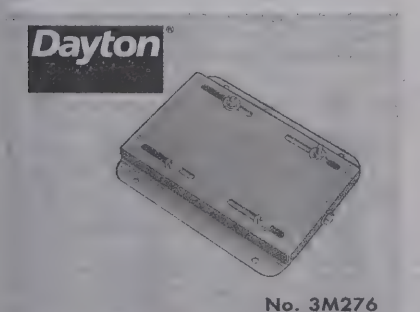
## AIR CIRCULATOR MOTOR MOUNTING BASES

Platform

Mounts permit fast, easy assembly of air circulator head to pedestal, wall/ceiling or suspension brackets. Design also allows mounting OSHA-compliance guards to motor thru-bolts without modification to guard. All bases have 3/8" mounting hole in yoke. Constructed of heavy-gauge steel with baked-on gray enamel finish.



**Platform mount.** For 48 and 56 frame, rigid base motors. 4⅛ x 5⅛" platform. Punched 11/32" slotted motor mounting holes. Motor mounting bolts listed below.

**Motor mounting bolts.** Set of four 5/16"-18 x 5/8" long carriage bolts.

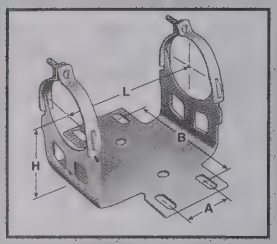
**No. 2C294.** Shpg. wt. 0.2 lbs. List.....$8.38. Each.....**$2.63**

| Mount Type | For use with Dayton Motor Type: | Stock No. | List | Each | Lots 4 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Platform** | 48, 56 Frame, Rigid Base, 4⅛ x 5⅛" | **1C386** | $7.70 | **$4.54** | **$4.09** | 1.0 |

## ADJUSTABLE STEEL MOTOR BASES

No. 3M276

**Simplify floor-mounting and belt tension adjustment on NEMA 56 thru 215T and U frame motors.**



One-piece steel mounting bases have single adjusting bolt to position mounted motor for proper belt tension during initial installation and at later maintenance checks. Four motor mounting bolts included. Not for ceiling or sidewall installations. Gray finish. Dayton brand.

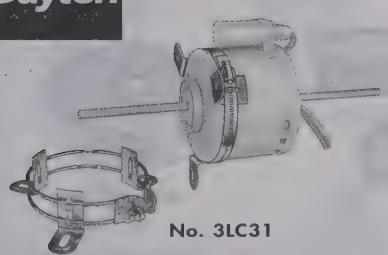
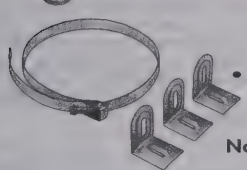
## MOTOR BASE

Dayton

**For Dayton 3.3" diameter motors and all unit bearing motors**



Stud-mounts up to 1/10 HP, shaded pole motors on slotted plate. For all Dayton 3.3" dia. motors as well as Dayton and GE unit bearing motors. 4⅜" dia. and 5⅜" maximum shaft height. Double-slotted feet.



**No. 1C897.** Shpg. wt. 0.8 lbs. List $6.00.
Each ..... $5.00

## MOUNTING BRACKETS

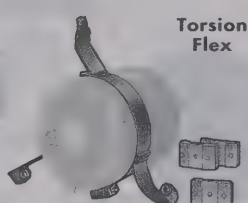
Dayton

No. 3LC31

- Lock-on hangers

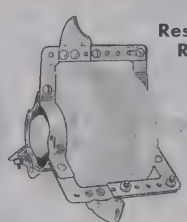
No. 3M133

- **Lug mounting kit for 48 frame (5½ to 5⅝" dia.) motors**
- **Solid double wire construction**
- **Lock-on hangers**
- **Tightening screw with lockwasher for extra security**
- **Three 1¾" lugs with 3/8 x 1" slots**

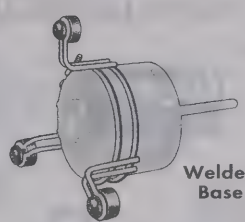


**No. 3LC31.** Lug Ring. Shpg. wt. 0.9 lbs. List $12.60. Each ..... $11.40

- **Lug mounting kit for 3 to 7" dia. motors**
- **Stainless steel band mount**
- **Three slide-on 1½" hangers**
- **1/4 x 7/8" slots, expandable to 3/4 x 1⁵⁄₁₆"**



**No. 3M133.** Adjustable Mounting Bracket. Shpg. wt. 0.5 lbs. List $12.40. Each ..... $10.40



## MOTOR MOUNTING BRACKETS FOR 9 TO 12" DIA. BLOWER HOUSINGS

Torsion Flex

Resilient Ring

Welded Base

**Torsion-flex bracket** is designed to effectively isolate and prevent torsional vibrations from reaching blower housing and causing noise. Fits NEMA 42 (5" dia.) and 48 (5⅝" dia.) frame motors; metal inserts are supplied for adapting bracket to NEMA 42 frame. No pre-assembly; bracket clamps to motor shell. Instructions included.

**Resilient ring-mounted bracket** fits NEMA 48 frame motors with 2½" dia. resilient rings. Adjustable to fit rings 3½ to 6⅛" on center. Hardware included.

**Welded 3-ring brackets** include adjustable motor bracket with 3 welded rings and rubber grommets for mounting to blower housing.

| Fits Blower Wheel Dia. (In.) | Bracket | Fits NEMA Frame (Motor Size) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **9 or 10** | Torsion Flex | 42/48 | **5X247** | $13.00 | **$10.92** | 1.6 |
| **12** | Resilient Ring | 48 | **4C266** | 32.87 | **19.68** | 2.0 |

| **10** | Welded Rings | 48 | **3M147** | 16.35 | **9.80** | 3.0 |

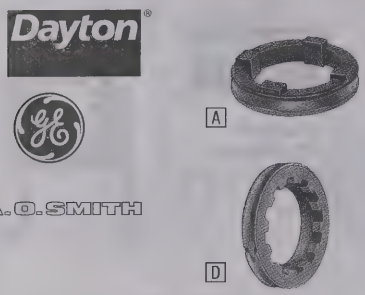
## RUBBER MOUNTS

Used on fans, blowers, compressors, pumps, etc., to reduce noise. Not recommended for suspended load applications.

Natural rubber isolators are chemically bonded to steel. Fasten between motor and rails or base. Karman Rubber brand.

| Pad Size Dia. (In.) | Screw Size | Karman Rubber Model | Stock No. | Each | Lots 10 |
|---|---|---|---|---|---|
| 3/4 x 1 | 1/4-20 x 1/2 | K47 | 3CC03 | $1.63 | $1.50 |
| 3/4 x 2 | 3/8-16 x 1⅛ | K75 | 3CC07 | 4.04 | 3.71 |

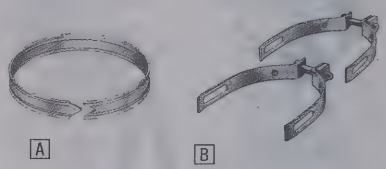
## ADAPTER BRACKET



For 3.3" diameter motors (GE 51 frame). For resilient or solid mount 2⁵⁄₁₆" radius.

**No. 4M738.** GE (A418). Shpg. wt. 0.1 lbs. List $5.00. Each ..... $2.42

# MOUNTING RINGS, LENGTH ADAPTERS, RAINSHIELDS AND FIBRE WASHERS



## MOTOR MOUNTING RINGS

**2½ and 2¼" OD resilient mount rubber rings** reduce vibration and are designed to replace mounting rings on NEMA 48 and 56 frame resilient ring mounted motors. Two rings per bag.

| For NEMA Frames | Key | Brand | OD (In.) | ID (In.) | Thick (In.) | Mfr's Model | Stock No. | List | Each Bag | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|
| **48** | A | Dayton | 2¼ | 1½ | 1/2 | — | **3M143** | $11.03 | **$6.61** | 0.1 |

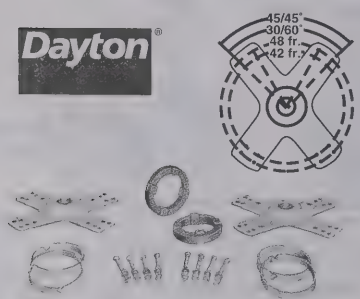
## MOTOR MOUNT SPLIT RING ADAPTERS AND LATCHES

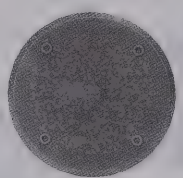


**A Motor mount split ring adapters.** Overlapping aluminum split ring adapters enlarge 2¼" dia. resilient frame mounting rings to 2½" dia. Two overlapping rings required for each side of motor. Sold in packages of 4 rings. GE brand.

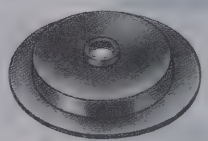
**No. 1A682.** Shpg. wt. 0.2 lbs. List $4.00.
Each pkg. ..... **$2.87**

**B Mounting Latches.** Fasten motor to cradle.

**No. 2X234.** Shpg. wt. 0.1 lbs. List $4.20.
Each pkg. ..... **$3.37**



## MOTOR LENGTH ADAPTER



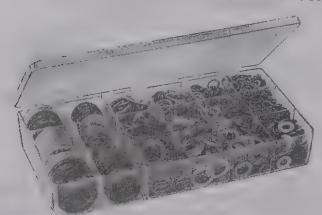
Kit includes 2 length adapter brackets with holes to match thru-bolts on NEMA 42 and 48 frames with 30/60° or 45/45° configuration—plus 2 resilient mounting rings, 4 split rings, 8 bolts with nuts for lengthening motor to fit existing mounting base, and instructions. Dayton brand.

**No. 5X399.** Shpg. wt. 0.8 lbs. List $16.00.
Each ..... **$12.63**

## MOTOR RAINSHIELDS

**No. 4M219**

**No. 4M753**



Designed for open motors mounted shaft up or shaft down in outdoor condenser units to prevent water from migrating down to motor.

Disc type rainshield protects motor in condensing units and other outdoor applications.

Heavy-duty nylon construction resists heat and ultraviolet rays. Internal cooling vanes help reduce motor temperature on Dayton models. Removable center plug for shaft-up or shaft-down mounting on Dayton models. Gray color (Dayton), black (GE). Dayton and GE brands.

| Bore ID (In.) | Diameter (In.) | Brand | GE Stock No. | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **1/2** | 3 5/8 | GE | A483 | **4M753** | $7.00 | **$5.79** | 0.1 |

## MOTOR FUSE BULB HOLDER

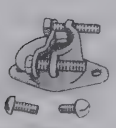
Varia Manufacturing Inc

SUPPLIER DIVERSITY™ Women-Owned Business

As fuse holder, mounts in motor's conduit box knockout to provide overload and short circuit protection for single phase FHP motors. Use time delay plug fuse matched to motor's full load current. As bulb holder, mounts in 7/8" dia. hole, or any 1/2" conduit knockout. Offset threaded extension for tight locations. Body made of heat and impact resistant, high dielectric nylon plastic. Black.

**No. 2X637.** Shpg. wt. 0.1 lbs. List $2.66.
Each **$2.17**; Lots 10 ..... **$2.07**

## MOTOR SWITCH MOUNTING BOXES



For use on NEMA 48 Frame Dayton, General Electric and Westinghouse Motors; NEMA 56 Frame 1/8 to 3/4 HP Westinghouse Motors; and NEMA 56 Frame 1/8 to 1/3 HP General Electric Motors. Gray enamel finish.

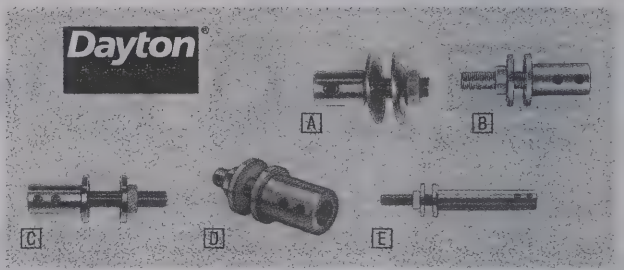
## 7 1/2" EXTENDED THRU MOTOR BOLTS

Set of four bolts with hex spinlock nuts. May be required on motors supplied without extended thru bolts. 10-32 thread. Fits NEMA 56 frame motors.

**No. 4C124.** Shpg. wt. 0.2 lbs. List $10.24.
Set of 4 ..... **$3.67▲**



(▲) Net price, not subject to discounts.

# MOTOR SHAFT ARBORS, KEYLESS CHUCKS, MANDRELS, ADAPTER, AND EXPTENSION KIT

## FRACTIONAL HP MOTOR SHAFT ARBORS

- **Wide selection of sizes and styles**
- **Right-hand and left-hand threads available**
- **Machined from solid bar stock**

Used to mount various buffing and finishing wheels on electric motors. Arbors lock securely to shaft with socket set screws. Hex nut and flanged washers included. All components are zinc-plated. Right-hand thread for CCW rotation facing shaft; left-hand thread for CW rotation facing shaft. Models with 1/2"-20 right-hand thread can be used with Dayton keyless chucks (see below) to drive various shank-mounted power tool accessories.

### FRACTIONAL HP MOTOR SHAFT ARBORS

NOTE: Washers included are machined flange except for "Small" style which are stamped flanged.

## KEYLESS CHUCKS For Motor Arbors

Dayton®

**No. 1F610 Motor Shaft Arbor Not Included**

Use to drive flexible shafts, wire brushes, sanders, drill bits, and other shank-mounted power tool accessories. Mounts on 1/2"-20 RH shaft, see Dayton motor shaft arbors in chart above and mandrel No. 6L098. Jaws are spring-loaded; to open/close turn chuck by hand. Use only on shafts which turn CCW as viewed from the shaft end of the motor. Machined from cold-rolled steel with plated finish.

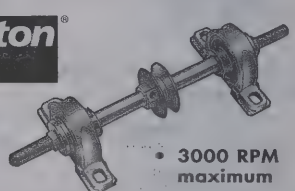
| Capacity | Fits Shaft | Stock No. | Each | Shpg. Wt. |
|---|---|---|---|---|
| 0-1/4" | 1/2"-20 RH | 1F612 | $9.05 | 0.2 |
| 0-1/2" | 1/2"-20 RH | 1F610 | 12.53 | 0.6 |

## 1/4" DIA. SHAFT ADAPTER

For 3½" dia. unit bearing motors. Provides 1/4" dia. x 1"L shaft for using standard fan blade on 1/4"-20 RH threaded shaft (GE 51 frame) unit bearing motors. Socket set screw secures adapter on threaded shaft.

**No. 4X098.** Shpg. wt. 0.1 lbs. List.....$5.36. Each.....**$3.49**

## SHAFT EXTENDER KIT



For use when additional shaft length of 2½" is required. Adapts to 3/8" dia. shaft. Extension is 2½" OAL in 3 sections: 3/8" OD x 1⅝"L, 5/16" OD (shoulder) x 1/2"L with threaded end #10-24 x 3/8"L. Coupling is 3/8" ID x 1/2" OD x 1⅛" OAL with two #5-40 socket set screws.

**No. 4M735.** Shpg. wt. 0.2 lbs. List.....$16.00. Each.....**$12.86**

## HEAVY-DUTY BALL BEARING MANDRELS

Dayton®

- **3000 RPM maximum**

- **Precision setscrew-type ball bearing pillow blocks in die-cast housings are pre-lubricated and sealed for maintenance-free operation**
- **Will take up to 1½" thick buffing/finishing wheels**
- **Suitable for jackshaft applications**
- **Uses A or 4L type V-belt**
- **Includes hex nut and two machined flange washers (1½" OD) for each end**
- **Components are plated to resist rust**

| Drive Shaft (In.) | Threaded Ends RH | Threaded Ends LH | OD Pulley (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| 5/8 x 12 | 1/2-20 | 1/2-20 | 2 | 6L098 | $50.40 | $35.55 | 3.3 |
| 3/4 x 12 | 5/8-11 | 5/8-11 | 2 | 6L099 | 50.40 | 35.60 | 3.6 |

*Motor installation or repair — we have the accessories to do the job right.*

## COMMUTATOR MAINTENANCE PRODUCTS RESURFACERS

**GRADES:**

**Medium (M)**—For general use, high mica, small ridges, and burns.

**Finish (F)**—For use after medium grade, for periodic application and for removing small burns and ridges immediately after their appearance.

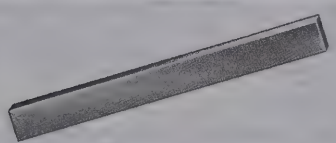
**Polish (P)**—Very fine grade (220 aggregate grain) for burnish finish.

**SIZE:**

Size is always written length x width x thickness (working face area of x depth of stone). For handle types, handle is mounted parallel to the first dimension. Always use a resurfacer with the largest face possible (length x width). Thickness should be governed by clearance around commutator or ring.

**HOW TO USE:**

The resurfacer is simply pressed against the commutator and moved slowly from side to side in the direction of the commutator bars, with the machine running no load at full speed. Centrifugal stresses are thus the same as in normal operation, and the commutator is finished with every segment in true operating condition. On low voltage machines, such as traction motors, the resurfacing may be done with the machine running full load.



## SMALL MOTOR-TYPE RESURFACER

Comes with medium grade of stone on one end and a finish grade on the other. Length of handle is 10". An extremely useful tool for use on small fractional horsepower motors. Ideal brand (80-012A).

**No. 3GD74.** Shpg. wt. 0.1 lbs. List $25.73. Each.....**$17.23**

## PENCIL-TYPE RESURFACER

Used for fans or signal motors, auto generators, locomotive headlight motors, and other fractional HP motors. Ideal brand.

| Size (In.) L x W x D | Grade | Ideal Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 5/8 x 3/8 x 6 | Medium | 80-075M | 3GD76 | $15.43 | $10.36 | 0.1 |
| 5/8 x 3/8 x 6 | Finish | 80-075F | 3GD75 | 15.43 | 10.36 | 0.1 |
| 5/8 x 3/8 x 6 | Polish | 80-075P | 3GD77 | 15.43 | 10.36 | 0.1 |

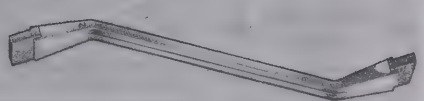
### ORDERING HAS NEVER BEEN EASIER!

**Whether you phone, fax, write or stop by your local branch to place an order, Grainger can tailor sales terms to meet your needs. Ask about establishing an open line of credit or pay with your VISA, MasterCard, or American Express card.**

## BRUSH SEATER AND COMMUTATOR CLEANER

Gentle-acting abrasive is very effective for seating carbon brushes and cleaning commutators and slip rings. Made of soft, loosely bound grain that produces a scouring effect as it is held against the commutator. The abrasive wears away sufficiently for self-cleaning, but does not remove or scratch the copper. Often called a "chalk" stone because of its color and chalk-like texture. Ideal brand.

| Size (In.) L x W x D | Grade | Ideal Model | Stock No. | Each Pkg. | Pkg. Qty. | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 1/4 x 1/4 x 4 1/4 | Medium | 23-001M | 3GD63 | $27.65 | 12 | 0.2 |
| 1/2 x 1/4 x 4 3/4 | Medium | 23-002M | 3GD64 | 15.45 | 6 | 0.2 |
| 3/8 x 3/8 x 4 3/4 | Medium | 23-003M | 3GD65 | 12.79 | 4 | 0.2 |
| 1/2 x 3/8 x 4 3/4 | Medium | 23-004M | 3GD66 | 13.33 | 4 | 0.2 |
| 1/2 x 1/2 x 4 3/4 | Medium | 23-005M | 3GD67 | 9.45 | 2 | 0.2 |
| 5/8 x 1/2 x 4 3/4 | Medium | 23-006M | 3GD68 | 9.88 | 2 | 0.2 |
| 1 1/8 x 5/8 x 4 3/4 | Medium | 23-008M | 3GD69 | 6.55 | 1 | 0.2 |
| 1/2 x 1 x 4 3/4 | Medium | 23-027M | 3GD71 | 6.83 | 1 | 0.1 |
| 1 x 1 x 4 3/4 | Soft | 23-035S | 3GD72 | 28.50 | 4 | 1.1 |
| 1 1/8 x 5/8 x 4 3/4 | Soft | 23-008S | 3GD70 | 6.55 | 1 | 0.2 |
| 2 x 1 x 4 3/4 | Soft | 23-036S | 3GD73 | 23.84 | 2 | 1.1 |



## POWR-POLISH™ FLEXIBLE ABRASIVE

Flexible abrasive cleaner for hundreds of cleaning and polishing jobs. This fine-grain, non-dusting abrasive is held together by a flexible bond. Serves as both commutator cleaner and burnisher. Removes dirt and grease while imparting a super-finish surface. Non-conductive and non-loading. Ideal brand.

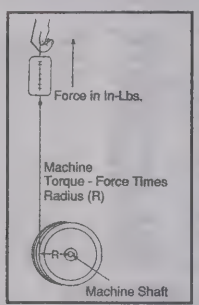
| Size (In.) L x W x D | Ideal Model | Stock No. | Each Pkg. | Pkg. Qty. | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/8 x 1 x 5 | 82-006 | 3GD78 | $24.74 | 4 | 0.1 |
| 3/8 x 1/2 x 5 | 82-001 | 3GD79 | 24.69 | 4 | 0.1 |
| 3/8 x 3/4 x 5 | 82-002 | 3GD80 | 33.30 | 4 | 0.1 |
| 5/8 x 1 x 5 | 82-003 | 3GD82 | 19.36 | 2 | 0.2 |
| 1 x 2 x 5 | 82-004 | 3GD83 | 19.63 | 1 | 0.7 |

## COMMUTATOR SMOOTHIE® RESURFACING TOOL

For smoothing commutators of auto generators, starting motors, and other similar equipment. Consists of an 8½" plastic handle with a 5/16 x 7/8 x 11/16" resurfacer on each end. One resurfacer is polish grade and the other is finish grade. Handle is properly bent to reach into any motor frame. Both the resurfacing material and handle are non-conducting. Ideal brand (80-033).

**No. 3GD81.** Shpg. wt. 0.1 lbs. List $19.74. Each.....**$13.12**

# GEARMOTOR SELECTION GUIDE



## SELECTING A GEARMOTOR

A gearmotor is an electro/mechanical device using an electric motor to drive a geartrain encased in a housing. Geartrain reduces output speed while increasing available torque. Gearmotors are designed to move an object in a given direction and at a rate of speed (RPM) while providing required twisting force (torque). Selection should be easier once output performance requirements are identified. It is critical to know the speed and torque requirements of load to be driven. Unusual loads or harsh environments must be considered before a driving device is selected. Horsepower is *not* a factor in selecting a standard gearmotor, since each gearmotor was predesigned for a specific performance level. For some applications, more detailed design criteria may be required.

## MECHANICAL CONSIDERATIONS

Speed

Torque

| From | Into | Multiply By |
|---|---|---|
| In. -Lb. | Ft.-Lb. | 0.0833 |
| Ft.-Lb. | In. -Lb. | 12 |
| In. -Oz. | In. -Lb. | 0.0625 |
| In. -Lb. | In. -Oz. | 16 |

**Speed.** How fast should equipment or object move? Output speeds are available from less than 1/2 RPM (revolution per minute) to nearly 300 RPM, depending on motor type and gear ratios. Based on your application, you may need to consider whether additional modified speeds will be produced through sheaves or sprocket type drive systems before determining gearmotor output speed.

**Start Torque** provides initial power to get things moving. On large conveyers, starting torque requirement may be high while a small rotating display cabinet may require very little torque to overcome resistance. Small gearmotors typically have "start" and "run" torque specifications shown due to their lower overall output capabilities. Starting torque ratings can be lower than maximum running torque ratings. Heavier duty gearmotors are usually only rated for their full-load (running) torque capability since starting torque is relatively high.

**Running Torque** (Full Load) is the continuous twisting force to keep things moving after initial start and must maintain power under all variable load situations to provide adequate service. Running torque listed in the catalog are maximum torque available for safe, continuous operation. Frequent starts and stops will require use of starting torque more frequently. This could result in excessive heat build-up, causing premature motor failure.

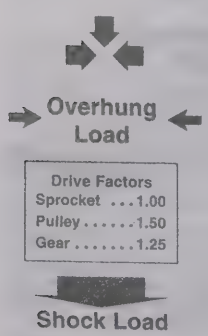
### HOW TO MEASURE TORQUE

**CAUTION: Disconnect Power Before Proceeding**

Torque required to drive a machine may be measured by using a flat grooved pulley, a cord and a spring scale. Pulley must be rigidly attached to machine's drive shaft, with cord wrapped several times around pulley. Do not allow cord to overlap. The other end is tied to the scale. When the scale is pulled, it will turn the pulley. When the pulley first starts to turn, the scale will register starting force required in pounds.

Force registered on scale, in pounds, when multiplied by radius of pulley, in inches, yields the starting torque, in in.-lbs. required by machine. If torque characteristics of machine vary during its operating cycle, torque must be determined at the point in the cycle where it is the greatest. Radius is measured from the center of machine shaft to center of cord.

If pulley can be turned (by pulling on cord) at a rate equal to normal speed of driven equipment, an indication of running torque can be obtained. If load of machine is almost entirely due to friction, running requirement will be essentially the same regardless of speed. However, if load is primarily the result of inertia or windage (air drag), characteristics of the inertia or windage elements must be known.



## ELECTRICAL CONSIDERATIONS

Before you can select the best gearmotor for your application, you need to identify your intended power supply capability. AC and DC input gearmotors from 12 VDC to 460 VAC are available. This chart provides typical characteristics of different motor types as a guide for your selection.

| Type | Starting Torque | Reversible | Speed Controllable* | Features |
|---|---|---|---|---|
| **Synchronous** | Low | Yes | No | Exact RPM output-good for timing and positioning applications |
| **Shaded Pole** | Low | No | No | Rugged, relative low cost |
| **PSC** | Medium | Yes | No | Reversible, quiet operation |
| **Split phase** | Med./High | Yes | No | Fairly high start torque |
| **Capacitor-Start** | High | Yes | No | Heavy duty start-ups, dual voltage |
| **Three Phase** | High | Yes | No | Simple, reliable, high start power and efficiency |
| **Perm. Mag. (12-180VDC)** | High | Yes | Yes | Speed controllable, high start torque |
| **Universal AC/DC** | High | Yes | Yes | Speed controllable, relatively low cost, simple operation |

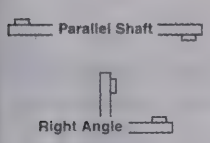
(*) Performance matched speed controls are available for many catalog gearmotor listings.

## LOADS

A load is any and all driven items connected to and driven by the gearmotor output shaft. Not all loads that gearmotors get coupled to have steady speed and torque requirements. Some loads demand power surges from gearmotor during running cycle. This can be abusive to gears. Also, environmental conditions and space restrictions need to be taken into account. Two types of loads that require careful consideration before selecting a gearmotor are:

**Overhung Load (OHL)** is the perpendicular force pushing against the side of an output shaft. This force is either from weight hanging on output shaft or from a sprocket, pulley or gear being used on shaft. Every gearmotor has a OHL specification which *should not be exceeded.* Use following formula to calculate OHL if you plan to use a sprocket, pulley, gear or any weight will be suspended directly on shaft.

$$\frac{\text{Full-Load Torque (Requirement of Gearmotor)} \times 2}{\text{Pitch Dia. of Sprocket, Pulley or Gear}} = \text{Lbs. of load on center of gearmotor output shaft}$$



Multiply pounds of load (obtained from formula) by correct drive factor shown to determine actual OHL ratings in pounds on center output shaft. Catalog OHL ratings are measured on shaft diameter away from gearbox face on output shaft of reducers.

**Shock Load.** Some applications subject gearmotors to loads that transmit shock or abrupt peak loads back to gearmotor. Shock load can create peak loads several times greater than gearmotor torque rating. For example, when a heavy object accidentally is dropped on a running conveyor, this causes shock to gears and may even break them. Gearmotor does not recognize shock load as a warning sign and will try to put out even higher power, possibly exceeding its own gear strength. Be sure gearmotor is rated high enough to handle maximum anticipated shock load conditions.

We deliver the products that deliver the power.

# GEARMOTOR SELECTION GUIDE

## GEARS/MATERIAL

**Parallel Shaft** models include helical and spur gear designs. First stage gears are typically helical for low noise and of phenolic, nylon or steel material. Subsequent gears are usually metallic (sintered of hardened cut steel) as required by performance level designed into gearmotor. Parallel shaft gearmotors offer high efficiency in compact packages.

**Right Angle** models include predominantly worm type which are precision machined from steel. Worm wheel in usually bronze, but may be phenolic or cast iron. Right angle gearmotors tend to be of heavier construction, handle higher shock loads, and run quieter than comparably sized parallel shaft designs, but often less efficiently.

## APPLICATION FORMULAS

| To Obtain | Having | Formula |
|---|---|---|
| Velocity (V) Feet Per Minute | Pitch Dia. of Sheave or Sprocket—Inches and Revolutions Per Minute (RPM) | $V = 0.2618 \times D \times RPM$ |
| Revolutions Per Minute (RPM) | Velocity (V) Feet Per Minute and Pitch Dia. (D) of Sheave or Sprocket—Inches | $RPM = \frac{V}{0.2618 \times D}$ |
| Pitch Dia. (D) of Sheave or Sprocket | Velocity (V) Feet Per Minute and Revolutions Per Minute (RPM) | $D = \frac{V}{0.2618 \times RPM}$ |
| Torque (T) In.-Lbs. | Force (W) Lbs. and Radius (R) Inches | $T = W \times R$ |
| Horsepower (HP) | Force (W) Lbs. and Velocity (V) Feet Per Minute | $HP = \frac{W \times V}{33000}$ |
| Horsepower (HP) | Torque (T) In.-Lbs. and Revolutions Per Minute (RPM) | $HP = \frac{T \times RPM}{63025}$ |
| Torque (T) | Horsepower (HP) and Revolutions Per Minute (RPM) | $T = \frac{63025 \times HP}{RPM}$ |
| Force (W) Lbs. | Horsepower (HP) and Velocity (V) Feet Per Minute | $W = \frac{33000 \times HP}{V}$ |
| Revolutions Per Minute (RPM) | Horsepower (HP) and Torque (T) In.-Lbs. | $RPM = \frac{63025 \times HP}{T}$ |

## THE FINAL STEP

The Gearmotor Selection Guide is sorted by AC and DC input, then categorized by lower to highest RPM. Within each design you will have different torque ratings to select from. While this guide was designed to assist in selection of a suitable gearmotor for your application, it is not possible to identify every particular condition you may encounter in actual use.

# 90 VDC PERMANENT MAGNET PARALLEL SHAFT GEARMOTORS

hurst
INSTRUMENT MOTORS

**Gearcase:** Zinc die-cast
**Lubrication:** Grease filled
**Gears:** Hardened steel; 1st stage helical, subsequent stages spur
**Seals:** None
**Mounting:** All position
**Rotation:** Reversible
**Thermal Protection:** None
**Brushes:** Externally replaceable
**Ambient:** 40°C
**Duty:** Continuous
**Enclosure:** TENV
**Warranty:** 1 Year
**Input Power:** 2¼ watts at full load and 90 VDC
**Controller:** Use with Dayton controller, No. 6A191 (not included)

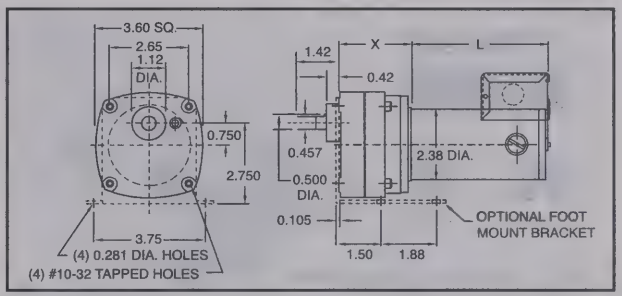
# 90 VDC PERMANENT MAGNET PARALLEL SHAFT GEARMOTORS



Dayton

- 10-32 Tapped hole for No. 6Z392 Pulse Generator

E47479

E47479

**Gearcase:** Die-cast aluminum
**Lubrication:** Permanent heavy fluid gear oil
**Gears:** 1st stage steel, helical; subsequent stages steel or heat-treated powdered metal spur
**Bearings:** Needle on case output shaft; ball on motor
**Seals:** Spring-loaded lip-type neoprene on input and output shafts

**Mounting:** All position
**Rotation:** Reversible
**Thermal Protection:** None
**Brushes:** Externally replaceable
**Ambient:** 40°C
**Duty:** Continuous
**Enclosure:** TENV
**Warranty:** 2 Year

**PARTS AVAILABLE FOR MANY DC GEARMOTORS, CALL 1-800-323-0620**

## DC SPEED CONTROLS FOR 90V GEARMOTORS

- **Adjustable maximum/minimum speed**
- **Fused control protection**
- **Run/stop switch**
- **Metal enclosures (except No. 4Z527 is phenolic)**
- **Built-in transient and surge suppression**
- **Single-phase, 60/50 Hz input**
- **All models are UL Listed and Certified for Canada (E165942)**

For constant or diminishing torque applications requiring adjustable speed control over a wide range. Not intended for constant HP applications such as saws and drill presses or in close proximity of high capacitive discharge electrical circuits such as welding equipment. Black finish. Dayton brand.

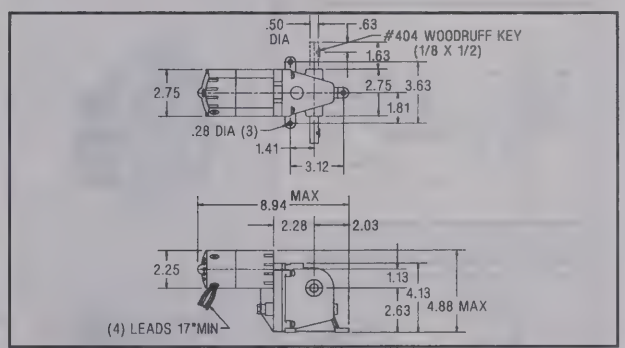
## UNIVERSAL 115V AC/DC RIGHT ANGLE GEARMOTOR

Dayton®

E47479



Right Hand Output

**DAYTON ONE-YEAR LIMITED WARRANTY**

Universal AC/DC gearmotors are warranted for one year. Text of warranty available; see page opposite inside back cover.

Speed Control Available, Order No. 4X796 below

**Gearcase:** Zinc die-cast
**Lubrication:** Grease packed
**Gears:** Input gear, phenolic and steel; output gear, cast iron
**Bearings:** Bronze sleeve on both case and motor
**Seals:** On output shaft
**Mounting:** All position
**Rotation:** Reversible
**Thermal Protection:** None
**Input HP:** 1/15
**Brushes:** Replaceable; approx. 300 hours life
**Ambient:** 40°C
**Duty:** Continuous
**Enclosure:** Vented
**Speed Control:** Adaptable to No. 4X796
**Warranty:** 1 Year; See note by photo above

(*) All ratings are for 60 Hz. Also operable at 50 Hz at 5/6 of 60 Hz ratings for HP and RPM.

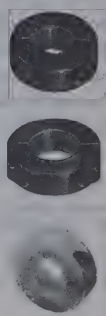
**Optional Mounting Bracket** attaches to face of gear box to provide floor, wall, or ceiling mount. Includes steel bracket and four screws. Dayton brand.

**No. 2A754.** Shpg. wt. 0.7 lbs. List $14.00. Each .....$10.84

## ADJUSTABLE DRILL DEPTH STOP COLLAR SET

Deluxe set contains clamp-style (one piece) split collars which grip around the outer diameter of the drill bit for a strong hold that will not slip and will not damage the bit. Takes the guesswork out of drilling holes to a uniform depth. Easy-to-use and fast—just measure the desired depth, slip the collar over the drill bit, then tighten the screw and drill to exact depth. Includes 7 collar sizes (from 1/8" to 1/2" in 1/16" increments) with hex wrenches in sturdy plastic box. Additional sizes are available, see pages 351 and 352.

**No. 1F616.** Shpg. wt. 0.4 lbs. List $21.00. Each .....$10.50

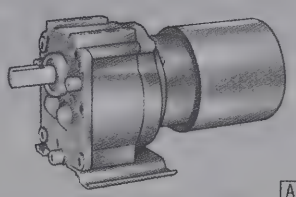


- **1-Pc. Clamp-style Collars**
- **7 Sizes (1/8 to 1/2")**

## A WIDE SELECTION OF INDIVIDUAL SHAFT COLLARS IS AVAILABLE

**THREE STYLES:**
- **Setscrew**
- **One-Piece Clamp**
- **Two-Piece Clamp**

**THREE MATERIALS:**
- **Cold-Rolled Steel**
- **Stainless Steel**
- **Delrin Plastic**



**SEE PAGES 350 AND 351**

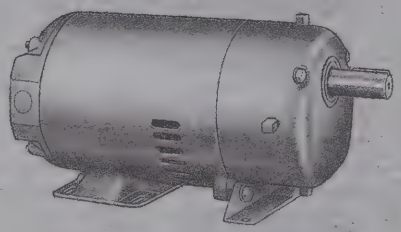
## A WIDE SELECTION OF WASHDOWN PRODUCTS IS AVAILABLE

No. 1F640

Washdown products are for applications in food, beverage, or chemical processing plants where product is constantly exposed to high pressure washdowns or other high humidity or wet environments. Many washdown products feature USDA approved corrosion-resistant white epoxy primer and paint to meet sanitary requirements.



**For Washdown C-Face Speed Controls,** ... See pages 192 and 221
**For Permanent Magnet DC Washdown Motors,** ... See page 301
**For AC Washdown Motors,** ... See pages 154 and 155
**For UHMW-PE Plastic Washdown Bearings,** ... See pages 340 and 341
**For Washdown Shaft Collars,** ... See pages 350 and 351
**For Washdown Speed Reducers,** ... See pages 274 and 275

(*) Operable on 190/380V, 50 Hz at 5/6 of 60 Hz ratings for HP and RPM.

# INTEGRAL AC GEARMOTORS PARALLEL SHAFT

LR6153

Replacement Parts Available
1-800-323-0620

See Specifications Below

**Gearcase**: Cast iron

**Lubrication**: Shipped less oil; see owner's manual

**Gears**: Cut steel

**Bearings**: Ball and tapered roller on case; ball on motor

**Seals**: Double lipped on input and output shaft

**Mounting**: All position, except shaft down

**Rotation**: Reversible

**Thermal Protection**: None

**Ambient**: 40°C

**Duty**: Continuous

**Enclosure**: TEFC

**Brake**: Optional brakes Nos. 3M360 and 2Z871 available for selected models, see page 263.

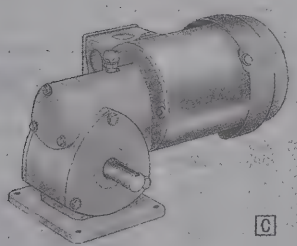
Dayton®



E47479

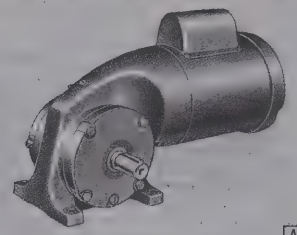
42492



**Gearcase**: Zinc die-cast
**Lubrication**: Grease filled
**Gears**: Heat treated steel
**Bearings**: Sleeve on case; ball on motor
**Seals**: On output shaft
**Mounting**: All position
**Rotation**: Reversible
**Thermal Protection**: None
**Ambient**: 40°C
**Duty**: Continuous
**Enclosure**: TEFC
**Brake**: Adaptable to No. 5X400 brake using one disc in brake
**Capacitor**: Included
**Warranty**: 2 Year

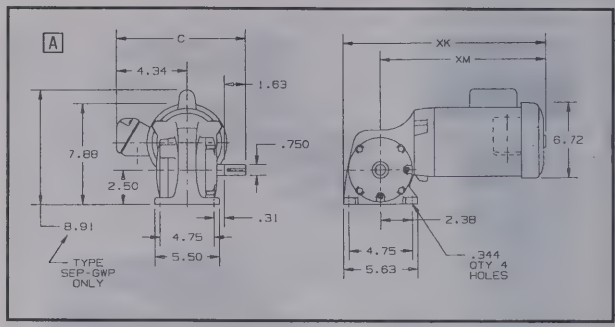
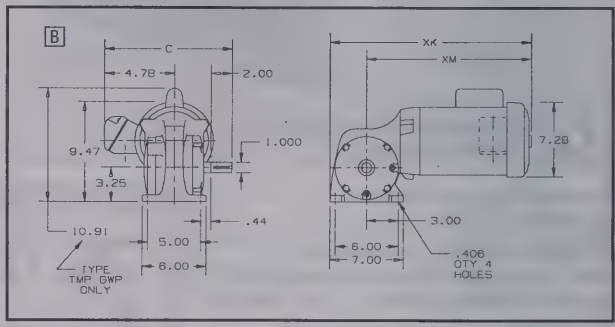
# FRACTIONAL AC GEARMOTORS RIGHT ANGLE

LR6153



A



B

For dimensions of individual line drawings see Specifications chart below.

Replacement Parts Available
1-800-323-0620

**Gearcase:** Die-cast aluminum
**Lubrication:** Shipped with oil
**Gears:** Hardened steel worm, forged bronze output gear
**Bearings:** Roller bearings on case; ball on motor
**Seals:** Two double lips on input and output shafts
**Mounting:** Horizontal, vertical, or at 90° angles
**Rotation:** Reversible
**Thermal Protection:** None
**Ambient:** 40°C
**Duty:** Continuous
**Enclosure:** TEFC
**Features:** Single output shaft

(*) Ratings are at 60 Hz. Also operable on 190/380V, 50 Hz at 5/6 of 60 Hz ratings for HP and RPM.

**FOR SINGLE-PHASE CAPACITOR-START TEFC MODELS, SEE PAGE 250**

**OVER 100 BLOWER TYPES ARE LISTED IN THIS CATALOG**

**You can rely on our blowers for new construction and replacement needs. Shaded pole and industrial blowers, direct and belt-driven, are available with or without motors, controls, drives, and shutters. See Index under Blowers.**

# 1/2 HP ADJUSTABLE SPEED DRIVES

- **Fully assembled and aligned**

Adjustable speed drives are variable speed belt drive transmissions. Include integrally mounted open dripproof or totally enclosed electric motor.

Designed for low speed applications and where speed adjustments are desired. Used on conveyors, shop equipment, machine drives, mixers, and other similar applications.

Speed is controlled by a 14 turn handwheel providing stepless speeds using adjustable pitch pulleys and deep cog belt. Keyed shaft. 40°C ambient, continuous duty. 1.0 Service factor. Gray finish. CSA Certified (LR6153). Dayton brand.

## RIGHT ANGLE

- **Integrally mounted right angle drive for low speed and high torque applications**
- **Repeatable speed setting capabilities**

### GEARCASE CONSTRUCTION

**Worm Gear:** Hardened steel

**Worm Wheel:** Bronze forged

**Output Shaft:** Interchangeable for left or right hand output

**Bearings:** Tapered roller bearings for high overhung load applications

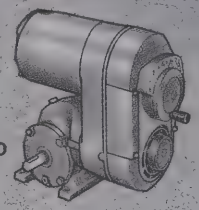
**Mounting:** Horizontal, vertical, or at 90° angles

## PARALLEL SHAFT

- **Shaft rotation easily reversed by electrical reconnection**
- **Constant torque and horsepower ranges on all units**
- **Automatic anticreep device maintains speed setting**
- **Relubrication eliminated by sealed ball bearings and mechanical design which allows disks to slide on shaft with no metal to metal contact**

### GEARCASE CONSTRUCTION

**Case:** Die-cast aluminum



**Bearings:** Sealed ball

**Mounting:** Adjustable, 180° swing cradle base which permits drive to be tilted at any angle

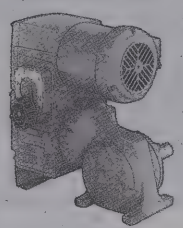
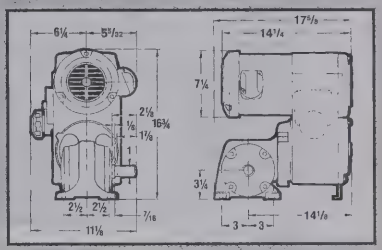
(*) Operable on 190/380V, 50 Hz at 5/6 rated speed and HP of 60 Hz.

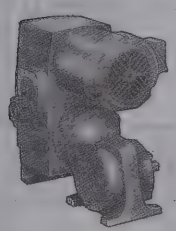
# 1 & 1½ HP ADJUSTABLE SPEED DRIVES

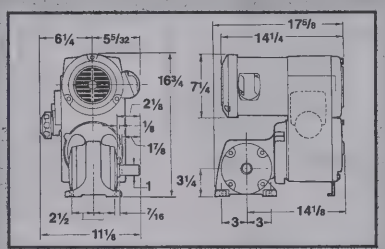


LR6153

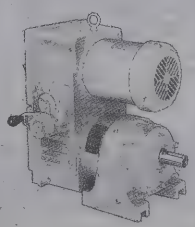


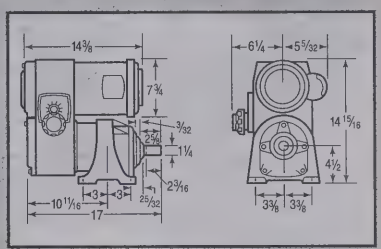
Replacement Parts Available
1-800-323-0620



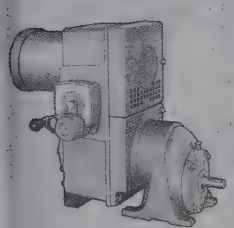


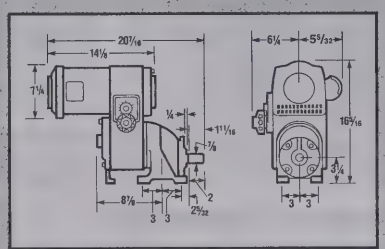
A 1 HP, Right Angle



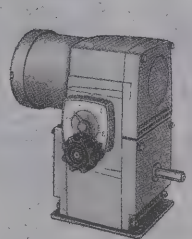


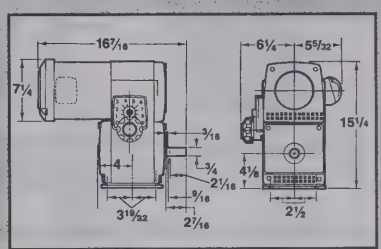
B 1 HP, Right Angle





C 1½ HP, Right Angle
Horizontal, Vertical, or 90° Angle Mount





D 1½ HP, Parallel Shaft

E 1½ HP, Parallel Shaft

F 1½ HP, Parallel Shaft

Adjustable speed drives are variable speed belt drive transmissions, furnished complete with a totally enclosed fan cooled motor. Designed for applications which include conveyors, shop equipment, machine drives, and mixers.

Speed controlled by a 14 turn handwheel providing stepless speeds using an adjustable pitch pulley and deep cog belt. 40° ambient, continuous duty. 1.0 service factor. Gray finish. USEM brand.

## GEARCASE CONSTRUCTION†

**Worm Gear:** Hardened steel
**Worm Wheel:** Bronze forged
**Output Shaft:** Interchangeable for LH or RH output (Nos. 3Z499, 3N296, and 4Z497 only)
**Bearings:** Tapered roller bearings for high overhung load applications
**Brake:** Adaptable to No. 3M360 (available on page 23,263)

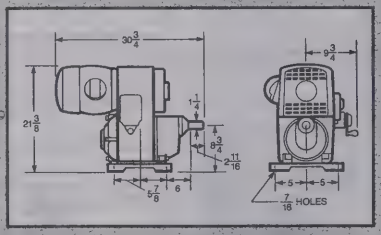
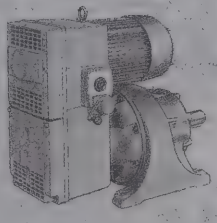
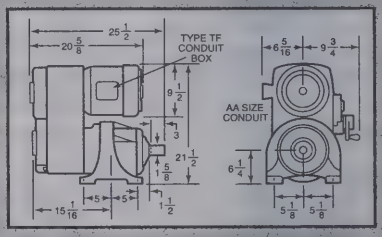
[B] Right Angle





[C] Parallel Shaft



[D] Parallel Shaft

[E] Parallel Shaft

- **Constant torque and HP ranges on all models**
- **Cast-iron gearcase**
- **Automatic anticreep device maintains speed setting**

Designed for applications such as conveyors, pumps, textile machinery, and other general purpose industrial jobs.

Control knob adjusts speed smoothly through adjustable-pitch pulleys and deep cog belt. Sealed ball bearings eliminate the need for relubrication. The mechanical design permits discs to slide on shaft with no metal to metal contact. Anticreep device maintains speed setting. Constant torque and HP ranges on all units. 40°C ambient, continuous duty. 1.0 service factor. Gray finish. USEM brand.

## GEARCASE CONSTRUCTION

**Gears & Pinions:** Hardened steel

**Bearings:** Ball and tapered roller

**Oil Seals:** 2 HP models are friction type, 3 and 5 HP models are friction type, double lip

**Gearcase:** Cast iron

**Shaft Rotation:** Models can be easily reversed by electrical reconnection

**Brake:** 2 HP models are adaptable to No. 2Z871 (see page 263)

**Mounting:** 3 and 5 HP units are horizontal mount only

(*) Also operable on 190/380V, 50 Hz at 5/6 of rated 60 Hz HP and RPM.

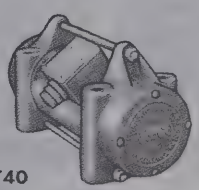
# ELECTRIC VIBRATORS

Used for bulk powder material flow of fine to granular materials in silos, bins, hoppers, and screens. Also for packing materials in drums and bags and unjamming parts in conveyor lines, chutes, and pipes. Adjustable force. Oversized bearings and motor for longer life. All American-made to ASTM and ASME standards.

### 2P MODELS—3600 RPM

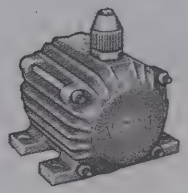
Used on all types of bins containing fine to granular materials, for packing coarse materials, and for casting concrete.

### 4P MODEL—1800 RPM



Used on bins containing lumpy or sticky materials for packing light, fluffy materials, and as a typical screen vibrator.

### SMALL IMPACT LINE ELECTRIC VIBRATORS



Specially developed for applications in small hoppers, screens, chutes, tables, and filling machines where only a small shake is necessary but vibrator reliability is a must. Provides controlled flow on all types of materials, including fine powders, flakes, pills, bottle caps, and jaw.

## HYDRAULIC VIBRATORS

- B-type vibrators offer a low-cost solution for OEM applications
- HLF-type vibrators are designed to produce high force at low frequency
- Can be mounted in any position
- Not affected by dirty, muddy, wet locations
- Operate up to 3000 PSI
- Adjustable speed
- Continuous duty

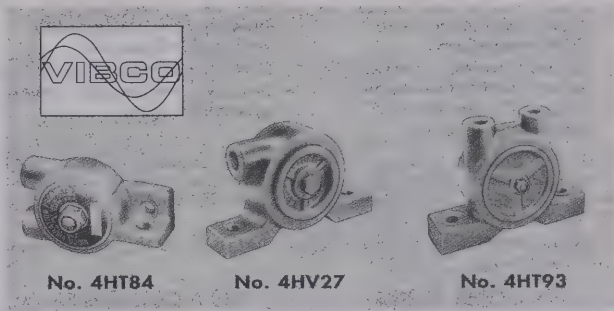
# PNEUMATIC BALL AND PISTON VIBRATORS



## PNEUMATIC BALL VIBRATORS

- **Hardened steel ball**
- **Hardened steel race**
- **Any position mount**

**Model BB vibrators** are designed for small to medium amount of vibration. Applications include laboratory equipment, small hoppers and parts feeders, and match plates.

**Model V vibrators** include a built-in muffler for added noise reduction and are designed to work in adverse conditions of water, heat, cold, or dirt.

**Model BV vibrators** will withstand temperatures up to 350°F by maintaining air flow through unit. Threaded exhaust port allows for silencing muffler to be added, or piped to a remote location.

## PISTON VIBRATORS

**Model 55 Series** features low cost, one-piece housing, and only three parts.

**Models 10/50 Series** feature all steel construction, bolt isolation design for longer life, and impacting with both up and down strokes.

Piston vibrators have high impact, linear force and highly efficient energy transfer to assure smooth flow of material through bins, chutes, and weight batchers. Typical applications include: mining, chemical plants, plastics manufacturing, foundries, and paper plants. Lubrication is required.

# PNEUMATIC SILENT TURBINE VIBRATORS

- **Quiet operation meets OSHA standards**
- **No lubrication required for lower installation costs**
- **Longer life for lower replacement costs**
- **Directly interchangeable with ball vibrators**
- **Outlast ball vibrators 3:1**
- **Less air required for lower operation costs**

Quiet pneumatic turbine vibrators have become the standard units in the automotive, chemical, plastics, bio-tech, plating, and food industries. For use on batchers, supply hoppers, packaging lines and chutes.

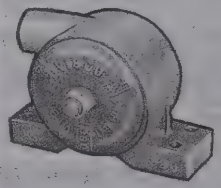
Turbines are an ideal, low-cost solution to vibration needs when air is available.

### VS MODEL SERIES

Features built-in muffler for lower cost. More compact size than BVS series.

### BVS MODEL SERIES

For applications such as food, pharmaceutical, and clean rooms where exhausted air must be remotely discharged.



### BBS MODEL SERIES

For very small applications such as aiding flow in parts feeders, foundry matchplates, and unjamming caps in parts feeders.

# RAILROAD CARSHAKERS AND INTERNAL CONCRETE VIBRATORS

## HEAVY-DUTY PNEUMATIC TURBINE RAILROAD CARSHAKER VIBRATORS

- Rotary piston carshaker can empty the most stubborn materials
- Features low air consumption compared to other pneumatic units

### SIMPLE RULES FOR SELECTING YOUR CARSHAKER

| Stock No. | Material in Railroad Car |
|---|---|
| 6L764 | Cement, flour, carbon black, bone black, aluminum shot |
| 4HV43 | Salts, molasses, iron ore, malt (if sticky) potash, bauxite, calcium carbide, crushed marble, Sand, stone, asphalt, stone dust, hy-ash, salt, coal, clay-lime lumps, and like materials |
| 4HV56 | Electric Operation "After" Vibration (For Cleaning Car) Cement, sugar, flour, chemical salts (no moisture), corn grits, arsenic, barley hops, carbon black borax, fluoride, gypsum, sodic sulphate, peanuts, sodium nitrate, semolina, tri-sodium phosphate, and like materials |

No. 6L764

### RAILROAD CARSHAKER

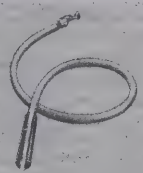
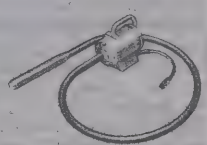
(*) Operates on 115/230V.

## INTERNAL CONCRETE VIBRATORS



**PNEUMATIC**

- KA Series
- Maintenance free
- Only one moving part
- Patented "wear plate" design; no bearings



**ELECTRIC**

- JVS/ACE Series
- Motor UL Listed
- Wraparound protective frame
- Heavy-duty brushes

Pneumatic and electric internal vibrators are available in different shaft lengths and sizes to fit in applications of all sizes.

No. 4HP66

No. 4HP70

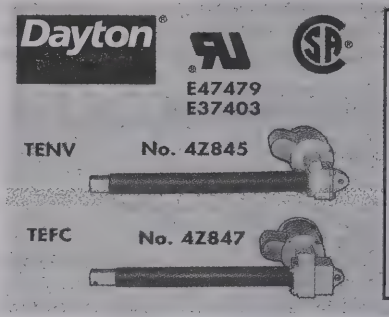
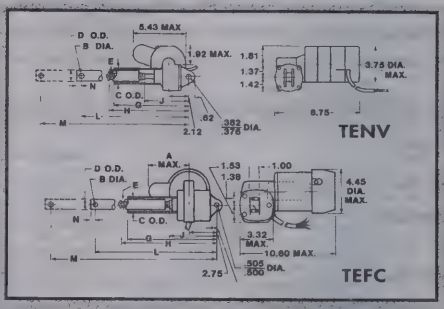
# AC AND DC LINEAR ACTUATORS

## AC LINEAR ACTUATORS



- **Linear actuators designed for light or heavy-duty applications**
- **Adjustable limit switches for user control in positioning applications**



Dayton electromechanical actuators are designed for indoor use and feature permanent split capacitor motors with TENV design for light-duty applications or TEFC design for industrial duty. Provide 10 to 12" of linear motion.

Units are rated for loads from 300 to 1300 thrust lbs. at speeds from 8.4 to 20.0 in. per minute. Actuators can be modified to shorter stroke lengths. Single lead, rolled thread lifting screw with work-hardened finish provides long life and efficient, smooth operation. Built-in worm gear set for quiet gear reduction. Single right hand acme screws.

Outer tube helps protect screw and nut from dust and contaminants. Outer tube and translator tube may be removed and replaced with driver nut (included) to provide additional stroke modification. Pivot mount can be positioned at 90° intervals (Nos. 4Z845 and 4Z846 only). Adjustable limit switches provide user control in positioning-type applications.

115V, AC, 60 Hz single-phase PSC motors feature automatic reset thermal protection and 16" power cord. Capacitor included. Recognized by UL for construction (E47479) and motor protector (E37403) under the Motor Component Recognition Program. CSA certified. Dayton brand.

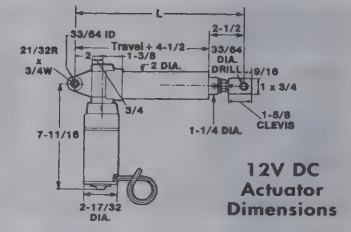
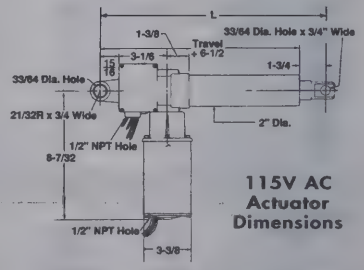
## AC AND DC LINEAR ACTUATORS

- **Actuators with 6, 12 or 18" extension**
- **Integral clevis mount permits freedom of movement**

For use indoors or outdoors (with environmental protection) on stationary or mobile equipment. Feature thermally protected motors. Actuators are completely self-contained and have an enclosed weather-resistant 115VAC limit switch with automatic-set ball brake.



12V DC motor, overtravel protector, load-limiting friction-disc clutch and automatic-set spring brake. High strength gear and pinion set has 20:1 ratio; double lead screw and nut are high-efficiency design.



Steel translating tube is zinc-coated and sealed at output end. All components are sealed in corrosion-resistant aluminum alloy die-cast housing. Capacitor supplied with AC units. Dayton brand.

# SATELLITE DISH LINEAR ACTUATORS

Suitable for use with 8 to 10 ft. dia. solid or 12 ft. dia. mesh-type dishes. Rated load: 600 lbs. 36 VDC, available with more popular Reed switch or potentiometer feedback signal. Includes terminal strip for electrical connection, watertight strain relief for input cable and limit switch for travel adjustment from 0 to 24". Weather protection provided by zinc plating with yellow dichromate finish, protective boot and wiper and lifetime lubrication. Reed switch has 24 counts per inch. Potentiometer value 10KΩ, 10 turn. Von Weise brand. Use with No. 2A769 clevis mount.

# MODULAR AC & DC LINEAR ACTUATORS

## MODULAR AC & DC LINEAR ACTUATORS

Available in 12, 36 or 90 VDC and 115VAC gear drives and two tube assemblies which provide 12 or 24" travel. Tube adapter and Pin-In-Groove coupling allows interchangeability between drives and tubes Nos. 6Z090 and 6Z091. All drives are 20% duty cycle; one minute on, four minutes off. All have ball bearings and are totally enclosed. Zinc die-cast gearboxes are gasketed and grease lubricated. Delrin gears throughout except steel motor pinions. Can be mounted by clevis and trunnion or optional clamp.

**No. 6Z086, 115VAC Drive** features auto reset thermal protection and limit switches. PSC motor drive comes with capacitor. Clevis mount. Gray.

**No. 6Z087, 12VDC Drive** is gasketed front and rear. Clutch mechanism. Clevis mount. Black.

**No 6Z088, 36VDC Drive** is for use as an antenna actuator. Gasketed front and rear. Watertight strain relief. Microswitch feedback system for antenna positioning. Internal brushes and terminal strip. Actuator tube mount via trunnion or optional clamp No. 2A769. May be protected from environment by optional boot and wipe. Features limit switches. Black.

**No. 6Z089, 90VDC Drive** gasketed front and rear. Externally accessible brushes. Clutch mechanism. Clevis mount. Black.

## BOOT AND WIPE

Keeps dirt, water and other contaminants out of actuator. For installation on No. 6Z088 when the drive is used outside. Wipe is usable on No. 6Z090 or 6Z091. Gray.

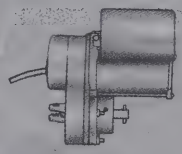
**No. 6Z092.** Boot and Wipe. Shpg. wt. 0.8 lbs. List $16.00. Each.....**$13.05**

FOR ADDITIONAL AC & DC LINEAR ACTUATORS, SEE PAGE 260

FOR SATELLITE DISH LINEAR ACTUATORS, SEE PAGE 261

## LINEAR ACTUATOR TUBES

Designed to mate with tube adapter and Pin-In-Groove coupling shafts of drives Nos. 6Z086, 6Z087, 6Z088 and 6Z089. Tubes have trunnion mounting capability and rod end bearing. Tube contains a 3/4"-6 right hand single lead Acme thread screw. Yellow dichromate finish to prevent rust.



Alternative mounting for drive Nos. 6Z086, 6Z087, and 6Z089 provided by optional clamp No. 2A769.

**No. 2A769.** Clevis Mounting Clamp. Shpg. wt. 1.4 lbs. List $12.00. Each .....**$9.59**

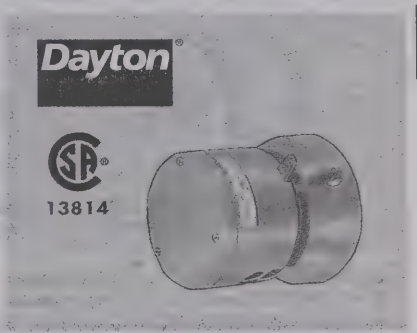
# 3/8 TO 6 FT.-LB. ELECTRIC BRAKES FOR MOTORS AND GEARMOTORS



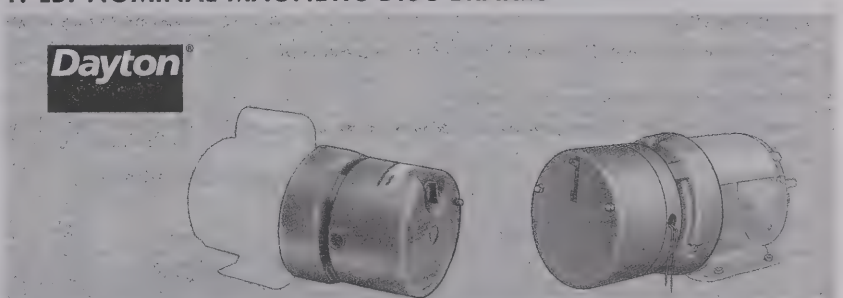
## 3/8 AND 3/4 FT.-LB. MAGNETIC DISC BRAKE

**For 115V, 60 Hz gearmotors.** For stopping AMD and holding action on shaded pole, split-phase and PSC gearmotors used on conveyors, door openers, etc. Not intended for accurate positioning applications. Twin disc design is factory set for 3/4 ft.-lb. for use with gearmotors with 1/14 HP or larger. One disc can easily be removed to reduce torque to 3/8 ft.-lb. for use with gearmotors with 1/15 HP or smaller. 40°C maximum ambient, 1.0 service factor, continuous duty. Brake mounts on shaft extension of gearmotors by using brake hub and mounting bolts (incl.); engages and holds loads under power-off conditions, releases when power is applied. 115V, 60 Hz. 15" long leads connect to motor. 3 1/32" long, 4 1/16" diameter. In rush amp .36; holding amp .16. Other coils to convert voltage/Hz are available, call 1-800-323-0620. Dayton brand.

**No. 5X400.** Shpg. wt. 2.5. lbs. List $82.25. Each ..... **$65.95**

## 1½ FT.-LB. MAGNETIC DISC BRAKES

**For 115/230V, 60 Hz gearmotors only*.** Magnetic disc brake designed for single and three-phase TEFC gearmotors applications such as conveyors and door openers, requiring rapid stopping and holding action. Not intended for vertical holding applications such as vertical conveyors or hoists. Brake package contains replacement fan and endbell for converting TEFC gearmotors to brake gearmotors.



Single-phase static torque brake rated for 115/230V, 60 Hz operation. 40°C ambient, 1.0 service factor, continuous duty. For three-phase gearmotors use brake with optional 230/460V, 60 Hz magnet assembly, No. 4X573 listed below.

Brake engages and holds load under power-off conditions, automatically releases when power is applied. Load can be released when power is off by switching manual lever. Overall length of gearmotor increases 4 3/8"; 5 11/16" diameter. 18" leads for easy connection. Other coils available to convert voltage/Hz by calling 1-800-323-0620. Dayton brand.

| Gearmotor Phase | Fits these Dayton High Torque Gearmotors | | | | | | | Stock No. | List | Each | Shpg. Wt. |

(*) **MAGNET ASSEMBLY** for converting brake to 230/460 three-phase gearmotors.
**No. 4X573.** Shpg. wt. 1.6 lbs. List ..... $36.10.
Each ..... **$28.45**

## 3 AND 6 FT.-LB. NOMINAL MAGNETIC DISC BRAKES

**Magnetic spring-set disc brakes** mount on most totally enclosed fan-cooled Dayton general purpose motors, many right-angle gearmotors, and many mechanical adjustable speed drives. Use in applications requiring rapid stopping and holding action such as conveyors and door openers. Not intended for accurate positioning or indexing applications or vertical holding applications such as vertical conveyors and hoists.

**Brake engages and holds load under power-off condition** and automatically releases when power is applied. Load can be manually released when power is off by switching release lever. Include fan shroud, brake, fan, shaft adapter, and other hardware needed to mount to fan end of motor. Gray enamel finish. Dayton brand.

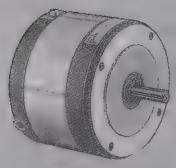
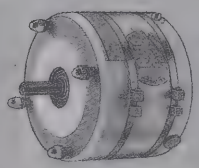
# 3 TO 6 FT.-LB. ELECTRIC BRAKES AND 5 TO 15 FT.-LB. ELECTRIC CLUTCH



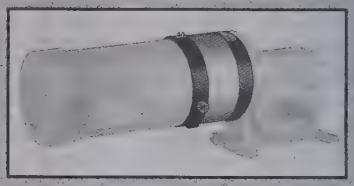
## DOUBLE C-FACE MAGNETIC DISC BRAKES

Dayton®



13814

Replacement Parts Available 1-800-323-0620



Standard Double C-Face Magnetic Disc Brake

Washdown Double C-Face Magnetic Disc Brake

- **Brake coil is rated at 115/208-230 volt, 60 Hz or 110/208-220 volt, 50 Hz single phase**
- **For use with single-phase motors or, when wired per instructions included, with 230/460 dual voltage three-phase motors**
- **15" long coil leads**
- **Brakes are rated at 40°C maximum ambient temperature and 3450 RPM maximum input speed**

**WASHDOWN BRAKE FEATURES:**

- **BISSC Certified**
- **Complies with NEMA Def. MG1-1.26.5 for waterproof machines**
- **USDA approved white epoxy paint**
- **Complies with 3A Dairy Standards pertaining to nonproduct contact surfaces**

Designed for operation on NEMA C-face motors up to 3 HP at 3450 (NEMA 56C, 143TC, and 145TC—see dimensional drawing above). Used for applications that require rapid stopping and holding power: conveyors, door openers, and general machine drives.

**Brake is not intended for accurate positioning applications.**

Brake engages and holds load under power-off condition. Brake must be energized at the same time as the motor. Brake has a manual release which resets automatically when magnet coil is energized.

Nos. 6K233 and 3M366 brakes may be used to convert a NEMA C-face motor to a brake motor. They also may be used between a NEMA C-face motor and NEMA C-face gear reducer to make a brake gearmotor. Nos. 1L388 and 1L389 brakes can only be used to make a brake gearmotor.

Standard brake has a black finish and the washdown brake has a white finish. CSA Certified (13814). Dayton brand.

## CENTRIFUGAL CLUTCHES FOR AIR-COOLED GAS ENGINES

**Max-Torque Centrifugal Clutches** may be used on outdoor equipment, go-karts, mini-bikes and other applications where load is automatically transferred based on engine speed.

- **3/16" standard keyway, key and set screws come with each clutch**
- **For 4-cycle engines 2 to 6 HP**
- **Transmits torque loads up to 10 ft./lbs. at up to 4,000 RPM**
- **Preset to engage at 2,000 RPM**
- **Clockwise or counterclockwise rotation**
- **Sintered metal shoes**
- **Stainless steel garter spring**
- **Ground bearing sleeve provides less friction and extended life**
- **2¼" width, 4¼" outside diameter of clutch drum on all models**

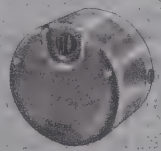
No. 3ZC55 No. 3ZC50



# DIRECT REPLACEMENT OEM CLOSE-COUPLED SPRING SET AC DISC BRAKES

**Stearns®** *Brakes, Clutches and Clutch-Brakes*

Replacement Parts Available
1-800-323-0620

A No. 5U269

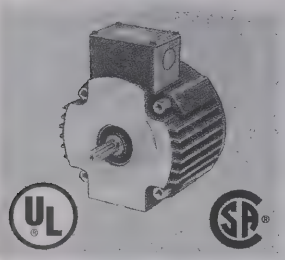
B No. 5U275

C No. 5U331

- **Horizontal mounting on Series 82,000, 86,000 and 87,000 brakes**
- **New 87,000 spring design permits easy conversion to vertical applications**
- **All position mounting on Series 56,000 brakes**
- **Static torque range 1.5 through 105 ft.-lbs.**
- **NEMA C-face mounting 48C through 256TC**
- **Brake features manual release with automatic reset**
- **All brakes operate on both single and three phase for 60/50 Hz operation**
- **Class B coil insulation**

Typical Applications: Direct replacement for OEM brakemotor applications already in service: Performance matched designs for rapid stopping and holding of all major brakemotor designs used in material handling, hoist, door openers, and general machine drives.

Brake engages and holds load under power-off condition and automatically releases when power is applied. Brake is not intended for accurate positioning applications.



NEMA 1 Enclosures are for indoor or enclosure protected outdoor environments.

NEMA 4 Enclosures are for outdoor installations, or where there are moist, abrasive, or dusty environments.

# DOUBLE C-FACE ELECTRICALLY SET MODULAR CLUTCHES, BRAKES, AND CLUTCH/BRAKES

**Stearns®** *Brakes, Clutches and Clutch-Brakes*

- **All-position mounting**
- **Large fully gasketed conduit boxes**
- **Precision sealed ball bearings**
- **Overhung load: 85 lbs. all units**
- **Enclosure: Totally enclosed non-ventilated (TENV) on 50, 100, and 180 Series, splash proof on 210 and 250 Series**

Starting and stopping of the load is achieved by switching between the clutch and brake. Load will start when voltage is applied to the clutch and will stop when voltage is applied to the brake. Motor will run continuously, eliminating premature motor failure. Units mount between a C-face motor and a C-face reducer or indirect using optional adapter below. Load can be connected directly to the output shaft of the clutch/brake, clutch, or brake.

**Selection Chart**

**CAUTION: RPM refers to shaft speed at clutch or brake. Based on 2.75 service factor**

## OPTIONAL ACCESSORIES FOR DOUBLE C-FACE CLUTCHES AND BRAKES

**Tor-ac® Kit** allows 90 VDC clutches and brakes to operate on either 115 or 230 volts alternating current input by adding unit into conduit box maintained. UL and CSA unit approval.

**Input Adapter Kit** provides for indirect coupling to a standard motor (utilizing a belt and sheave arrangement).

**Base Kit** converts double C-face clutches and clutch/brakes to base mounting by adding appropriate base kit. No base kit for brakes only.

**Tor-ac® KITS**

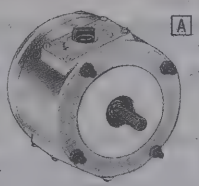
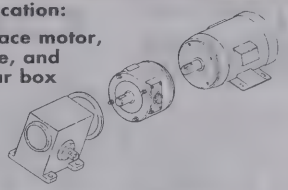
*We deliver the products that deliver the power.*



# DOUBLE C-FACE COUPLER AC SPRING-SET DISC BRAKES

**Stearns®** *Brakes, Clutches and Clutch-Brakes*



LR6254

**For information on how to select a motor brake see chart.**

**Replacement Parts Available 1-800-323-0620**

**Typical Application:**
**Standard C-face motor, coupler brake, and standard gear box with C-face input.**

- **Double C-face coupler**
- **For 60/50 Hz operation**
- **Class B coil insulation**
- **40°C ambient**
- **Splined hubs ensure contact between hub and friction disc**
- **Horizontal mounting on Series 87,700 brakes**
- **All position mounting on Series 56,700 brakes**
- **Manual release with automatic reset**
- **CSA Certified (LR 6254)**

**Typical Applications:** Direct replacement of existing coupler-type brakes and in new OEM applications that convert a standard NEMA C-face motor into a brakemotor or a brake gearmotor when mounted between the motor and gear unit. Used on applications that require rapid stopping and holding in material handling, hoist, door opener, and general machine drives.

Brake engages and holds load under power-off condition and automatically releases when power is applied. Brake is not intended for accurate positioning applications. Do not attach side loads directly to output shaft.

**Series 56,700 Brakes 1.5-15 ft.-lbs.** have NEMA 140TC input face and NEMA 56C output face. Can be easily converted to 56C input or 140TC output with bushings supplied.

**Series 56,700 Brakes 20 and 25 ft.-lbs.** have NEMA 140TC input and output faces only.

**Series 87,700 Brakes** are for remote, inaccessible applications which require bigger frame sizes and higher torques. Self-adjusting to compensate for friction lining wear. Provide more efficient operation where rapid cycling occurs.

**NEMA 1 Enclosures** are commonly used for indoor or enclosure protected outdoor environments. Enclosure limits drops of liquid or solid particles from entering when striking from any angle from 0 to 15° downward from the vertical. Meet NEMA 1-1.25.1 specification*.

**NEMA 4 Enclosures** are commonly used for outdoor installations, or where there are moist, abrasive, or dusty environments. Enclosure limits the entry of dust, abrasives, and water that is sprayed on the enclosure. Meet NEMA MG 1-1.26.5 specification*.

(*) Reference NEMA specifications for a detailed explanation and test method.

# C-FACE RIGHT ANGLE SPEED REDUCERS

Dayton® New

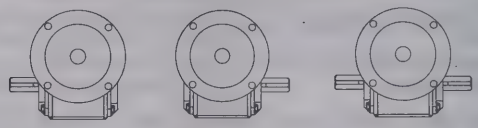
No. 4Z284 with f-1 Shaft Assembly Shown

Replacement Parts Available 1-800-323-0620™

- 29 to 350 RPM
- Single and double output shaft assemblies
- Interchangeable with most Grove (Flexaline) and Ohio (Uniline) reducers
- All units shipped with oil

Designed for low speed/high torque, continuous duty applications when coupled to a NEMA 56C face (some 3.00 and 3.25" WCD units vary on input shaft and frame size), 1750 RPM motor (not included). Features double-lipped and spring-loaded shaft seals and large oil sump.

**Housing:** Cast iron



**Bearings:** Ball on input shaft, tapered roller bearings on output shaft

**Worm:** Thread-rolled and hardened alloy steel worm for higher strength and lower power loss with forged bronze and hardened worm gear

**Mounting:** Any position (with optional bases from page 269) except input motor shaft up.

| Worm Center Distance (In.) | Overhung Load (Lbs.) |
|---|---|
| 1.33 | 275 |
| 1.54 | 388 |
| 1.75 | 700 |
| 2.06 | 875 |
| 2.37 | 845 |
| 2.62 | 1300 |
| 3.00 | 967 |
| 3.25 | 1500 |

**Replacement Parts Available 1-800-323-0620**

- **BOSTON LIFETIME LIMITED WARRANTY. See page facing inside back cover of catalog for details**
- **SHIPPED LESS OIL (See listing for No. 4ZF30 on page 2766)**

Heavy-duty worm gear speed reducers with value-engineered features for flexible installation, long life, and simplified maintenance. Fine-grained cast-iron housing. Integral input worm and shaft of case-hardened alloy steel.

Oversized ball and roller bearings for maximum performance. Extra threaded bolt holes, when used with base, allow multiposition installation on floor, sidewall, or ceiling (with optional base kits). Boston brand.

- **29 to 350 RPM with 1750 RPM input motor**
- **Single output shaft**
- **All position mounting with base kits shown on page 273**
- **Fan kit available separately; see page 273**

## INPUT BORE DIMENSIONS

| Bore Code* | NEMA Mounting | Bore (In.) | Keyway (In.) |
|---|---|---|---|
| B4 | 42CZ | 0.500 | 1/8 x 1/16 |
| B5 | 56C | 0.625 | 3/16 x 3/32 |
| B7 | 140TC/180C | 0.875 | 3/16 x 3/32 |
| B9 | 180TC/210C | 1.125 | 1/4 x 1/8 |
| B11 | 210TC/250TC | 1.375 | 5/16 x 5/32 |
| B13 | 250TC | 1.625 | 3/8 x 3/16 |

(*) Bore code found in Boston Model No.

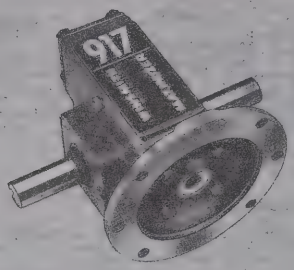
## SYNTHETIC GEAR OIL

Mobil SHC® 634 (Quart). Multi-viscosity synthetic oil based on synthesized hydrocarbon fluid technology. Lubricant is recommended for industrial enclosed gear sets and heavily loaded plain or rolling bearings operating under severe conditions such as extremely high or low temperatures and loads. It contains additives that enhance its oxidation stability, corrosion protection, and protection against wear.

Viscosity (SUS at 100°F): .....2236
ISO Viscosity Grade: .....460
Flash Point (°F) min.: .....460
Pour Point (°F) max.: .....-20

**No. 4ZF30.** ❸ Shpg. wt. 2.0 lbs. List .....$10.11. Each .....**$8.60**

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.



# C-FACE RIGHT ANGLE SPEED REDUCERS

WINSMITH
HIGH QUALITY SPEED REDUCERS

**MAXIMIZER**

**MAXIMUM PROTECTION FOR STANDARD AND SEVERE DUTY APPLICATIONS**

- WINSMITH 24 MONTH LIMITED WARRANTY, see page facing inside back cover of catalog for details
- USDA APPROVED EPOXY COATING prevents rust and corrosion in washdown environments
- USDA rust preventative coating on all shafts
- Shaft slingers prevent liquids from entering reducer
- Filled with Mobil SHC629 synthetic lubricant
- Reducers can be mounted with or without optional bases using predrilled and tapped holes provided (see bases on page 276)
- See Dimensional Drawing and Chart on Page 275
- Single (left hand facing C-face input) and double output shafts

NOTE: All base kits include four mounting screws and one tube of fastener adhesive. (*) Two mounting plates are supplied to match the shaft heights of the equivalent Wingear.
(†) The shaft heights to base are 0.75" greater than existing Wingear models.
(‡) Bases are designed to duplicate the mounting hole pattern and shaft heights of D-Line/D90-SE product, however input and other dimensions may vary.

## THE SPEED REDUCER BOOK

From Winsmith. Book explains how the various types of speed reducers work. It also defines industry terms and ratings. Chapters include speed reducer fundamentals, types, applications, installation and maintenance. It is tailored to the beginner. 179 pages.

### ORDERING INFORMATION

| Stock No. | List | Each | Shpg. Wt. |

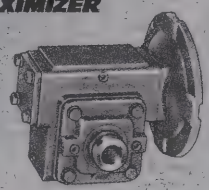
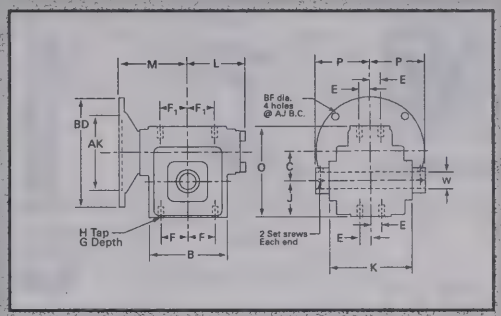
## DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER



**Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.**

# HOLLOW SHAFT RIGHT ANGLE SPEED REDUCERS



- Uses standard NEMA C-face drive motors, see NEMA motor frame chart below
- Winsmith 24 month Limited Warranty, see page facing inside back cover of catalog for details
- USDA APPROVED EPOXY COATING prevents rust and corrosion in wash-down environments and USDA rust preventative coating on all hollow shafts
- Keyed hollow output shaft
- Output (hollow shaft) drive key and (4) locking setscrews provided
- Filled with Mobil SHC629 lubricant
- See optional torque arm rod kits below and mounting bracket kits on page 278
- Hollow shaft output bero bushing kits available throught Grainger parts operation.

| 1L391 | 4.57 | 7.50 | 7.38 | 1.12 | 6.75 | 5.63 | .625 | 2.06 |

- Designed for use with speed reducers from pages 274 and 275 and input motors listed below
- For applications requiring speeds slower than 29 RPM/60:1 in C-face design
- Chart selects components using the speed and torque values needed for the application
- Simplifies drive design with less need to use sprocket/pulley speed reduction at the output shaft
- Uses 42CZ fractional HP motors listed below
- Has double C-face construction for easy assembly
- Performance matched with listed reducers only
- Units have "Maximizer" features

| Output Speed (RPM) at 1725 RPM | Continuous Duty Output Torque In.-Lbs. at Input Motor HP Shown 1/8 HP | 1/6 HP | 1/4 HP | 1/3 HP | Required Components: Reducer Stock No. (See pages 274 and 275) | Ratio Multiplier Stock No. | Final Ratio With Multiplier plus Reducer |

# DOUBLE ENVELOPING SPEED REDUCERS

WINSMITH
HIGH QUALITY SPEED REDUCERS

- **WINSMITH 24 MONTH LIMITED WARRANTY, see page facing inside back cover of catalog for details**
- **Double enveloping reducers are shipped with integral mounting base**
- **Feature higher capacity double enveloping gearing**
- **Filled with Mobil SHC634 synthetic lubricant**
- **Accepts a wide range of NEMA motor frames (at rated horsepower and RPM); See chart below**
- **Coupling required; must order separately (see page 357 for a complete listing of couplings)**

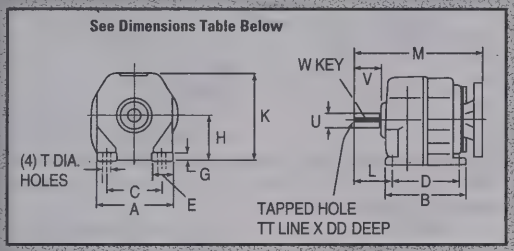
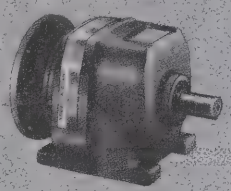
## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE



Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.



# C-FACE INLINE HELICAL SPEED REDUCERS

Boston Gear

Replacement Parts Available
1-800-323-0620

See Dimensions Table Below

- Standard NEMA C-face allows use of any industry standard motor
- Ratios up to 71:1 in only two stages; increases efficiency and reduces case size
- Patented input bushing system allows positive torque transfer and eliminates fretting corrosion
- Dimensionally interchangeable with SEW Eurodrive inline helical reducers
- All units shipped prelubricated (shipped with Mobil SHC634 lubricant, No. 4ZF30)
- Powdered epoxy paint suitable for washdown applications
- Boston Gear 2-Year Warranty; see page facing inside back cover of catalog for details

# INDIRECT DRIVE AND C-FACE PARALLEL SHAFT SPEED REDUCERS

## INDIRECT DRIVE AND 42CZ/48C-FACE SPEED REDUCERS

- **Meets AGMA Class I design criteria**

**Pinion & Gears:** Heat-treated steel with helical first stage gearing

**Bearings:** Heavy-duty needle and ball bearings and thrust balls

**Base:** Removable to allow high or low positioning of output shaft; face mounting holes on output side of reducer

**Gearcase:** Die-cast aluminum housing

**Lubrication:** Shipped with heavy-duty oil lubricant in gear case

**Seals:** Spring-loaded lip-type oil seals or input and output shaft

**Mounting:** Base or face horizontal

**Finish:** Gray

No. 4Z498 matches NEMA 42 frame shaft height. Nos. 4Z499 thru 4Z503 match NEMA 48 frame shaft height.

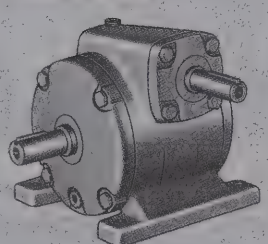
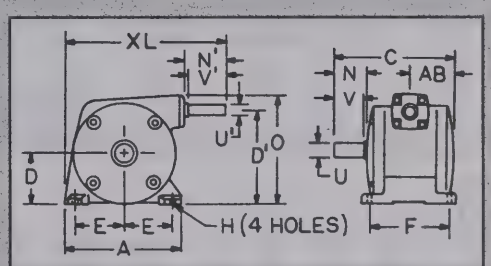
(*) Capacitor-start, capacitor-run with two externally mounted capacitors; all other models are capacitor-start, induction-run.

## INDIRECT DRIVE RIGHT ANGLE SPEED REDUCERS



- **2" Worm center distance**
- **30 to 157 RPM***
- **Single output shaft**
- **All units shipped with oil**



Designed for continuous duty, high torque, slow speed applications where a compact, dependable speed reducer is required. Factory lubricated with an AGMA 8C oil. Gray finish. Dayton brand.

**Worm Gear:** Hardened steel
**Worm Wheel:** Forged bronze
**Bearings:** Tapered roller on output shaft for greater overhung load capacity.
**Overhung Load:** 600 lbs.
**Oil Seals:** Double-lip seals on input and output shaft. Inner lip is spring-loaded to keep lubricant in and outer lip keeps dirt and foreign matter out
**Recommended Motors:** 1/3 to 1 HP, 1725 RPM
**Mounting:** All position

Dayton®

Replacement Parts Available
1-800-323-0620

| Nominal Output RPM* | Output Torque In.-Lbs.* | Max. Input HP* | Nominal Gear Ratio | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **30** | 285 | 1/3 | 58:1 | **2Z306** | $301.00 | **$229.25** | 11.0 |
| **45** | 337 | 1/2 | 39:1 | **2Z307** | 301.00 | **229.25** | 10.0 |
| **67** | 385 | 3/4 | 26:1 | **2Z308** | 301.00 | **229.25** | 11.0 |

# INDIRECT DRIVE RIGHT ANGLE SPEED REDUCERS

Dayton®

Mounting bases available on page 270

Speed Reducer shown with Flange Coupling Kit

- 29 to 350 RPM at 1750 RPM input
- Single (left hand facing input shaft) and double output shafts
- Interchangeable with most Grove (Flexaline) and Ohio (Uniline) models
- Large prefilled oil sump
- Output shaft on single shaft models can be field converted from standard left-hand to right-hand extension

**Recommended Motor:** 1/8 to 5 HP, 1750 RPM
**Bearings:** Ball on input shaft; tapered roller on output (1.00" WCD units have ball)
**Worm:** Thread rolled and hardened alloy for higher strength and low power loss
**Output Gear:** Hardened forged bronze
**Oil Seals:** Double-lipped, spring-loaded
**Housing:** Cast iron (1.00" WCD are cast aluminum)
**Lubricant:** AGMA #8 (1.00" WCD have synthetic oil)
**Rotation:** Reversible
**Mounting:** All position, except input shaft down
**Flange Coupling Kits:** For adapting NEMA 56C-184TC motors to Dayton right angle speed reducers Nos. 6Z419 thru 6Z470.

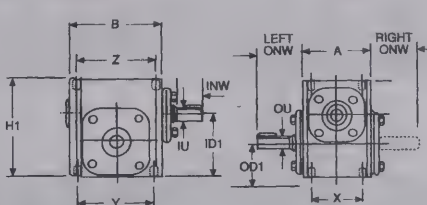
We deliver the products that deliver the power.

# INDIRECT DRIVE RIGHT ANGLE SPEED REDUCERS

- **BOSTON LIFETIME LIMITED WARRANTY. See page facing inside back cover of catalog for details.**
- **SHIPPED LESS OIL (see listing for No. 4ZF30 gear oil on page 2766)**
- **29 to 350 RPM with 1750 RPM input motor**
- **Single output shaft (left hand facing input shaft)**
- **All position mounting with base kits**

Heavy-duty worm gear speed reducers with value-engineered features for flexible installation, long life and simplified maintenance. Fine-grained cast-iron housing. Integral input worm and shaft of case-hardened alloy steel. Oversized ball and roller bearings for maximum performance. Extra threaded bolt holes, when used with base, allow multiposition installation on floor, sidewall or ceiling (see base kits, page 273). Boston brand.



**DAYTON 180V PMDC MOTORS AVAILABLE, SEE PAGES 185 and 186.**

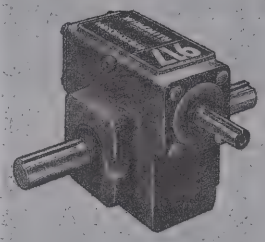
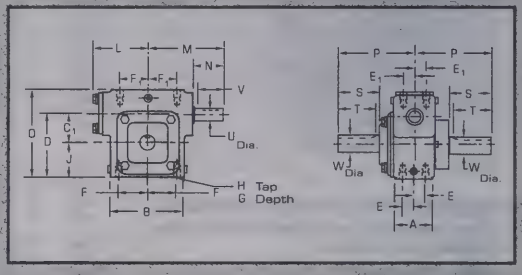
# INDIRECT DRIVE RIGHT ANGLE SPEED REDUCERS



- WINSMITH 24 MONTH LIMITED WARRANTY, see page facing inside back cover of catalog for details
- USDA APPROVED EPOXY COATING prevents rust and corrosion in wash-down environments
- USDA rust preventative coating on all shafts
- Shaft slingers used to prevent contaminants from contacting oil seals
- Breather vent to prevent liquids from entering reducer
- Double output shafts
- Filled with Mobil SHC629 synthetic lubricant
- Can be mounted with or without optional base (see page 279) using predrilled and tapped holes provided



Replacement Parts Available
1-800-323-0620

We deliver the products that deliver the power.

# STRAIGHT BEVEL GEAR DRIVES

- For industrial applications where low speed/high torque drives are required
- Multiposition mounting flexibility—extra threaded bolt holes allow installation of gear drive in almost any position
- Feature compact, rugged construction and precision forged straight tooth bevel gears
- Made in USA

### RIGHT-90 SERIES

- Designed for high efficiency, quiet operation, and long service life
- Gears are made of hardened alloy steel
- Precision ground alloy steel shafts are mounted on precision ball bearings
- Housings are made of aluminum alloy; with all mounting surfaces precision machined
- All shaft projections have high quality oil seals
- Prelubricated for life
- Made in USA

## SHAFT COUPLINGS AND SPIDER INSERTS

- Precision machined high quality steel for accurate assembly, minimal vibration, and quiet operation
- Insert (3-jaw) type
- No lubrication needed
- Complete with keyway and setscrew
- Three types of spider inserts available for different service requirements; rubber bost bronze and polyurethane; See page 358 for spider inserts

We deliver the products that deliver the power.

# FIXED BORE ROLLER CHAIN SPROCKETS

U S TSUBAKI

Made In U.S.A.

- ANSI standard sprockets for use with standard roller chain (see page 299 )
- For larger sprockets order ANSI 120, 140, and 160 stock bore sprockets from page 297
- Unique cellular manufacturing in U.S. production facilities assures precise quality control
- Constructed of high alloy carbon steel
- Standard keyway and two setscrews located directly over keyway and 90°

For Plain Bore Roller Chain Sprockets
See Page 293
For Double Strand Sprockets
See Page 295
For Stainless Steel Sprockets
See Page 294

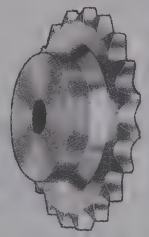
(*) Setscrew located 90° and 180° from keyway. (†) 3/8" Bore size has no keyway.

## STANDARD KEYWAY AND SETSCREW MACHINING GUIDE



| Dia. of Shaft (In.) | Keyseat Width x Depth (In.) | Dia. of Setscrew* | Dia. of of Shaft (In.) | Keyseat Width x Depth (In.) | Dia. of Setscrew* |
|---|---|---|---|---|---|
| 5/16 - 7/16 | 3/32 x 3/64 | 8-32 | $2^{13}/_{16}$ - $3^{1}/_{4}$ | 3/4 x 3/8 | 3/4" |
| 1/2 - 9/16 | 1/8 x 1/16 | 10-24 | $3^{5}/_{16}$ - $3^{3}/_{4}$ | 7/8 x 7/16 | 3/4 |
| 5/8 - 7/8 | 3/16 x 3/32 | 1/4 | $3^{13}/_{16}$ - $4^{1}/_{2}$ | 1 x 1/2 | 3/4 |
| $15/16$ - $1^{1}/_{4}$ | 1/4 x 1/8 | 5/16 | $4^{9}/_{16}$ - $5^{1}/_{2}$ | $1^{1}/_{4}$ x 5/8 | 3/4 |
| $1^{5}/_{16}$ - $1^{3}/_{8}$ | 5/16 x 5/32 | 5/16 | $5^{9}/_{16}$ - $6^{1}/_{2}$ | $1^{1}/_{2}$ x 3/4 | 1 |
| $1^{7}/_{16}$ - $1^{3}/_{4}$ | 3/8 x 3/16 | 3/8 | $6^{9}/_{16}$ - $7^{1}/_{2}$ | $1^{3}/_{4}$ x 7/8 | 1 |
| $1^{13}/_{16}$ - $2^{1}/_{4}$ | 1/2 x 1/4 | 1/2 | $7^{9}/_{16}$ - $8^{15}/_{16}$ | 2 x 1 | 1 |
| $2^{5}/_{16}$ - $2^{3}/_{4}$ | 5/8 x 5/16 | 5/8 | 9 - $10^{15}/_{16}$ | $2^{1}/_{2}$ x $1^{1}/_{4}$ | 1 |

(*) Setscrew size may vary depending on hub wall thickness.
NOTE: As a general rule, the hub wall over the keyway should be equal to or greater than the diameter of the setscrew.
NOTE: Maximum bore guidelines should be adhered to in order to ensure maximum product quality standards.

# FIXED BORE ROLLER CHAIN SPROCKETS

U S TSUBAKI

Made In U.S.A.

- ANSI standard sprockets for use with 35 through 160 pitch roller chain (see page 299)
- For larger sprockets order ANSI 120, 140, and 160 plain bore sprockets from page 297
- Unique cellular manufacturing in U.S. production facilities assures precise quality control
- Constructed of high alloy carbon steel
- Standard keyway and two setscrews included (except on 3/8" bore size)
- For standard keyway and two setscrews machining guide see page 291
- Set screw located directly over keyway and 90° from keyway

(*) Setscrew located 90° and 180° from keyway.

IF YOU'RE IN A BIND, CALL GRAINGER

If it's an emergency, chances are Grainger's got the items you need today. Grainger has more than 350 well-stocked branch nationwide. So you can replace, build, or repair it right away. And we're conveniently located. To find the branch nearest yo check the Branch Locations listed in the front of this catalog.

U S TSUBAKI

Made in U.S.A.

- **Roller chain sprockets in ANSI sizes 120, 140, 160 are sold with a minimum plain bore. User may machine to maximum bore indicated and add keyway and setscrew hole as required. See Standard Keyway and Setscrew Machining Guide shown below.**
- **For fixed bore sprockets see pages 291 and 292**

(*) Dimensions shown allow for standard keyway with setscrew at 90°. (†) Length through bore. (‡) Hub diameters may vary to suit bore sizes.

### STANDARD KEYWAY AND SETSCREW MACHINING GUIDE

| Dia. of Shaft (In.) | Keyseat Width x Depth (In.) | Dia. of Setscrew* | Dia. of of Shaft (In.) | Keyseat Width x Depth (In.) | Dia. of Setscrew* |
|---|---|---|---|---|---|
| 5/16 - 7/16 | 3/32 x 3/64 | 8-32 | 2 13/16 - 3 1/4 | 3/4 x 3/8 | 3/4" |
| 1/2 - 9/16 | 1/8 x 1/16 | 10-24 | 3 5/16 - 3 3/4 | 7/8 x 7/16 | 3/4 |
| 5/8 - 7/8 | 3/16 x 3/32 | 1/4 | 3 13/16 - 4 1/2 | 1 x 1/2 | 3/4 |
| 15/16 - 1 1/4 | 1/4 x 1/8 | 5/16 | 4 9/16 - 5 1/2 | 1 1/4 x 5/8 | 3/4 |
| 1 5/16 - 1 3/8 | 5/16 x 5/32 | 5/16 | 5 9/16 - 6 1/2 | 1 1/2 x 3/4 | 1 |
| 1 7/16 - 1 3/4 | 3/8 x 3/16 | 3/8 | 6 9/16 - 7 1/2 | 1 3/4 x 7/8 | 1 |
| 1 13/16 - 2 1/4 | 1/2 x 1/4 | 1/2 | 7 9/16 - 8 15/16 | 2 x 1 | 1 |
| 2 5/16 - 2 3/4 | 5/8 x 5/16 | 5/8 | 9 - 10 15/16 | 2 1/2 x 1 1/4 | 1 |

(*) Setscrew size may vary depending on hub wall thickness.
NOTE: As a general rule, the hub wall over the keyway should be equal to or greater than the diameter of the setscrew.
NOTE: Maximum bore guidelines should be adhered to in order to ensure maximum product quality standards.

## KEYLESS CHUCKS For Motor Arbors

Dayton

**No. 1F610 Motor Shaft Arbor Not Included**

Use to drive flexible shafts, wire brushes, sanders, drill bits, and other shank-mounted power tool accessories. Mounts on 1/2"-20 RH shaft, see Dayton motor shaft arbors in chart above and mandrel No. 6L098. Jaws are spring-loaded; to open/close turn chuck by hand. Use only on shafts which turn CCW as viewed from the shaft end of the motor. Machined from cold-rolled steel with plated finish.

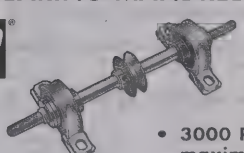
| Capacity | Fits Shaft | Stock No. | Each | Shpg. Wt. |
|---|---|---|---|---|
| **0-1/4"** | 1/2"-20 RH | **1F612** | **$9.05** | 0.2 |
| **0-1/2"** | 1/2"-20 RH | **1F610** | **12.53** | 0.6 |

## 1/4" DIA. SHAFT ADAPTER

For 3½" dia. unit bearing motors. Provides 1/4" dia. x 1"L shaft for using standard fan blade on 1/4"-20 RH threaded shaft (GE 51 frame) unit bearing motors. Socket set screw secures adapter on threaded shaft.

**No. 4X098.** Shpg. wt. 0.1 lbs. List.....$5.36. Each.....**$3.49**

## SHAFT EXTENDER KIT

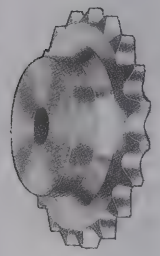


For use when additional shaft length of 2½" is required. Adapts to 3/8" dia. shaft. Extension is 2½" OAL in 3 sections: 3/8" OD x 1⅝"L, 5/16" OD (shoulder) x 1/2"L with threaded end #10-24 x 3/8"L. Coupling is 3/8" ID x 1/2" OD x 1⅛" OAL with two #5-40 socket set screws.

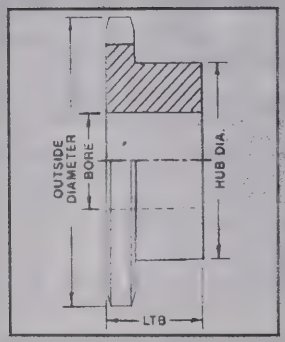
**No. 4M735.** Shpg. wt. 0.2 lbs. List.....$16.00. Each.....**$12.86**

## HEAVY-DUTY BALL BEARING MANDRELS

Dayton



- **3000 RPM maximum**
- **Precision setscrew-type ball bearing pillow blocks in die-cast housings are pre-lubricated and sealed for maintenance-free operation**
- **Will take up to 1½" thick buffing/finishing wheels**
- **Suitable for jackshaft applications**
- **Uses A or 4L type V-belt**
- **Includes hex nut and two machined flange washers (1½" OD) for each end**
- **Components are plated to resist rust**



| Drive Shaft (In.) | Threaded Ends RH | Threaded Ends LH | OD Pulley (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **5/8 x 12** | 1/2-20 | 1/2-20 | 2 | **6L098** | $50.40 | **$35.55** | 3.3 |
| **3/4 x 12** | 5/8-11 | 5/8-11 | 2 | **6L099** | 50.40 | **35.60** | 3.6 |

# STAINLESS STEEL SPROCKETS

U S TSUBAKI

Made in U.S.A.

- For use with Nos. 40, 50, and 60 stainless steel roller chains found on pages 298 and 299
- Precision machined from 304 stainless steel
- Clean bore, no keyway, no setscrew

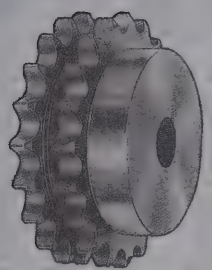
## STANDARD KEYWAY AND SETSCREW MACHINING GUIDE

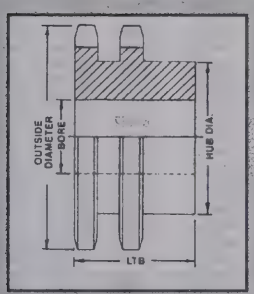
| Dia. of Shaft (In.) | Keyseat Width x Depth (In.) | Dia. of Setscrew* | Dia. of of Shaft (In.) | Keyseat Width x Depth (In.) | Dia. of Setscrew* |
|---|---|---|---|---|---|
| 5/16 - 7/16 | 3/32 x 3/64 | 8-32 | 2 13/16 - 3 1/4 | 3/4 x 3/8 | 3/4" |
| 1/2 - 9/16 | 1/8 x 1/16 | 10-24 | 3 5/16 - 3 3/4 | 7/8 x 7/16 | 3/4 |
| 5/8 - 7/8 | 3/16 x 3/32 | 1/4 | 3 13/16 - 4 1/2 | 1 x 1/2 | 3/4 |
| 15/16 - 1 1/4 | 1/4 x 1/8 | 5/16 | 4 9/16 - 5 1/2 | 1 1/4 x 5/8 | 3/4 |
| 1 5/16 - 1 3/8 | 5/16 x 5/32 | 5/16 | 5 9/16 - 6 1/2 | 1 1/2 x 3/4 | 1 |
| 1 3/4 | 3/8 x 3/16 | 3/8 | 6 9/16 - 7 1/2 | 1 3/4 x 7/8 | 1 |
| 1 15/16 - 2 1/4 | 1/2 x 1/4 | 1/2 | 7 9/16 - 8 15/16 | 2 x 1 | 1 |
| 2 5/16 - 2 3/4 | 5/8 x 5/16 | 5/8 | 9 - 10 15/16 | 2 1/2 x 1 1/4 | 1 |

* Setscrew size may vary depending on hub wall thickness

NOTE: As a general rule, the hub wall over the keyway should be equal to or greater than the diameter of the setscrew

NOTE: Maximum bore guidelines should be adhered to in order to ensure maximum product quality standards.





We deliver the products that deliver the power.

# DOUBLE STRAND SPROCKETS

U S TSUBAKI

Made in U.S.A.

- For use with Nos. 35-2, 40-2, 50-2, 60-2 80-2, and 100-2 double strand roller chain on page 299
- Precision machined from high alloy carbon steel
- Nos. 35 through 80, typically used as the drive sprocket, have hardened teeth for extra durability
- Maximum bore guidelines should be adhered to in order to ensure maximum product quality standards
- When selecting multiple strand sprockets refer to keyway and setscrew machining guide on page 293
- Clean bore, no keyway, no setscrew

*) Length through bore.

# BUSHED BORE ROLLER CHAIN SPROCKETS

- For use with Nos. 40, 50, 60, and 80 pitch roller chain
- Precision machined
- Sprockets with 30 teeth or less have hardened teeth for increased life
- Outside diameter (O.D.) range: 2.65" to 23.46"
- Bore range 1/2" to 3 7/16" with required split taper bushing (not included); order split taper bushing separately on page 317

ROLLER CHAIN AVAILABLE, SEE PAGE 299

SPLIT TAPER BUSHINGS AVAILABLE, SEE PAGE 317

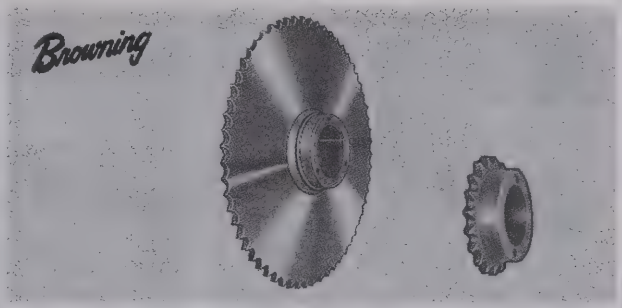
LET US SUPPLY YOUR MOTORS AND RELATED PRODUCTS



We deliver the products that deliver the power.

# BUSHED BORE ROLLER CHAIN SPROCKETS

- For use with Nos. 100, 120, 140, and 160 pitch roller chain
- Precision machined
- Sprockets with 30 teeth or less have hardened teeth since they are traditionally the driver sprocket
- Bore range 3/4" to 3 7/16" with required split taper bushing (not included); order split taper bushing separately on page 317

ROLLER CHAIN AVAILABLE, SEE PAGES 298 THRU 300
SPLIT TAPER BUSHINGS AVAILABLE, SEE PAGE 317

• Highly corrosion resistant. # Marginally corrosion resistant (depending on application conditions).
= Not corrosion resistant. * No data to support.

### POLY CHAIN (PC)

Designed for conditions where lubrication is impractical or undesirable. Can withstand some corrosive conditions and is suited for environments requiring sanitary conditions. Inner links are polyacetal, outer links are 304 stainless steel.

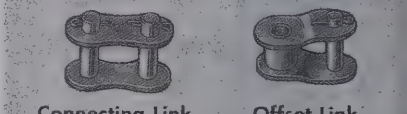
### NICKEL PLATED (NP)

Suitable for slightly corrosive environments and for outdoor conditions exposed to rain. Temperature range: 15°F to 140°F. Not suggested in applications exposed to food or high temperature variance.

### 304 STAINLESS STEEL (SS)

Ideal for fresh and saltwater exposures. Suitable for corrosive conditions involving food, chemicals, and pharmaceuticals. Temperature range: -270°F to 750°F.

### 600 STAINLESS STEEL (AS)



Slightly less corrosion resistance of 304 stainless steel with a 50% higher maximum allowable load made possible through heat treating of pins, bushings, and rollers. Temperature range: -40°F to 750°F.

For more detailed information on specific substance compatibility, see "Corrosion Resistance Guide" above right.

A WIDE SELECTION OF BELTS IS AVAILABLE, SEE PAGES 303 THRU 309.

(*) Includes one connecting link for each 10 ft. of chain.

- **Factory preloaded to reduce initial stretch to 0.01%, minimizing necessary adjustments after first use**
- **Special prelubrication minimizes stretch to increase wear life and reduce maintenance costs**
- **Advanced micron production control maximizes contact between pin and bushing, increasing chain wear life**
- **Rollers and special wide-waist plates have been shot peened for greater maximum allowable loads**
- **Meet all American National Standards Institute (ANSI) requirements**
- **Fully interchangeable with other ANSI roller chain**

**Maximum Allowable Load** is the maximum tension a chain may be safely subjected to. This value should never be exceeded by the actual design load factored by speed, temperature, and dynamic adjustments as applicable.
**Average Ultimate Tensile Strength** is the mean average of a series of tensile tests where the chains are loaded to a destructive failure. Average Ultimate Tensile Strength is not a measure of the load at which a chain may be applied; it is indicative only of the tensile strength quality of the chain.

## ELASTOMERIC TENSIONERS

**Universally applicable tensioning device** for use as an elastic spring element for chain and belt tensioning, pressing, and cushioning. Tensioners keep chain and belts taut, preventing uneven drive surges and power losses. Chain and belt life are prolonged by eliminating slap and vibration while minimizing drive, bearing, and shaft wear.

**Four rubber inserts inside base isolate tensioning arm** from contact with base and provide continuous resistance to applied rotary forces. Tensioning arm deflects up to 30° either side of its normal position allowing a pre-tension force that self-adjusts an idler to everyday elongation of a chain or belt while dampening vibration in the drive.

**Employs no metal-to-metal connections;** no lubrication is required. Dirt and grime won't affect operation. Can be used indoors or out, from –40° to 180°F. One bolt mounting makes installation easy and allows for 360° position flexibility.

**Mounting bolt and idler bolt included.** Nos. 1L833, 1L834, and 1L835 include 5/8" bushing. Idler sprockets not included; for compatible sprockets see page 302.

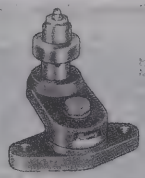
# DRIVE TIGHTENERS, SHAFTS, AND IDLER BUSHINGS

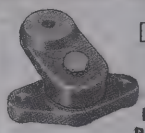
## DRIVE TIGHTENERS

- **Drive tighteners are used to position or remove slack from V-belt, gearbelt, or roller chain drives**



**Selection Procedure:**

**Step 1**—Select drive tightener style to suit application.



**Step 2**—Select either a tightener shaft or idler bushing.

**Step 3**—Select idler component; needle bearing idler components for tightener shafts are found on page 302 . Idler components for idler bushings include any sheave, sprocket, or gearbelt pulley which uses an H or Q1 Browning split taper bushing, see pages 296, 297, 314, and 313.

(*) Order shafts separately from page 301. (†) Not for use with drive tighteners or tightener shafts.

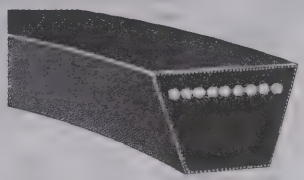
## COMPOSITE IDLER SPROCKETS

- Wear-resistant glass reinforced nylon
- Insertion molded ABEC.1 high precision bearings
- Lightweight and quiet
- Corrosion-resistant
- Lubrication not required
- Compatible with Lovejoy tensioners on page 300

| Chain No. | No. of Teeth | Nominal O.D. (In.) | Bore | Efson Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 40 | 17 | 3.00 | .5" Dia. x 1" Length | CS 4002 | **3ZP37** | $23.70 | **$10.55** | 0.5 |
| 50 | 15 | 3.25 | .5" Dia. x 1" Length | CS 5002 | **3ZP38** | 25.70 | **11.45** | 0.5 |
| 60 | 13 | 3.50 | .5" Dia. x 1" Length | CS 6002 | **3ZP39** | 28.70 | **12.80** | 0.5 |

We deliver the products that deliver the power.

# V-BELT SELECTION



## V-BELT COMPARISON

Browning

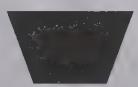
USA

PROUDLY MADE IN THE USA

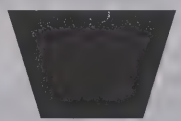
- All Browning belts are oil and heat-resistant
- Browning V-belts interchange with major brands like Goodyear, Gates, Dayco, and others (see chart below)
- Lengths are matched to RMA (Rubber Manufacturers' Association) standards

FHP and Super Gripbelt®
(Classical, Smooth Wrapped)
3L, 4L, 5L, A, B, C, D, & 8V

Gripnotch®
(Raw Edge Notched, Cog)
AX, BX, CX, 3VX, & 5VX



## BELT CROSS-SECTIONS SHOWN ACTUAL SIZE

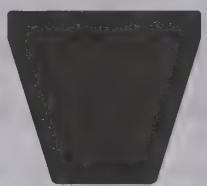


3L
3/8 X 7/32"

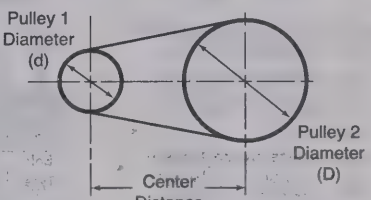
4L, A AX
1/2 X 5/16"

5L, B BX
21/32 X 3/8"

C, CX
7/8 X 17/32"



D
1 1/4 X 3/4 "



3VX
3/8 X 5/16"

5VX
5/8 X 17/32"

8V
1 X 7/8"

**BELT LENGTH FORMULA**

$$L = 2C + 1.57\,(D+d) + \frac{(D-d)^2}{4C}$$

(exact: $L = 2C + 1.57\,(D+d) + \frac{(D-d)^2}{4C}$; approximate: $L = 2C + 1.57\,(D+d)$)

L = Pitch Length of Belt
C = Center Distance
D = Pitch Diameter of Large Sheave
d = Pitch Diameter of Small Sheave

## SELECTION GUIDELINES

### FOR DIRECT REPLACEMENT WHEN ORIGINAL BELT PART NUMBER IS AVAILABLE

Match RMA number/manufacturer's part number (from your existing V-belt) then make selection from the following pages. Browning brand V-belts interchange with all the manufacturers listed below. Contact your local Grainger branch for assistance with cross-referencing specific part numbers.

### FOR NEW APPLICATIONS WHEN ORIGINAL BELT PART NUMBER IS NOT AVAILABLE

When replacing V-belts with worn markings use the belt cross-sections above to identify the belt type. Belt length can be determined by using either the Browning V-belt rule, No. 3HX32 (available on page 308, or by using the belt length formula calculation above. Horsepower tables are provided on the following page for assistance designing new applications.

### BELT INTERCHANGE*

| RMA Belt Size | BROWNING | GOODYEAR | GATES | DAYCO |
|---|---|---|---|---|
| 3L, 4L, 5L | FHP | Fractional Horsepower | TRUFLEX | Durapower FHP |
| A, B, C, D | Super Gripbelts | HY-T | HI-POWER | Super Blue Ribbon |
| AX, BX, CX | Gripnotched | Torque-Flex | TRI-POWER | Gold Label Cog-Belt |
| 3VX, 5VX, 8V | 358 | HY-T Wedge | SUPER HC | Power Wedge Vee Cog-Belt |

(*) Contact local Grainger branch for assistance with cross-referencing specific part numbers.

### IF YOU'RE IN A BIND, CALL GRAINGER

**If it's an emergency, chances are Grainger's got the items you need today. Grainger has more than 350 well-stocked branches nationwide. So you can replace, build, or repair it right away. And we're conveniently located. To find the branch nearest you, check the Branch Locations listed in the front of this catalog.**

# V-BELT SELECTION

Browning USA PROUDLY MADE IN THE USA

- All belts oil and heat-resistant
- Browning V-belts interchange with major brands like Goodyear, Gates, and Dayco (see chart on facing page)
- Length matched to RMA (Rubber Manufacturers' Association) standards
- All belts are static conducting

## FHP (FRACTIONAL HORSEPOWER) V-BELTS

**Application Characteristics:**
Low horsepower

- For single groove low horsepower applications (under 3 HP)
- Ideal for fan applications

| Belt Type | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 3L | Pitch Dia.† | 1.25 | 1.5 | 1.75 | 2.0 | 2.5 | 3.0 | 3.5 | 4.0 | 4.5 | 5.0 | |
| | HP Rating* | 0.09 | 0.15 | 0.23 | 0.29 | 0.43 | 0.55 | 0.61 | 0.67 | 0.73 | 0.78 | |
| **Belt Type** | | | | | | | | | | | | |
| 4L | Pitch Dia.† | 1.25 | 1.5 | 2.0 | 2.5 | 3.0 | 3.5 | 4.0 | 4.5 | 5.0 | 5.5 | 6.0 |
| | HP Rating* | 0.09 | 0.14 | 0.29 | 0.60 | 0.88 | 1.17 | 1.37 | 1.49 | 1.61 | 1.70 | 1.78 |
| **Belt Type** | | | | | | | | | | | | |

## SUPER GRIPBELTS® (A, B, C, and D Types)

**Application Characteristics:**
Medium horsepower

- For industrial applications requiring single or multiple V-belt drives
- Transmits more horsepower and has longer life expectancy than FHP V-belts
- Suited for "clutching" applications

| Belt Type | | | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| A | Pitch Dia.† | 2.00 | 2.20 | 2.60 | 3.00 | 3.40 | 3.70 | 4.00 | 4.40 | 4.70 | 5.00 | 5.40 | 5.70 | 6.00 | 6.40 | 7.00 | 8.00 |

## GRIPNOTCH V-BELTS (AX, BX, and CX Types)

**Application Characteristics:**
Medium/high horsepower

- For industrial applications requiring single or multiple V-belt drives
- Transmits more horsepower than comparable Super Gripbelts
- Raw edge design provides more aggressive gripping with less belt slippage

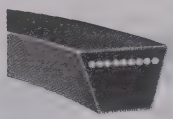
| Belt Type | | | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| AX | Pitch Dia.† | 2.00 | 2.20 | 2.60 | 3.00 | 3.40 | 3.70 | 4.00 | 4.40 | 4.70 | 5.00 | 5.40 | 5.70 | 6.00 | 6.40 | 7.00 | 8.00 |
| | HP Rating* | 1.24 | 1.58 | 2.25 | 2.90 | 3.53 | 3.99 | 4.46 | 5.15 | 5.67 | 6.18 | 6.84 | 7.34 | 7.82 | 8.45 | 9.39 | 10.88 |
| **Belt Type** | | | | | | | | | | | | | | | | | |
| BX | Pitch Dia.† | 3.00 | 3.40 | 3.80 | 4.20 | 4.60 | 5.00 | 5.40 | 5.80 | 6.20 | 6.60 | 7.00 | 7.40 | 8.00 | 8.60 | 9.00 | 9.40 |
| | HP Rating* | 3.72 | 4.62 | 5.50 | 6.36 | 7.19 | 8.08 | 9.19 | 10.27 | 11.34 | 12.39 | 13.41 | 14.42 | 15.89 | 17.32 | 18.23 | 19.13 |
| **Belt Type** | | | | | | | | | | | | | | | | | |
| CX | Pitch Dia.† | 5.60 | 7.00 | 7.40 | 7.80 | 8.20 | 8.60 | 9.00 | 9.40 | 9.80 | 10.20 | 11.00 | 12.00 | 14.00 | | | |
| | HP Rating* | 14.10 | 18.35 | 19.49 | 20.60 | 21.66 | 23.14 | 24.61 | 26.05 | 27.44 | 28.79 | 31.37 | 34.32 | 39.31 | | | |

- Notched construction allows belt to flex easier around driver sheave and run cooler than unnotched belts
- Not for use on "clutching" applications because of aggressive grip
- Tend to operate at slightly higher noise levels because of the notching

## 358® TYPE V-BELTS (3VX, 5VX, amd 8V)

**Application Characteristics:**
High horsepower

- For industrial applications requiring single or multiple V-belt drives
- Transmits substantially more horsepower than Super Gripbelts and Gripnotch V-belts, which allows for more compact drive systems (smaller sheave OD and/or fewer grooves)



| Belt Type | | | | | | | | | | | | | | | | | |

(*) Horsepower ratings are of a single belt and are not corrected for ratio, arc of conent, or belt length. They are based on a 1.0 service factor. RMA (Rubber Manufacturers' Association) service factor requirements vary from 1.0 to 2.0.
(†) Pitch diameter of smaller sheave operating at 1750 RPM. Dimensions in inches.

## V-BELT ACCESSORIES

**V-Belt Tension Checker** tensions all V-belt drives (3L, 4L, 5L, A, B, C, D, 3V, 5V, & 8V). Compact, spring-loaded design. Easy to operate; instructions included. **NOTE:** Proper tensioning is necessary to avoid premature belt wear. Adjustable from 10" to 170" belt span and up to 35 lbs. of tension.

**No. 3HX33.** Shpg. wt. 0.3 lbs. List $32.00. Each ..... **$16.03**

**V-Belt Rule** is used to measure length of all sizes of V-belts (3L, 4L, 5L, A, B, C, D, 3V, 5V, & 8V). Manufactured from durable aluminum. Wall mounting holes provided. Easily identifies V-belt length up to 100".

**No. 3HX32.** Shpg. wt. 5.0 lbs. List $27.00. Each ..... **$23.07**

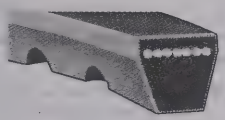
**V-Belt Rack** is a 36" long rack with six 6" hooks provided. Mounting holes provided for easy wall mounting. Order V-belts separately.

**No. 2X907.** Shpg. wt. 2.0 lbs. List $12.00. Each ..... **$7.13**

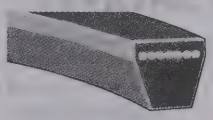
Browning

No. 3HX33 Tension Checker

No. 3HX32 Belt Rule



No. 2X907 Belt Rack (Belts Not Included)



We deliver the products that deliver the power.

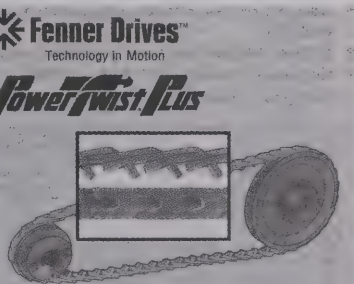
(*) Manufactured to tolerances set by the RMA (Rubber Manufacturers' Association).

## PREMIUM LINK-TYPE V-BELTS



- Ideal for problem V-belt drives
- Composite polyurethane/polyester construction
- For permanent replacement of endless V-belts
- Classical V-belt power ratings
- Superior oil, water, and chemical resistance
- Operating temperature range: –40°F to 240°F
- Eliminates need to stock extensive line of replacement belts
- Reduce transmitted vibration
- Easy installation without dismantling drives

NOTE: Like rubber V-belts, PowerTwist® Plus V-belts are designed for industrial use; **not suitable** for automotive or lawn/garden applications.

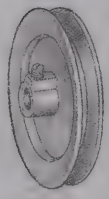
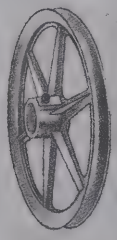
Fenner Drives™
Technology in Motion
PowerTwist Plus

Easy installation; no tools required. Assembles to any length required.



# DIE-CAST, VARIABLE PITCH, & 3 AND 4-STEP SHEAVES



## DIE-CAST SHEAVES

- Precision cast, machine grooved, balanced, and tested
- Hollow head setscrew
- 3/8 and 1/2" bores have no keyway
- 5/8, 3/4, 7/8, 1, and 1 3/16" bores have keyway on sheaves with 2" O.D. and larger
- 5" O.D. sheaves and smaller are solid construction, 6" and larger are spoke construction
- Use with 3L and A or 4L V-belts
- Congress brand

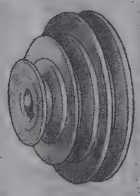
## VARIABLE PITCH SHEAVES FOR SPEED ADJUSTMENT

Congress



- Durable die-cast construction
- Speed variation range of 30%
- Use on motor driven equipment where speed must be set exactly
- Screw adjustment with socket setscrews
- Keyway on Nos. 1X448, 1L845, 3LC28, and 3LC30
- Congress brand

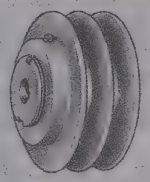
# VARIABLE PITCH SHEAVES



- Durable SAE G3000 cast iron
- Screw flange adjusts to allow speed range variation
- Standard keyways on all sizes except 1/2" bore which cannot accommodate a keyway

# SINGLE GROOVE CAST-IRON SHEAVES

Browning

USA

PROUDLY MADE IN THE USA

- Durable SAE G3000 cast iron; solid on fixed bore through 3.95" O.D. and on bushed bore through 6.45" O.D., others are spoked design
- Precision machined and balanced
- Finished bore sheaves have standard keyway with hollow head setscrew (no keyway on 1/2" bore sheaves)
- Use Browning split taper bushings for bushed sheaves; Order separately from page 317

# TWO GROOVE A & B SERIES CAST-IRON SHEAVES

## TWO GROOVE CAST-IRON SHEAVES

- Durable SAE G3000 cast iron
- Precision machined and balanced
- Finished bore sheaves have standard keyway with hollow head setscrew
- Designed for use with A, AX, B, and BX type V-belts
- Use split taper bushings for bushed sheaves; Order separately on page 317

### SHEAVE PITCH DIAMETERS

**To Calculate Motor Sheave Pitch Diameter: Multiply driven sheave RPM by driven sheave pitch diameter and divide by motor sheave RPM.**

**To Calculate Driven Sheave Pitch Diameter: Multiply motor sheave RPM by motor sheave pitch diameter and divide by driven sheave RPM.**

**Formula: (Motor Sheave P.D.) x (Motor Sheave RPM) = (Driven Sheave P.D.) x (Driven Sheave RPM)**

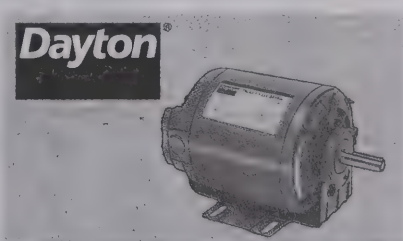
## MOTOR PULLEY REPLACEMENT FOR DOMESTIC SEWING MACHINES

- Machined from steel bar stock
- With socket set screw
- Plated finish

| Description | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| **Motor Pulley, 7/8" Dia., 1/4" Bore** | **1X459** | $3.61 | **$2.80** | 0.1 |



## DAYTON BRAND SEWING MACHINE MOTOR, 3-PHASE

- **NEMA service factors provide a reserve margin for intermittent overloading or fluctuating (high/low) voltage conditions**
- **NEMA design B**

**Typical Uses:** Designed for operating industrial-type sewing machine clutches. Also used for other belt-driven applications where 3-phase power is supplied.

**Bearings:** Double-shielded ball

**Mounting:** Cradle base
**Enclosure:** Open dripproof
**Windings:** Copper
**Ambient:** 40°C
**Duty:** Continuous
**Rotation:** CW/CCW
**Finish:** Gray
**Brand:** Dayton

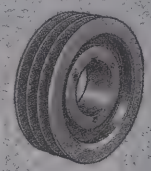
(*) Operable on 50 Hz, 190/380V, at 1425 RPM.

# TWO AND THREE GROOVE A & B SERIES CAST-IRON SHEAVES

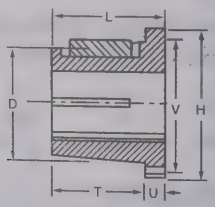


Browning

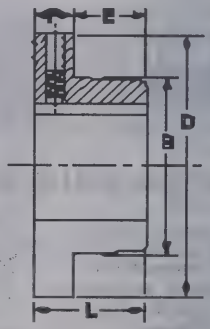
USA

PROUDLY MADE IN THE USA

No. 1A380



No. 3X477



- Durable SAE G3000 cast iron
- Precision machined and balanced
- Requires Browning split taper bushing (order separately from page 317
- Designed for use with A, AX, B, and BX type V-belts
- Easy to mount and remove
- Used in applications with integral horsepower motors and large drive systems where large bore sheaves are needed

We deliver the products that deliver the power.

# SINGLE AND MULTIPLE GROOVE A, B & 5V SERIES

- New B5V greatly simplifies V-drive selection by effectively serving 90% of all applications in the 10-75 HP range
- Combination groove accommodates A (AX), B (BX), and 5V (5VX) section belts; do NOT use with banded belts
- Durable cast-iron construction
- New "B" split taper bushing used extensively in B5V line on sizes larger than 4.68" O.D.; smaller sizes use P1 bushing
- 5V performance at B groove economy means more horsepower per dollar
- New design for higher strength and better balance than classical sheaves
- Interchanges with present B and 5V drive components

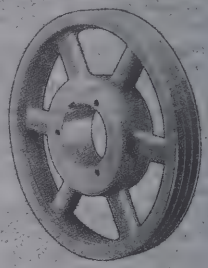
# SINGLE AND MULTIPLE GROOVE 3VX CAST-IRON SHEAVES



- Durable close-grain SAE 3000 cast-iron construction
- Precision machined and balanced
- Solid construction thru 6.00" on one and two groove; thru 8.00" on three and four groove. All others are spoked construction
- Requires Browning split taper bushing (order separately from page 317)
- Designed for use with 3VX V-belts

Browning

USA
PROUDLY MADE IN THE USA

No. 4FG85
Solid Construction

No. 4FH31
Spoked Construction

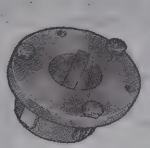
We deliver the products that deliver the power.

# SPLIT TAPER AND QD® BUSHINGS



## SPLIT TAPER BUSHINGS

- For sheaves, sprockets, pulleys, gear-belt pulleys, and chain couplings
- 3/4" per foot taper for shaft clamping
- External key on the bushing provides positive drive (except Models G & H)
- Solid flange for true concentricity
- For keyway size refer to page 322
- For Dimensions see page 314

## QD® BUSHINGS

- 3/4" per foot taper for ultimate shaft clamping
- Used with many HPT sprockets on page 318
- Also can be used with other competitive sheave and sprocket systems that utilize QD bushings
- For keyway size refer to page 322
- For Dimensions see page 314

# SYNCHRONOUS DRIVES HPT SPROCKETS

- HPT (High Performance Timing) sprockets are designed for high HP (up to 85 HP), low RPM (as low as 10 RPM) synchronous drives
- For 8mm and 14mm pitch HPT belts
- Use with HPT belts on page 319
- 8 mm pitch series for applications up to 80 HP; 14mm pitch series for applications up to 85 HP
- Positive drive, no slip
- No lubrication required
- Interchanges with HTD® sprockets
- Requires QD bushing or H split taper bushing; order separately on page 317
- Made in USA

Browning USA PROUDLY MADE IN THE USA

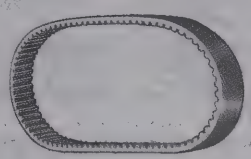
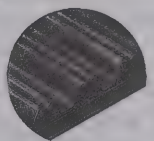
(*) 1/2" Minimum plain bore.
User may machine to maximum bore indicated and add keyway and setscrew hole as required. See Standard Keyway and Setscrew Machining Guide on page 322.



We deliver the products that deliver the power.



# SYNCHRONOUS DRIVES HPT BELTS

- HPT (High Performance Timing) belts are for use with HPT sprockets on page 318
- Available in 8mm pitch, 20mm to 85mm wide, and 14mm pitch, 40mm to 55mm wide
- State of the art tooth design means quieter operation than other high performance belts
- HPT belts handle higher torque transmission than conventional gearbelt and pulley drives
- Interchangeable with HTD® belts
- Oil and heat resistant
- Made in USA

Browning USA
PROUDLY MADE IN THE USA

HPT Belt

# SYNCHRONOUS DRIVES "L" AND "H" GEARBELT PULLEYS

- Ideal for timing applications—no slip, positive drive
- For use with gearbelts on page 321
- Steel or cast-iron construction
- 60 Groove and higher are spoked design.
- "L" pulleys use 3/8" pitch belts 1/2", 3/4", or 1" wide and are for applications up to 4 HP
- "H" pulleys use 1/2" pitch belts 1 or 1½" wide and are for applications up to 20 HP
- Requires Browning split taper bushing; Order separately from page 317

Browning USA PROUDLY MADE IN THE USA

No. 2L637

No. 2L672

# SYNCHRONOUS DRIVES "XL" GEARBELT PULLEYS AND GEARBELTS

## SYNCHRONOUS DRIVES "XL" GEARBELT PULLEYS

- Ideal for timing applications—no slip, positive drive
- Lightweight aluminum construction for light-duty applications up to 1/4 HP
- Gearbelt pulleys are supplied with minimum plain bore; can be rebored to maximum bore specified; no keyway, furnished with two hollow head setscrews at 90°
- "XL" pulleys use 1/5" pitch gearbelts, 1/4 and 3/8" wide listed below

### STANDARD KEYWAY AND SETSCREW MACHINING GUIDE

| Dia. of Shaft (In.) | Keyseat Width x Depth (In.) | Dia. of Setscrew (In.)* | Dia. of Shaft (In.) | Keyseat Width x Depth (In.) | Dia. of Setscrew (In.)* |
|---|---|---|---|---|---|
| 5/16-7/16 | 3/32 x 3/64 | 8-32 | 2 13/16-3 1/4 | 3/4 x 3/8 | 3/4 |
| 1/2-9/16 | 1/8 x 1/16 | 10-24 | 3 5/16-3 3/4 | 7/8 x 7/16 | 3/4 |
| 5/8-7/8 | 3/16 x 3/32 | 1/4 | 3 13/16-4 1/2 | 1 x 1/2 | 3/4 |
| 15/16-1 1/4 | 1/4 x 1/8 | 5/16 | 4 9/16-5 1/2 | 1 1/4 x 5/8 | 3/4 |
| 1 5/16-1 3/8 | 5/16 x 5/32 | 5/16 | 5 9/16-6 1/2 | 1 1/2 x 3/4 | 1 |
| 1 7/16-1 3/4 | 3/8 x 3/16 | 3/8 | 6 9/16-7 1/2 | 1 3/4 x 7/8 | 1 |
| 1 13/16-2 1/4 | 1/2 x 1/4 | 1/2 | 7 9/16-8 15/16 | 2 x 1 | 1 |
| 2 5/16-2 3/4 | 5/8 x 5/16 | 5/8 | 9-10 15/16 | 2 1/2 x 1 1/4 | 1 |

(*) Setscrew size may vary depending on hub wall thickness.
NOTE: As a general rule, the hub wall over the keyway should be equal to or greater than the diameter of the setscrew.
NOTE: Maximum bore guidelines should be adhered to in order to ensure maximum product quality standards.

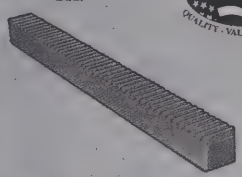
We deliver the products that deliver the power.

# STEEL RACK AND STEEL MITER GEARS

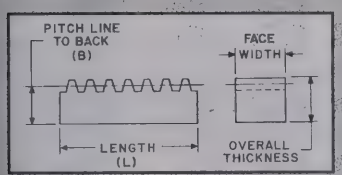
## HOW TO SELECT GEARS

**Gears** are toothed devices that mesh with other toothed devices to transmit motion and to change speed and direction. Gears used together should have the same pitch and pressure angle.

**Spur Gears** provide parallel and linear motion in one plane.



**Miter Gears** provide motion at a right angle on two planes. Miter gears used together must have the same number of teeth.

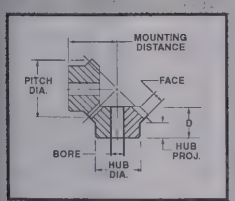


**Pitch** is the ratio of teeth in gear to diameter of pitch circle.

**Pressure Angle** is the angle between a line from the contact points of gear teeth and a radial line of a gear's pitch point. For standard gears, pressure angles of 14½° and 20° have been adopted by ANSI and the gear industry.

## STEEL RACK

- Industry standard 14½° pressure angle for applications where control of backlash is critical (will not operate with 20° spurs)
- For use with spur gears on page 324
- High quality steel
- Precise machining for minimal center distance variation and improved concentricity of mating spur gears



| STANDARD TOLERANCES | |
|---|---|
| **Dimension (In.)** | **Tolerance (In.)** |
| All Lengths* | +1.000-0.000 |
| Face Widths 1/8-3/4 | +0.000-0.002 |
| Face Widths 7/8-1½ | +0.000-0.003 |
| Face Widths 1¾-2 | +0.000-0.004 |
| Face Width 3 | +0.000-0.006 |

(*) Ends not machined. Tolerance allows for cutting and matching.

## STEEL MITER GEARS

- High quality, precision machined steel
- Patented Coniflex® tooth form allows minor adjustment of gears in assembly and provides even load distribution for increased life
- Clean bore
- No setscrew
- No keyway

**For Parallel Shaft, See Spur Gears on Page 326**

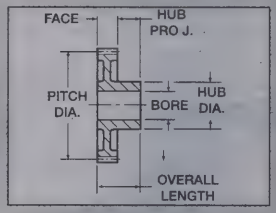
# SPUR GEARS

- Industry standard 14½° pressure angle for replacement gearing and new applications (will not operate with 20° spurs)
- For transmitting motion and power between parallel shafts
- For up and down and back and forward motion
- Ideal for control of backlash
- Use with steel rack on page 323
- Precision machined of high quality steel or cast iron
- Close concentricity between bore, pitch diameter and outside diameter facilitates reboring modifications (reference Keyway and Setscrew Machining Guide on page 322)



Boston Gear

- Smooth, quiet operation
- Clean bore
- No keyway
- No setscrew, except on #24 and #32 pitch spur gears

For Right Angle See Miter Gears on Page 323

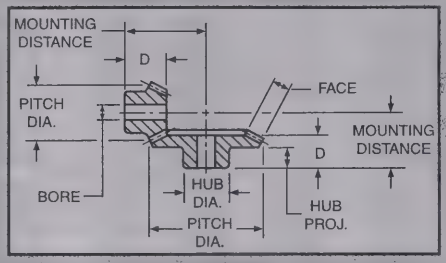
**SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE**



Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.

# SPIRAL BEVEL GEARS

## SPIRAL BEVEL GEARS

Boston Gear

- Stock spiral bevel gears have an overlapping tooth action which results in a smoother gear action, higher load capacity and lower noise than straight bevel gears of equal size
- 2:1 ratio operation
- All hardened steel gears have teeth only hardened and are equipped with standared keyways and setscrews (except as noted in chart below)
- All pinions are left hand
- Kit includes one gear and one pinion
- All unhardened steel gears are clean bore with no setscrew or keyway

### STANDARD TOLERANCES

marson
QUALITY FASTENERS from ... Rockford
HANDI-CHEK
HOLO-KROME A Danaher Company

NTN

- Meets or exceeds all industry standards
- Pressed steel retainer
- For lower relative speed applications
- Accommodate moment and axial (thrust) loads both vertically and horizontally

**Typical Applications:** Electric motors, generators, fans, pumps, power tools, and appliances.

Bearings are individually wrapped and boxed to protect from contaminants during shipping and storage.

**NOTE: Open bearings do NOT come prelubricated and require external lubrication source. Recommended grease is Chevron SRI 2.**

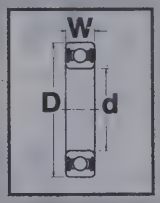
# NTN SEALED BEARINGS



- Meets or exceeds all industry standards
- Pressed steel cages
- Prelubricated and permanently sealed for a lifetime of quiet, maintenance-free operation
- Provide greater protection from contamination than open or shielded bearings
- Feature labyrinth effect sealing
- Seal is made of synthetic rubber molded to a steel plate
- Color coded seals for easy identification
- Seals (LL type) provide protection from two sides
- V-shaped groove acts as "flinger" to keep dirt out
- Series 63200 and 63300 bearings have larger grease capacity for extremely dusty or dirty conditions

**Typical Applications:** Electric motors, machine tools, generators, fans, pumps, power tools, and appliances.

Bearings are individually wrapped and boxed to protect from contaminants during shipping and storage.

# NTN SEALED BEARINGS CROSS-REFERENCE GUIDE

NTN

**LLB**

- Black in color
- Single lip
- Noncontact
- Low friction
- Low torque

- Superior for most electric motor applications
- Highly resistant to dust buildup
- Cooler running

FOR CROSS-REFERENCE INFORMATION SEE PAGE OPPOSITE INSIDE BACK COVER

**LLU**

- Red in color
- Double lip contact design
- Noticeable drag
- Higher torque than LLB design

- Directly interchangeable to competitive single lip contact design
- Optimum protection from dust contamination
